## Introduction

1  
2 This Memorandum of Law is submitted on behalf of defendants Basaaly  
3 Moalin, Mohamed Mohamed Mohamud, Issa Doreh, and Ahmed Nasir Taalil Mohamed in  
4 support of their motion, pursuant to Rule 33, Fed.R.Crim.P., for a new trial in the above-  
5 captioned case, in which they were convicted after a jury trial February 22, 2013.

6 The motion is based upon disclosures made recently – since the June 2013  
7 commencement of reporting on material provided by Edward Snowden regarding  
8 surveillance programs operated by the U.S. government through the National Security  
9 Agency (“NSA”) – by U.S. officials from the Federal Bureau of Investigation (“FBI”) and  
10 NSA in Congressional testimony and other forums.

11 As discussed below, among the disclosures by those government officials  
12 was that such NSA collection, storage, and surveillance were instrumental in the  
13 investigation in this case. Indeed, ultimately, U.S. government officials have cited this  
14 case as the only U.S. criminal case in which a particular NSA program produced  
15 information vital to the prosecution.

16 The collection/storage/interception cited by the government officials relates  
17 to Mr. Moalin’s telephone contacts in 2007, after a prior investigation of him years earlier  
18 had been closed due to lack of sufficient evidence to institute any charges. At issue in this  
19 motion is the legality of that collection/storage/interception, and its impact on this case,  
20 including not only the manner in which evidence was obtained and used by the  
21 government, and whether other evidence constitutes the “fruit of the poisonous tree,” but  
22 also the viability of the government’s only theory at trial. Further at issue is whether NSA,  
23 or other U.S. government agencies, are in possession of exculpatory or discoverable  
24 material to which defendants were entitled in advance of trial.

25 In addition, certain 3500 material alluded to *other*, subsequent electronic  
26 surveillance of Mr. Moalin’s communications while the FISA wiretap on his phone was in  
27 progress – surveillance which, due to its real-time monitoring, indicates it was not  
28 pursuant to the same NSA program that collected the other information related to Mr.

1 Moalin (and the subject of the recent official statements), but instead was conducted under  
2 the auspices of another statutorily and constitutionally invalid NSA program.

3 This Rule 33 motion also seeks discovery of the data and information  
4 collected/stored/intercepted by NSA, and to which the U.S. government officials have  
5 referred in their public statements, and/or which appears in 3500 material. If that  
6 information is classified, it is submitted that it should be produced to cleared counsel (as  
7 each defendant in this case is represented by at least one cleared counsel).

8 Thus, this Rule 33 motion raises the following specific issues, the favorable  
9 resolution of which would be sufficient to grant a new trial:

- 10 (1) whether the NSA interception and/or collection of Mr. Moalin's  
11 communications violated his Fourth and First Amendment rights, and/or  
12 violated the Foreign Intelligence Surveillance Act ("FISA"), or any other  
13 statutory authority upon which such interception/collection was  
14 purportedly based;
- 15 (2) whether the government's response to Mr. Moalin's motion challenging  
16 the electronic surveillance and physical searches conducted pursuant to  
17 FISA – which response was filed *ex parte* – was complete and accurate  
18 with respect to the scope of electronic surveillance and collection to  
19 which Mr. Moalin was subjected;
- 20 (3) whether that government response (and any other related government  
21 submissions), as well as the underlying FISA applications and  
22 submissions in support thereof, should be provided to cleared defense  
23 counsel pursuant to either 50 U.S.C. §§1806(f) & (g), and/or the Fifth  
24 Amendment's Due Process clause; and whether the government's  
25 submissions pursuant to §4 of the Classified Information Procedures Act  
26 ("CIPA"), and the underlying materials, should be disclosed to cleared  
27 defense counsel; and whether the Court should revisit its review and  
28 decisions with respect to any of the government's applications made

1 pursuant to CIPA §4, and provide the government’s CIPA §4  
2 submissions to cleared defense counsel;

- 3 (4) whether the government failed to provide Rule 16 discovery – the  
4 evidence of Moalin’s communications as evidenced by the NSA  
5 interceptions and collection of metadata – it was obligated to produce to  
6 Mr. Moalin;
- 7 (5) whether the public statements, including Congressional testimony of  
8 certain FBI and NSA officials, materially undermines the government’s  
9 central and indispensable premise at trial: that the intercepted  
10 conversations were between Moalin and Aden Hashi Ayrow *directly*, and  
11 *not indirectly*; and
- 12 (6) whether the government failed to provide *Brady* material in the form of:
- 13 (a) the reasons underlying the conclusion, at the end of the initial 2003  
14 investigation of Mr. Moalin, that he was not engaged in illegal  
15 conduct or linked to terrorism. Also, that earlier investigation likely  
16 yielded abundant, if not conclusive, evidence that Mr. Moalin was  
17 sending money to Somalia for humanitarian and other (family)  
18 purposes even before *al Shabaab* existed, and that he did not harbor  
19 anti-U.S. or pro-terrorist sympathies;
- 20 (b) evidence that Mr. Moalin’s contacts with *al Shabaab* that  
21 precipitated the current investigation were *indirect*, and not directly  
22 with Mr. Ayrow;
- 23 (c) exculpatory information and material related to the FBI’s April  
24 2009 Field Intelligence Group Assessment of Mr. Moalin, which  
25 Mr. Moalin requested in his pretrial motions; and,
- 26 (d) anything exculpatory generated by and during the earlier Anaheim  
27 investigation referred to in Ahmed Nasir’s Pre-Sentence Report  
28 (“PSR”) – which also apparently resulted in a declination of

charges.

Accordingly, it is respectfully submitted that the Court should grant defendants' Rule 33 motion, and order a new trial, and/or compel the discovery demanded in this motion, and/or conduct the evidentiary hearings requested herein.

### Statement of the Facts

#### A. *The Charges, Trial, and Verdict*

The Superseding Indictment, S2 10 Cr. 4246 (JM) contained five counts, alleging a Conspiracy to Provide Material Support for Terrorism, in violation of 18 U.S.C. §2339A(a) (Count One); Conspiracy to Provide Material Support to a Foreign Terrorist Organization ("FTO"), in violation of 18 U.S.C. §2339B(a)(1) (Count Two); Conspiracy to Kill in a Foreign Country, in violation of 18 U.S.C. §956 (Count Three); Conspiracy to Launder Monetary Instruments, in violation of 18 U.S.C. § 1956(a)(2)(A) and (h) (Count Four); and Providing Material Support for Terrorism, in violation of 18 U.S.C. § 2339A(a) Count Five).

All four defendants were charged in Counts One, Two, and Three. Count Four charged Mr. Moalin alone, and Count Five charged all defendants *except* Mr. Ahmed Nasir.

Trial commenced January 28, 2013. In its opening statement, the government argued that "[y]ou'll learn in this case that he was the direct connection to Aden Ayrow, the *al-Shabaab* leader who told him it was time to finance the jihad." Trial Transcript, January 30, 2013, at 5. *See also id.*, at 7 ("[a]nd this is how it would work. Aden Ayrow, *al-Shabaab* leader, rock star in *al-Shabaab* and in Somalia, both inside and outside of Somalia, would talk to Basaaly – again, the main connection to Aden Ayrow . . ."); at 10 ("[i]n January of 2008 Aden Ayrow is talking to Basaaly").

Throughout the trial, the government's theory remained consistent with that declaration: that the person named "Sheikalow" in the recorded telephone conversations was, in fact, Mr. Ayrow, and that Mr. Moalin communicated directly with Mr. Ayrow for the purpose of providing material support, in the form of financial assistance, to *al*

1 *Shabaab*, a designated Foreign Terrorist Organization (“FTO”).

2 Thus, in summation the government contended that “Basaaly Moalin was on  
3 the phone with Aden Ayrow, personally on the phone with this internationally infamous  
4 terrorist leader.” Trial Transcript, February 19, 2013, at 4. *See also id.*, at 5 (“[n]ow, I am  
5 going to review with you all the bread crumbs – really not bread crumbs – all the neon  
6 lights that point to the inescapable conclusion that this Sheikalow, the Majadhub, on the  
7 phone with Basaaly Moalin, that was Aden Ayrow”).

8 The jury returned a verdict of guilty on all counts against all defendants  
9 February 22, 2013. All four defendants, who were remanded pending trial, remain in  
10 custody.

11 **B. *Mr. Moalin’s Pretrial Motion to Suppress Electronic Surveillance  
12 Conducted Pursuant to FISA and the FISA Amendments Act***

13 Mr. Moalin moved pretrial to suppress the fruits of the FISA electronic  
14 surveillance and search(es). *See* Docket #92 (December 9, 2011), at 6-28.<sup>1</sup> As part of that  
15 motion, Mr. Moalin moved to preclude any interceptions conducted pursuant to FISA  
16 generally, as well as to any such surveillance requested and conducted pursuant to the  
17 authority provided in 50 U.S.C. §1881a, enacted in 2008 as part of the FISA Amendments  
18 Act of 2008, Pub. L. No. 110-261 (2008) (hereinafter “FAA”), or to discover whether any  
19 information in the FISA applications was the product of surveillance authorized under the  
20 FAA. *See* Docket # 92, at 17-18.

21 Since the FISA surveillance of Mr. Moalin’s telephone straddled the date of  
22 §1881a’s enactment, with some occurring in late 2007, and the remainder until December  
23 2008, it was unknown to Mr. Moalin (and remains unknown) whether any of the FISA  
24 electronic surveillance was conducted pursuant to the FAA. *Id.*, at 17. Mr. Moalin also  
25 sought, via 50 U.S.C. §§1806(f) & (g) disclosure of the underlying FISA applications and  
26 supporting materials.

27 The factual portion of the government response to Mr. Moalin’s motion was

---

28 <sup>1</sup> The government had previously filed a Notice of Intent to Use FISA Information. *See* Docket #s 12 & 44.

1 submitted *ex parte* February 23, 2012, and remains so. *See* Docket #128. Mr. Moalin  
2 filed a Reply March 9, 2012, related to the legal argument advanced by the government in  
3 its publicly filed opposition to the motion. *See* Docket #131.

4 In adjudicating the motion, the Court first issued an *ex parte* Order June 4,  
5 2012, Docket #146, that has never been provided to the defense (either cleared counsel or  
6 the defendants). Apparently the Court's Order required some action or response by the  
7 government, which moved initially for an extension of time to comply with the Court's  
8 June 4, 2012, Order. *See* Docket #148 (June 15, 2012). The Court granted that  
9 application (*see* Docket #149), and June 27, 2012, the government filed an *ex parte*  
10 Statement In Compliance with the Court's June 4, 2012, Order. *See* Docket #151. Again,  
11 neither defendants nor their counsel have been afforded access to that Statement, or the  
12 Order to which it related.

13 **C. *Mr. Moalin's Pretrial Motion for Production of***  
14 ***Exculpatory Material and Information***

15 In his pretrial motions, Mr. Moalin moved for production of exculpatory  
16 material the government was obligated to provide under *Brady v. Maryland*, 373 U.S. 83  
17 (1963) and its progeny. *See* Docket #92, at 34-36. In large part, the specifics of the  
18 motion were based on an FBI San Diego Field Intelligence Group Assessment, dated June  
19 15, 2011 (hereinafter "FIG Assessment").

20 That FIG Assessment was summarized in a two-page partially redacted FBI  
21 Report dated June 15, 2011, created by the San Diego office (denominated in discovery as  
22 GA-DOCS-000051-52, and attached hereto as Exhibit 1). *Id.*

23 According to the FIG Assessment:

24 [t]he San Diego FIG assesses that Moalin, who belongs to the  
25 Hawiye tribe/Habr Gedir clan/Ayr subclan, is the most  
26 significant al-Shabaab fundraiser in the San Diego Area of  
27 Operations (AOR). Although Moalin has previously expressed  
28 support for al-Shabaab, he is likely more attentive to Ayr  
subclan issues and is not ideologically driven to support al-  
Shabaab. The San Deigo FIG assesses that Moalin likely  
supported now deceased senior al-Shabaab leader Aden Hashi  
Ayrow due to Ayrow's tribal affiliation with the Hawiye  
tribe/Habr Gedir clan/Ayr subclan rather than his position in al-  
Shabaab. Moalin has also worked diligently to support Ayr

1 issues to promote his own status with Habr Gedir elders. The  
 2 San Diego FIG assesses, based on reporting that Moalin has  
 3 provided direction regarding financial accounts to be used when  
 transferring funds overseas that he also serves as a controller for  
 the US-based al-Shabaab fundraising network.

4 *Id.* (Exhibit 1).

5 Mr. Moalin's motion for *Brady* material also referenced prior investigations  
 6 of Mr. Moalin, and sought exculpatory information and material regarding them as well.

7 *See* Docket #92, at 34-36.

8 **D. *Recent Disclosures By U.S. Government Officials Regarding NSA  
 9 Interception/Collection of Mr. Moalin's Electronic Communications***

10 In its June 8, 2013, edition, *The Washington Post* published the first in a  
 11 continuing and ongoing series of articles by a variety of news organs, including *The  
 12 Guardian* and *The New York Times*, detailing disclosures by Edward Snowden, a former  
 13 NSA contract employee. The documents Mr. Snowden provided revealed the existence of  
 14 the scope of NSA's electronic surveillance, interception, and collection, including  
 communications data relevant to U.S. persons.<sup>2</sup>

15 Two aspects of those revelations would seem to be particularly relevant here:  
 16 (1) the collection, storage, and subsequent retrospective use of metadata gleaned from  
 17 electronic communications by U.S. persons in the U.S., pursuant to Section 215 (50 U.S.C.  
 18 §1861); and (2) the interception of electronic communications, particularly those with a  
 19 domestic U.S. component (sending or receiving or, in some cases, entirely), pursuant to  
 20 Section 702 (50 U.S.C. §1881a) of the FAA.<sup>3</sup>

21 In response to the Snowden/ *Washington Post* disclosures, Congressional  
 22

---

23 <sup>2</sup> Three days earlier, June 5, 2013, *The Guardian* published an article  
 24 regarding a previously undisclosed order by the Foreign Intelligence Surveillance  
 25 Court, but Mr. Snowden was not cited as the source (although apparently he  
 26 provided that document as well). *See* Glenn Greenwald, "NSA collecting phone  
 27 records of millions of Verizon customers daily," *The Guardian*, June 5, 2013,  
 available at <http://www.theguardian.com/world/2013/jun/06/nsa-phone-records-verizon-court-order> - article.

28 <sup>3</sup> Those two sections are discussed in more detail **post**, in POINT I.

1 hearings were convened on the subject within two weeks. During a June 18, 2013,  
2 appearance before the House Permanent Select Committee on Intelligence (“HPSCI”),  
3 Sean Joyce, Deputy Director, FBI, testified regarding criminal cases that had been initiated  
4 as a result of the NSA interception/collection programs.

5 Initially, in his prepared remarks, Deputy Director Joyce informed the panel  
6 about a particular case which he did not identify. He said of this case that

7 the FBI had opened an investigation shortly after 9/11. We did  
8 not have enough information nor did we find links to terrorism,  
9 so we shortly thereafter closed the investigation. However, the  
10 NSA, using the business record FISA, tipped us off that this  
11 individual had indirect contacts with a known terrorist overseas.  
12 We were able to reopen this investigation, identify additional  
13 individuals through a legal process and were able to disrupt this  
14 terrorist activity.

15 Transcript, HPSCI Hearing, June 18, 2013, at 9-10. (A copy of the transcript of that  
16 hearing is attached hereto as Exhibit 2).

17 Later in that same session, during the question and answer period, Deputy  
18 Director Joyce confirmed that the case to which he had referred was *this* case: *United*  
19 *States v. Moalin*, and that the individual who was the subject of the initial (closed)  
20 investigation, and whose phone records had been the subject of Section 215 collection and  
21 storage, was Mr. Moalin. Asked by Rep. Mac Thornberry (R-Tex.) to describe the Moalin  
22 case further, Gen. Keith Alexander (USA), NSA’s Director, deferred to Deputy Director  
23 Joyce, “because the actual guys who actually do all the work when we provide it is the FBI  
24 and get [the description] exactly right.” *Id.*, at 18 (Exhibit 2).

25 As a result, Deputy Director Joyce explained that  
26 It was a(n) investigation after 9/11 that the FBI conducted. We  
27 conducted that investigation and did not find any connection to  
28 terrorist activity. Several years later, under the 215 business  
record provision, the NSA provided us a telephone number only  
in San Diego that had indirect contact with an extremist outside  
the United States. We served legal process to identify who was  
the subscriber to this telephone number. We identified that  
individual. We were able to, under further investigation and  
electronic surveillance that we applied specifically for this U.S.  
person with the FISA Court, we were able to identify co-  
conspirators, and we were able to disrupt this terrorist activity.

1 *Id.*, at 18-19 (Exhibit 2).<sup>4</sup>

2 Four weeks later, at a July 18, 2013, address at the Aspen Security Forum in  
3 Aspen, Colorado, Gen. Alexander repeated that same account of this case:

4 . . . so from some information we got in Somalia, we saw some –  
5 we looked at a phone number, we said we know this is  
6 associated with *al Qaeda*, we looked at that phone number and  
7 we saw it touched a phone number in San Diego. And [Deputy  
8 Director] Joyce . . . was the one who said that was [Basaaly  
9 Moalin] case that they had started in 2003 but didn't have  
10 enough information to go up on. In 2007, we saw him talking to  
11 a facilitator in Somalia. We passed – all we have is the number.  
12 We don't know who it – a nine-digit number [or] ten-digit  
13 number. We pass that – I guess they're ten digits – we're going  
14 to be accurate – a 10-digit number to them. And they look at  
15 that and they go, ooh, this is [Basaaly Moalin]. They look up  
16 and said, four years ago we had a case. They reopened the case.

17 Transcript, July 18, 2013, Aspen Security Forum, Gen. Keith Alexander, at 5. (A copy of  
18 that transcript is attached hereto as Exhibit 3). *See also* Transcript, July 31, 2013, Black  
19 Hat USA 2013 Conference, Las Vegas, Nevada, Gen. Keith Alexander, at 3-4. (A copy of  
20 that transcript is attached hereto as Exhibit 4).<sup>5</sup>

---

21 <sup>4</sup> *See also* Marshall Curtis Erwin and Edward C. Liu, *NSA Surveillance*  
22 *Leaks: Background and Issues for Congress*, Congressional Research Service,  
23 July 2, 2013, R43134, at 11, available at [http://www.fas.org/sgp/crs/intel/](http://www.fas.org/sgp/crs/intel/R43134.pdf)  
24 [R43134.pdf](http://www.fas.org/sgp/crs/intel/R43134.pdf) (“**Basaaly Saeed Moalin**: NSA, using phone records pursuant to *215*  
25 *authorities*, provided the FBI with a phone number for an individual in San Diego  
26 who had indirect contacts with extremists overseas. The FBI identified the  
27 individual as [Mr. Moalin] and determined that he was involved in financing  
28 extremist activity in Somalia”) (emphasis in original) (footnotes omitted).

<sup>5</sup> At the Black Hat conference, Gen Alexander recounted that

23 we gave [the FBI the California telephone number] in  
24 2007. In 2004, they had ordered an investigation on that  
25 individual, but did not have enough information to open  
26 a full field investigation, so they closed that investigation  
27 down. In 2007, with the number we gave them, they had  
28 enough information. They take that number, and now  
their portion of this is they can take a national security  
(clip?), find out who that number belongs to, and they  
found out it was Basaaly Moalin. They can then, with

1 Deputy Director Joyce, appearing before the Senate Judiciary Committee July  
2 31, 2013, reiterated during his testimony the genesis and chronology of the investigation  
3 in this case:

4 another instance when we used the business record 215  
5 program, as Chairman – Leahy mentioned, [Basaaly Moalin].  
6 So, initially, the FBI opened a case in 2003 based on a tip. We  
7 investigated that tip. We found no nexus to terrorism and closed  
8 the case.

9 In 2007, the NSA advised us, through the business record 215  
10 program, that a number in San Diego was in contact with an Al-  
11 Shabaab in East Al Qaida – East – Al Qaida East Africa member  
12 in Somalia. We served legal process to identify that  
13 unidentified phone number. We identified [Mr. Moalin].

14 Transcript, July 31, 2013, Senate Judiciary Committee, Deputy Director Sean Joyce, at 14.

15 A copy of the transcript is attached hereto as Exhibit 5.

16 In addition to the recent disclosures, the 3500 material for the government’s  
17 linguist, Liban Abdirahman, at GA-ABDIRAHMAN-000006 (and attached as Exhibit 6  
18 hereto), includes a January 24, 2008, e-mail from a redacted source (probably FBI Special  
19 Agent Michael C. Kaiser, the case agent) that states, “We just heard from another agency  
20 that Ayrow tried to call Basaaly today, but the call didn’t go through.” As noted **post**, that  
21 raises the additional question whether Mr. Moalin was subject to other means of  
22 interception, *i.e.*, Section 702 (FAA §1881a), conducted by NSA even while the FBI’s  
23 FISA wiretap was underway.

24  
25 probable cause, get a [FISA] warrant. NSA only has the  
26 fact of a number. FBI could take that, see where it  
27 connects to, use a national security letter and the legal  
28 authorities given to them to take the next step.

29 Transcript, July 31, 2013, Black Hat USA 2013 Conference, Las Vegas, Nevada,  
30 Gen. Keith Alexander, at 3-4 (Exhibit 4).

## ARGUMENT

1  
2 **I. *The NSA's Interception and/or Collection of Data Related to***  
3 ***Mr. Moalin's Electronic Communications, or Any Aspect of the***  
4 ***Communications Themselves, Violated the First and Fourth***  
5 ***Amendments, FISA, or Other Claimed Statutory Authority***

6 Both Section 215 (50 U.S.C. §1861) and Section 702 (50 U.S.C. §1881a) – to  
7 the extent either or both were employed to conduct electronic surveillance on Mr. Moalin,  
8 and/or to collect and store or intercept his communications – are unconstitutional as  
9 applied to Mr. Moalin in this case.

10 The various means by which those provisions violate FISA itself, as well as  
11 the First and Fourth Amendments, is treated most comprehensively in papers filed by the  
12 American Civil Liberties Union in two separate lawsuits instituted with respect to those  
13 two sections. In *Amnesty International USA, et al. v. Clapper*, 08 Civ. 06259 (JGK)  
14 (S.D.N.Y.), the plaintiffs challenged Section 702 (50 U.S.C. §1881a) in a civil declaratory  
15 judgment action. Ultimately, the Supreme Court ordered dismissal of that action because  
16 plaintiffs therein lacked standing. *See Clapper v. Amnesty International USA*, \_\_\_ U.S.  
17 \_\_\_, 133 S. Ct. 1138 (2013).

18 In *American Civil Liberties Union, et al. v. Clapper*, 13 Civ. 03994 (WHP)  
19 (S.D.N.Y.), the plaintiffs have challenged the use of Section 215 (50 U.S.C. §1861) as  
20 described in the recent disclosures by Mr. Snowden and confirmed by government  
21 officials and documents. That action remains pending.

22 Rather than simply repeat the comprehensive and compelling statutory and  
23 constitutional analysis performed in ACLU's papers, defendants respectfully incorporate  
24 them by reference herein and adopt them from the following pleadings in those cases: (a)  
25 in *Amnesty International USA*, Docket #7, at 15-53 (attached hereto as Exhibit 7); and (b)  
26 in *ACLU*, Docket # 26, at 8-36 (attached hereto as Exhibit 8).

27 However, this motion will set forth some of the factual background with  
28 respect to each section to provide sufficient context, and will also discuss certain Fourth  
Amendment principles that are not addressed in the ACLU's briefs.

1                   **A. Collection and Storage Via Section 215 of**  
 2                   **the USA PATRIOT Act (50 U.S.C. §1861)**

3                   **1. The Origins and Evolution of Section 215 (50 U.S.C. §1861)**

4                   In enacting FISA in 1978, Congress created the Foreign Intelligence  
 5 Surveillance Court (“FISC”) and empowered it to grant or deny government applications  
 6 for surveillance orders in foreign-intelligence investigations. *See* 50 U.S.C. § 1803(a).  
 7 The FISC meets in secret, generally hears argument only from the government, and rarely  
 8 publishes its decisions. *See, e.g.*, FISC R. P. 17(b), 62. *See also*  
 9 <http://www.uscourts.gov/uscourts/rules/FISC2010.pdf>.

10                   Section 215 (18 U.S.C. §1861), was originally added to FISA in 1998. *See*  
 11 50 U.S.C. §§1861-1862 (2000 ed.). In its initial form, it permitted the government to  
 12 compel the production of certain records in foreign-intelligence or international-terrorism  
 13 investigations from common carriers, public-accommodation facilities, storage facilities,  
 14 and vehicle rental facilities. *Id.* at §1862 (2000 ed.). The government was required to  
 15 include in its application to the FISC “specific and articulable facts giving reason to  
 16 believe that the person to whom the records pertain[ed] [was] a foreign power or an agent  
 17 of a foreign power.” *Id.*

18                   The USA PATRIOT Act and several successor bills modified that provision  
 19 in several respects.<sup>6</sup> In its current form, the statute – commonly referred to as Section 215  
 20 – allows the government to obtain an order requiring the production of “any tangible  
 21 things” upon a “showing that there are reasonable grounds to believe that the tangible  
 22 things sought are relevant to an authorized investigation . . . (other than a threat assessment) . .  
 23 . to obtain foreign intelligence information not concerning a United States person or to  
 24 protect against international terrorism or clandestine intelligence activities.” *Id.*

---

25  
 26                   <sup>6</sup> The “PATRIOT Act” is the name customarily used to refer to the Uniting  
 27 and Strengthening America by Providing Appropriate Tools Required to Intercept  
 28 and Obstruct Terrorism Act of 2001, Pub. L. 107-56. *See also* Intelligence  
 Authorization Act for Fiscal Year 2002, Pub. L. 107-108 (2001); USA PATRIOT  
 Improvement and Reauthorization Act of 2005, Pub. L. 109-177 (2006).

1 §1861(b)(2)(A). The provision deems certain kinds of tangible things “presumptively  
2 relevant.”<sup>7</sup>

3 While the amendments to this provision expanded the government’s  
4 investigative power, that expansion was not without limits. Language added by the Patriot  
5 Act prohibits the government from using the provision to obtain tangible things that could  
6 not be obtained through analogous mechanisms. It states: “An order under this subsection  
7 . . . may only require the production of a tangible thing if such thing can be obtained with  
8 a subpoena duces tecum issued by a court of the United States in aid of a grand jury  
9 investigation or with any other order issued by a court of the United States directing the  
10 production of records or tangible things.” *Id.*, §1861(c)(2)(D).

11 Until recently, the public knew little about the government’s use of Section  
12 215. In 2011, however, Senators Ron Wyden and Mark Udall, both of whom sit on the  
13 Senate Select Committee on Intelligence, stated publicly that the government had adopted  
14 a “secret interpretation” of Section 215, and predicted – quite correctly now in hindsight–  
15 that Americans would be “stunned,” “angry,” and “alarmed” when they learned of it.<sup>8</sup>

16 Their efforts to make more information available to the public, however,  
17 were largely unsuccessful, as were parallel efforts under the Freedom of Information Act.  
18 Ordinary citizens who wanted to understand the government’s surveillance policies were  
19 entirely reliant on the government’s own statements about them, and those statements were  
20 sometimes misleading or false. *See, e.g.*, Glen Kessler, “James Clapper’s ‘Least  
21 Untruthful’ Statement to the Senate”, *Wash. Post*, June 12, 2013, available at

---

22  
23 <sup>7</sup> *See* 50 U.S.C. § 1861(b)(2)(A) (deeming tangible things “presumptively  
24 relevant to an authorized investigation” if they pertain to “a foreign power or an  
25 agent of a foreign power;” “the activities of a suspected agent of a foreign power  
26 who is the subject of such authorized investigation;” or “an individual in contact  
with, or known to, a suspected agent of a foreign power who is the subject of such  
authorized investigation”).

27  
28 <sup>8</sup> 157 Cong. Rec. S3386 (daily ed. May 26, 2011) (statement of Sen. Ron  
Wyden); 157 Cong. Rec. S3389 (daily ed. May 26, 2011) (statement of Sen. Mark  
Udall).

1 <http://wapo.st/170VVSu> (discussing statement by the Director of National Intelligence  
2 indicating, falsely, that government was not collecting information about millions of  
3 Americans).

## 4 **2. *The NSA's Mass Call-Tracking Program***

5 In its June 5, 2013, edition, *The Guardian* disclosed a previously secret FISC  
6 order, labeled a "Secondary Order," directing Verizon Business Network Services  
7 ("Verizon") to produce to the NSA "on an ongoing daily basis . . . all call detail records or  
8 'telephony metadata'" relating to every domestic and international call placed on its  
9 network between April 25, 2013 and July 19, 2013.<sup>9</sup> The Secondary Order specified that  
10 telephony metadata includes, for each phone call, the originating and terminating  
11 telephone number as well as the call's time and duration. Secondary Order at 2. On the  
12 day the Secondary Order expired, the Director of National Intelligence issued a statement  
13 indicating that the FISC had renewed it. Office of the Dir. of Nat'l Intelligence, *Foreign*  
14 *Intelligence Surveillance Court Renews Authority to Collect Telephony Metadata* (July 19,  
15 2013), <http://1.usa.gov/12ThYIT>.

16 The government has disclosed that the Secondary Order was issued as part of  
17 a broader program that has been in place for seven years that involves the collection of  
18 information about virtually every phone call, domestic and international, made or received  
19 in the United States. *Administration White Paper: Bulk Collection of Telephony Metadata*  
20 *Under Section 215 of the USA PATRIOT Act*, (Aug. 9, 2013), <http://bit.ly/15ebL9k>  
21 ("White Paper"); Dep't of Justice, Report on the National Security Agency's Bulk  
22 Collection Programs for USA PATRIOT Act Reauthorization (Feb. 2, 2011),

---

23  
24 <sup>9</sup> Secondary Order at 2, *In re Application of the FBI for an Order Requiring*  
25 *the Production of Tangible Things from Verizon Bus. Network Servs., Inc. on*  
26 *Behalf of MCI Commc'n Servs., Inc. d/b/a Verizon Bus. Servs.*, No. BR 13-80  
27 (FISA Ct. Apr. 25, 2013)) ("Secondary Order"). Within the days after *The*  
28 *Guardian* disclosed the Secondary Order, DNI Director Clapper acknowledged its  
authenticity. See Office of the Dir. of Nat'l Intelligence, *DNI Statement on Recent*  
*Unauthorized Disclosures of Classified Information* (June 6, 2013),  
<http://1.usa.gov/13jwuFc>.

1 <http://1.usa.gov/1cdFJ1G>. The Secondary Order to Verizon was issued pursuant to a  
2 “Primary Order” that the government has now released and that sets out procedures the  
3 NSA must follow to “query” telephony metadata collected under the Secondary Order.<sup>10</sup>

4 The Primary Order and the administration’s White Paper explain how the  
5 government analyzes and disseminates information housed in the massive database  
6 assembled by the call-tracking program. Specifically, the documents indicate that the NSA  
7 is permitted to query this database when a “designated approving official” at the NSA  
8 determines that “there are facts giving rise to a reasonable, articulable suspicion (RAS)  
9 that the selection term to be queried is associated with” a “foreign terrorist organization.”  
10 Primary Order at 7.<sup>11</sup> The NSA is permitted to review not just telephony metadata  
11 pertaining to the NSA’s specific target, but also telephony metadata pertaining to  
12 individuals as many as three degrees removed from that target.

13 Under the FISC’s order, the NSA may also obtain information concerning  
14 second and third-tier contacts of the identifier (also referred to as “hops”). The first “hop”  
15 refers to the set of numbers directly in contact with the initial or “seed” identifier. The  
16 second “hop” refers to the set of numbers found to be in direct contact with the first “hop”  
17 numbers, and the third “hop” refers to the set of numbers found to be in direct contact with  
18 the second “hop” numbers. White Paper at 3–4.

19 Even assuming, conservatively, that each person communicates by telephone  
20 with forty different people, an analyst who accessed the records of everyone within three  
21 hops of an initial target would have accessed records concerning more than two million  
22

---

23 <sup>10</sup> Primary Order at 3, 6–11, *In re Application of the FBI for an Order*  
24 *Requiring the Production of Tangible Things from [Redacted]*, No. BR 13-80  
25 (FISA Ct. Apr. 25, 2013)) (“Primary Order”).

26 <sup>11</sup> The government has acknowledged that the NSA has violated the Primary  
27 Order’s restrictions on multiple occasions. White Paper at 5 (“[s]ince the  
28 telephony metadata collection program under Section 215 was initiated, there have  
been a number of significant compliance and implementation issues that were  
discovered as a result of DOJ and ODNI reviews and internal NSA oversight”).

1 people. The government has disclosed that the NSA conducted queries on approximately  
2 300 selectors in 2012 alone. White Paper at 4.

3 The NSA stores the information collected under the program for five years.<sup>12</sup>  
4 Its collection of telephony metadata continues “on an ongoing daily basis.” Secondary  
5 Order at 2.

6 **B. *The NSA’s Interceptions Via Section 702 (50 U.S.C. §1881a)***

7 The historical background of Section 702 (50 U.S.C. §1881a) is set forth in  
8 detail in Exhibit 7, at 3-10, and is adopted and incorporated by reference herein. Before  
9 passage of the FAA, FISA generally foreclosed the government from engaging in  
10 “electronic surveillance” without first obtaining an individualized and particularized order  
11 from the FISC. The government was required to submit an application that identified or  
12 described the target of the surveillance; explained the government’s basis for believing  
13 that “the target of the electronic surveillance [was] a foreign power or an agent of a  
14 foreign power;” explained the government’s basis for believing that “each of the facilities  
15 or places at which the electronic surveillance [was] directed [was] being used, or [was]  
16 about to be used, by a foreign power or an agent of a foreign power;” described the  
17 procedures the government would use to “minimiz[e]” the acquisition, retention, and  
18 dissemination of non-publicly available information concerning U.S. persons; described  
19 the nature of the foreign intelligence information sought and the type of communications  
20 that would be subject to surveillance; and certified that a “significant purpose” of the  
21 surveillance was to obtain “foreign intelligence information.” *Id.* § 1804(a) (2006).

22 “Foreign intelligence information” was defined broadly (and is still defined  
23 broadly) to include, among other things, information concerning terrorism, national  
24 security, and foreign affairs, and the FISC could issue such an order only if it found, *inter*

---

25  
26 <sup>12</sup> See Dep’t of Justice, *Report on the National Security Agency’s Bulk*  
27 *Collection Programs for USA PATRIOT Act Reauthorization* 4 (Feb. 2, 2011),  
28 <http://1.usa.gov/1cdFJ1G>; Siobhan Gorman & Julian E. Barnes, “Officials: NSA  
Doesn’t Collect Cellphone-Location Records,” *Wall St. J.*, June 16, 2013,  
available at <http://on.wsj.com/13MnSsp>.

1 *alia*, “probable cause to believe that the target of the electronic surveillance [was] a  
2 foreign power or an agent of a foreign power,” *id.* § 1805(a)(2)(A); and that “each of the  
3 facilities or places at which the electronic surveillance [was] directed [was] being used, or  
4 [was] about to be used, by a foreign power or an agent of a foreign power,” *id.* §  
5 1805(a)(2)(B).

6 In August 2007, Congress enacted the Protect America Act, Pub. L. No. 110-  
7 55 (2007). The Act expanded the executive’s surveillance authority and provided  
8 legislative sanction for surveillance that the President had previously been conducting  
9 since 2001 under the warrantless Terrorist Surveillance Program (“TSP”).

10 However, due to a “sunset” provision under which the amendments enacted  
11 within the Protect America Act ceased to have effect on February 17, 2008, Congress  
12 passed permanent revisions to FISA through the FAA, which President Bush signed into  
13 law July 10, 2008. While leaving FISA in place insofar as communications *known* to be  
14 purely domestic are concerned, the FAA revolutionized the FISA regime by allowing the  
15 mass acquisition of U.S. citizens’ and residents’ international telephone and e-mail  
16 communications.

17 Under section 702(a) (50 U.S.C. §1881a(a)), the Attorney General and DNI  
18 can “authorize jointly, for a period of up to one year from the effective date of the  
19 authorization, the targeting of persons reasonably believed to be located outside the United  
20 States to acquire foreign intelligence information.”

21 While the FAA prohibits the government from, *inter alia*, “intentionally  
22 target[ing] any person known at the time of the acquisition to be located in the United  
23 States,” *id.* § 702(b)(1), an acquisition authorized under section 702(a) (50 U.S.C.  
24 §1881a(a)) may encompass the international communications of U.S. citizens and  
25 residents. Indeed, the Attorney General and the DNI may authorize a mass acquisition  
26 under section 702(a) even if *all* communications to be acquired under the program  
27 originate or terminate inside the United States.

28 The FAA does not require the government to demonstrate to the FISC that its  
surveillance targets are foreign agents, engaged in criminal activity, or connected even

1 remotely with terrorism. Indeed, the statute does not require the government to identify its  
2 surveillance targets at all. Moreover, the statute expressly provides that the government's  
3 certification is not required to identify the facilities, telephone lines, e-mail addresses,  
4 places, premises, or property at which its surveillance will be directed. FAA §702(g)(4)  
5 (50 U.S.C. §1881a(g)(4)).

6 Thus, the government may obtain a mass acquisition order without  
7 identifying the people (or even the group of people) to be surveilled; without specifying  
8 the facilities, places, premises, or property to be monitored; without specifying the  
9 particular communications to be collected; without obtaining individualized warrants  
10 based on criminal or foreign intelligence probable cause; and without making even a prior  
11 administrative determination that the acquisition relates to a particular foreign agent or  
12 foreign power.

13 A single mass acquisition order may be used to justify the surveillance of  
14 communications implicating thousands or even millions of U.S. citizens and residents.  
15 Equally striking is the Act's failure to place meaningful limits on the government's  
16 retention, analysis, and dissemination of information that relates to U.S. citizens and  
17 residents. While the Act requires the government to adopt "minimization procedures" that  
18 are "reasonably designed . . . to minimize the acquisition and retention, and prohibit the  
19 dissemination of nonpublicly available information concerning unconsenting United  
20 States persons," the statute contemplates minimization procedures that are generic and  
21 programmatic, rather than tailored to the surveillance of individualized targets.

22 Moreover, the statute does not prescribe specific minimization procedures,  
23 does not give the FISA court any authority to oversee the implementation of the  
24 procedures, and specifically allows the government to retain and disseminate information  
25 – including information relating to U.S. citizens and residents – if the government  
26 concludes that it is "foreign intelligence information." FAA § 702(e) [referencing 50  
27 U.S.C. §§1801(h)(1) & 1821(4)(A)]. Nothing in the Act forecloses the government from  
28 compiling databases of such "foreign intelligence information" and searching those  
databases for information about specific U.S. citizens and residents. Again, the statute

1 defines the phrase “foreign intelligence information” exceedingly broadly.

2 The role of the FISC in authorizing and supervising surveillance conducted  
3 under the FAA is “narrowly circumscribed.” *In re Proceedings Required by § 702(i) of*  
4 *the FISA Amendments Act of 2008*, No. Misc. 08-01, slip op. at 3 (FISA Ct. Aug. 27,  
5 2008) (internal quotation marks omitted). The FISC is required to issue a mass acquisition  
6 order if it finds that the government’s certification “contains all the required elements” and  
7 that the “targeting and minimization procedures” are consistent with the requirements of  
8 the statute and the Fourth Amendment. FAA § 702(i)(3)(A) (50 U.S.C. §1881(i)(3)(A)).

9 The FISC does not consider individualized and particularized surveillance  
10 applications, does not make individualized probable cause determinations, and does not  
11 supervise the implementation of the government’s targeting or minimization procedures.  
12 Moreover, even if the FISC rejects the government’s certification or procedures, the  
13 government “may continue” its surveillance activities during the pendency of any appeal  
14 or further court proceedings. *Id.*, §702(i)(4)(B) (50 U.S.C. §1881(i)(4)(B)). The FAA  
15 thereby permits the government to continue its surveillance activities even if the FISC has  
16 concluded that those activities are inconsistent with the statute or are unconstitutional.

17 **C. *Applying the Statutory and Constitutional***  
18 ***Analysis to Mr. Moalin and This Case***

19 **1. *Mr. Moalin Was Subject to the Ultimate “Big Brother”***  
20 ***Abuse of the NSA’s Untrammelled License to Conduct***  
21 ***Electronic Surveillance and Collection***

22 Here, the worst-fears nightmare electronic surveillance/metadata collection  
23 scenario has occurred: a U.S. citizen – Mr. Moalin – located *in the U.S.* was subject to an  
24 initial investigation that U.S. law enforcement and intelligence officials acknowledge did  
25 not yield evidence of “links to terrorism,” yet information collected about his electronic  
26 communications, *i.e.*, his telephone number, was nevertheless stored in a massive database  
27 and provided by NSA to the FBI four years later for solely retrospective use. That use  
28 lead directly to targeted FISA electronic surveillance (which U.S. officials concede could  
not have been authorized without that stored information) and, ultimately, this indictment  
and conviction.

1 Thus, despite the conclusion that Mr. Moalin had not broken any laws, or had  
2 any “nexus” or “links to terrorism,” or “connection to terrorist activity,” his information,  
3 absent probable cause, remained “seized” by the government for unfettered use  
4 indefinitely. This scenario manifests precisely the most acute concerns articulated with  
5 respect to the scope and duration of NSA collection and interception: a perpetual database  
6 on persons cleared of wrongdoing, unhinged from any standard designed to hold  
7 intelligence-gathering accountable to the Fourth or First Amendments.

8 **2. *The Section 215 Collection and Storage Lacked the Requisite***  
9 ***“Particularity” and Constituted an Impermissible “General Warrant”***

10 In addition to the constitutional infirmities detailed in Exhibit 8, the lack of  
11 any specificity in the standards governing the collection and/or storage of information  
12 related to Mr. Moalin pursuant to Section 215 (50 U.S.C. §1861) renders it invalid as a  
13 “general warrant,” and/or lacking in the necessary “particularity” the Fourth Amendment  
14 demands.

15 The Fourth Amendment requires “particularity” – specifically, that language  
16 in the warrant, or in supporting documents specifically incorporated by reference,  
17 “particularly describ[es] the *place to be searched, and the persons or things to be seized.*”  
18 *See Groh v. Ramirez*, 540 US 551, 557 (2004) (emphasis added); *see also United States v.*  
19 *White*, 401 US 745, 758 (1971) (“wiretapping is a search and seizure within the meaning  
20 of the Fourth Amendment and therefore must meet its requirements,” including  
21 particularity).

22 Underlying the particularity requirement in the Fourth Amendment is the  
23 abhorrence for “general warrants” and “writs of assistance,” the language of which was so  
24 broad and vague as to grant practically unlimited discretion to authorities to search  
25 locations and seize people and things. *Steagald v. United States*, 451 US 204, 220 (1981)  
26 (“the general warrant specified only an offense” and “the writs of assistance . . . noted only  
27 the object of the search – any uncustomed goods”); *see also Boyd v. United States*, 116  
28 U.S. 616, 625-30 (1886).

As the Ninth Circuit has explained, the purpose of the particularity

1 requirement, in addition to vindicating the staunch opposition to the practices of a  
2 tyrannical government, is to prevent “a general exploratory rummaging in a person’s  
3 belongings.” *United States v. Sears*, 411 F.3d 1124, 1127 (9th Cir. 2005), *quoting*  
4 *Coolidge v. New Hampshire*, 403 US 443, 467 (1971). In addition, as the Court in *Sears*  
5 elaborated, specificity in a warrant permits the individual who is the subject of the search  
6 and seizure to be “assure[d] . . . of the lawful authority of the executing officer, his need to  
7 search, and the limits of his power to search.” *Id.*, *quoting United States v. Chadwick*, 433  
8 US 1, 9 (1977).

9 In fact, the Ninth Circuit has held expressly that particularity in a warrant  
10 discourages confrontation between the officers and the individual searched, and ensures  
11 that the individual searched has the ability to prevent a violation by challenging any  
12 deviation from the authorized scope of the search and seizure. *Id.*, *citing Ramirez v. Butte-*  
13 *Silver Bow County*, 298 F.3d 1022, 1027 (9th Cir. 2002) (as amended).

14 In order for the particularity requirement to be met in the Ninth Circuit, “the  
15 warrant must make clear to the executing officer exactly what it is that he or she is  
16 authorized to search for and seize.” *In re Grand Jury Subpoenas Dated Dec. 10, 1987*,  
17 926 F.2d 847, 857 (9th Cir. 1991). The detail necessary varies depending on “the  
18 particular circumstances and the nature of the evidence sought.” *United States v. Adjani*,  
19 452 F.3d 1140, 1147 (9th Cir. 2006).

20 For instance, descriptions of “generic categories of items” do not violate the  
21 Fourth Amendment when a “more precise description of the items subject to seizure is not  
22 possible.” *United States v. Spilotro*, 800 F.2d 959, 963 (9th Cir. 1986). But when  
23 descriptions are so imprecise that distinguishing between valid and invalid searches or  
24 seizures “require[s] police to exceed their expertise,” warrants have been declared invalid  
25 for failing to meet the particularity requirement. *United States v. McLaughlin*, 851 F.2d  
26 283, 286 (9th Cir. 1988).

27 When a warrant lacking in sufficient particularity has produced evidence  
28 used against an individual, the Ninth Circuit has adopted a “doctrine of severance,” which  
permits the court to preserve the portions of the warrant untainted by the lack of

1 particularity, and suppress “[o]nly those articles seized pursuant to the invalid portions  
2 need be suppressed.” *Sears*, 411 F.3d at 1129.

3 However, particularity is not met, and severability is not permissible, when  
4 “even the most specific descriptions . . . [were] fairly general and contained no time or  
5 subject matter limitations.” *Sears*, 411 F.3d at 1130, *citing United States v. Cardwell*, 680  
6 F.2d 75, 78–79 (9th Cir.1982). A complete failure to “specify any type of criminal activity  
7 or any type of evidence sought” would result in total suppression of evidence obtained  
8 pursuant to the warrant. *Id.*, *citing United States v. McGrew*, 122 F.3d 847 (9th Cir.  
9 1997).

10 Similar to the principle of particularity, a warrant must not be overbroad,  
11 requiring “that the scope of the warrant be limited by the probable cause on which the  
12 warrant is based.” *In re Grand Jury Subpoenas Dated Dec. 10, 1987*, 926 F.2d at 856-57.  
13 Although many of the opinions in the Ninth Circuit have conflated the two requirements to  
14 some extent, the Court has clarified that the warrant’s instructions, even if particularized,  
15 must also be “legal” in the sense that they are supported by “probable cause to seize the  
16 particular thing[s] named in the warrant.” *United States v. SDI Future Health, Inc.*, 568  
17 F.3d 684, 702 (9th Cir. 2009).

18 The breadth requirement is a language requirement, similar to particularity,  
19 but which serves to ensure that searches and seizures do not extend beyond the scope of  
20 probable cause. *Spilotro*, 800 F.2d at 963 (“probable cause must exist to seize all the  
21 items of a particular type described in the warrant”). The breadth of a warrant limits the  
22 scope of search and seizure based on whether there is a “fair probability that contraband or  
23 evidence of a crime will be found in a particular place,” not whether the language of the  
24 warrant is sufficiently specific to remove inappropriate discretion from the searcher’s  
25 hands. *Id.* If the language of a warrant authorizes an official to exceed his legal authority  
26 (*i.e.*, to search and seize without probable cause), the warrant is invalid. *In re Grand Jury*  
27 *Subpoenas Dated Dec. 10, 1987*, 926 F.2d at 857, *citing Center Art Galleries- Hawaii,*  
28 *Inc. v. United States*, 875 F.2d 747 (9th Cir.1989) and *United States v. Washington*, 797  
F.2d 1461, 1472 (9th Cir.1986).

1                   **3. *The Likely (and Separate) January 2008 Interception of Mr. Moalin's***  
2                   ***Electronic Communications Violated the Fourth Amendment***

3                   The 3500 material related to the government's linguist (*see* Exhibit 6)  
4 demonstrates that Mr. Moalin's communications – in this instance, an incoming  
5 international telephone call – were intercepted not just via the dedicated FISA wiretap  
6 directed at his cellular telephone, but also concurrently, in real time, by “another  
7 agency's” independent means of interception.

8                   For the reasons set forth in the analysis within Exhibit 7, that interception,  
9 too, lacked any of the elements and protections that would satisfy the Fourth Amendment,  
10 and is therefore invalid. Moreover, to the extent that interception was conducted pursuant  
11 to Section 702 (18 U.S.C. §1881a), Mr. Moalin was not provided the required notice.  
12 *See post*, at 24.

13                   Thus, it appears that Mr. Moalin was subject to both of NSA's unlawful  
14 electronic surveillance programs, involving improper collection, storage, retrospective use,  
15 and interception of his electronic communications. Accordingly, Mr. Moalin renews his  
16 motion to dismiss the fruits of any such electronic surveillance, including that obtained  
17 from the FISA wiretap on his phone, and any evidence generated as a result. Also, in light  
18 of the government's failure to disclose to Mr. Moalin this other electronic surveillance, as  
19 well as the prospect that the FISA court was not apprised sufficiently of the background of  
20 the investigation, Mr. Moalin also renews his request for an evidentiary pursuant to  
21 *Franks v. Delaware*, 438 U.S. 154 (1978)

22                   **II. *The Government Failed to Provide A Complete or Accurate***  
23                   ***Response to Mr. Moalin's Motion to Suppress the Electronic***  
24                   ***Surveillance (and Search) Conducted Against Him Pursuant to FISA***

25                   The recent revelations regarding NSA collection and/or interception also  
26 raises the question whether the government – and that term is designed to include the  
27 government as a whole, including NSA– provided a complete or accurate response to Mr.  
28

1 Moalin's motion to suppress the electronic surveillance conducted against him.<sup>13</sup>

2 Certainly the interception/collection conducted pursuant to Section 215 (50  
3 U.S.C. §1861) was an indispensable factor in addressing the surveillance of Mr. Moalin's  
4 electronic communications. Yet the defense was not provided any notice of such  
5 interception/collection, or the role it played in the FISA process.<sup>14</sup>

6 In addition, the reference in the e-mail to Liban Abdirahman (the linguist)  
7 about "hear[ing] from another agency that Ayrow tried to call Basaaly today, but the call  
8 didn't go through[.]" (Exhibit 6 hereto), further demonstrates that the government's  
9 surveillance extended beyond ordinary FISA interception.

10 Also, as noted **ante**, in his pretrial motion to suppress, Mr. Moalin challenged  
11 any interceptions conducted pursuant to the FAA (50 U.S.C. §1881a), and to the extent  
12 any such interceptions occurred, they were subject to required notice to Mr. Moalin that  
13 was not provided. *See* 50 U.S.C. §1806(c), 1806(e) & 1881e(a).<sup>15</sup>

---

14  
15 <sup>13</sup> On making this assertion counsel are not necessarily suggesting that it is  
16 the prosecutors in this case that are at fault here. In fact, it may well be the case  
17 that the NSA deliberately kept this information from the prosecutors as it did the  
18 public. *See, e.g.,* John Shiffman and Kristina Cooke, "U.S. Directs Agents to  
19 Cover Up Program Used to Investigate Americans," *Reuters*, August 5, 2013,  
20 available at [http://www.reuters.com/article/2013/08/05/us-dea-sod-](http://www.reuters.com/article/2013/08/05/us-dea-sod-idUSBRE97409R20130805)  
21 [idUSBRE97409R20130805](http://www.reuters.com/article/2013/08/05/us-dea-sod-idUSBRE97409R20130805). The truth of the matter may well be that the NSA is  
22 deliberately misleading – if not outright lying – to the prosecutors. Particularly in  
23 light of these recent disclosures of abusive surveillance programs, Defendant's fair  
24 trial rights and rights to obtain exculpatory information should not be defeated by  
25 nuanced and one-sided statutory interpretation.

26 <sup>14</sup> To the extent such information was provided by the government to the  
27 Court *ex parte*, it merely underscores the need for disclosure to cleared counsel,  
28 *see post*, at POINT III, as defense counsel could have argued effectively the  
impact of that interception/collection on sufficiency and validity of the FISA  
application. It also would have enabled defense counsel to establish the  
exculpatory nature of the Section 215 interception/collection, and the need for  
discovery of the particulars involved in that interception/collection.

<sup>15</sup> In *Clapper v. Amnesty International USA*, \_\_\_ U.S. \_\_\_, \_\_\_, 133 S. Ct.  
1138, 1154-55 (2013), one of the reasons urged by the government and adopted by

1 In the alternative, the Court should order discovery and conduct an  
 2 evidentiary hearing to determine whether the government's response to Mr. Moalin's  
 3 motion to suppress was complete and accurate.

4 **III. *Cleared Defense Counsel Should Be Provided the Government's Response***  
 5 ***to Mr. Moalin's Motion to Suppress the Electronic Surveillance Pursuant***  
 6 ***to FISA, As Well As the Underlying FISA Applications, and Materials In***  
 7 ***Support Thereof, and the Court Should Revisit Its Review and Decisions***  
 8 ***with Respect to Any of the Government's Applications Made Pursuant to***  
 9 ***§4 of the Classified Information Procedures Act ("CIPA"), and Provide***  
 10 ***Those Submissions to Cleared Defense Counsel***

11 As noted *ante*, at 5-6, Mr. Moalin moved pretrial for disclosure of the FISA  
 12 applications and supporting materials filed therewith. He also moved for disclosure of the  
 13 government's CIPA §4 submissions, and the underlying material and information therein.  
 14 The recent revelations about NSA surveillance, and the government's convenient and self-  
 15 serving disclosure of the interception/collection related to Mr. Moalin – revealed not in the  
 16 course of a criminal prosecution laden with Due Process protections and concurrent  
 17 government obligations, but rather in the context of a calculated but clumsy attempt to  
 18 justify the NSA programs in the wake of the political controversy revelation of their  
 19 existence has generated – only reinforce the virtues of the adversary process, and the  
 20 inherent and *practical* unfairness of a system that denies even cleared defense counsel the  
 21 ability to advocate against the government's position.<sup>16</sup>

---

22 the Court to justify denying the plaintiffs in that case standing was because of the  
 23 confidence that the statutory and constitutional validity of FAA surveillance  
 24 would be adequately tested in the context of criminal prosecutions. Yet this case  
 25 demonstrates that such confidence was misplaced, as the criminal process does not  
 26 provide such opportunity in any genuine fashion, but instead merely repeats the  
 27 secret, one-sided proceedings by which the authority for the surveillance was  
 28 obtained.

<sup>16</sup> The Snowden NSA revelations have promoted the same adversarial  
 concerns in the context of the FISA Court itself. *See* Spencer Ackerman, "US  
 Senators Push for Special Privacy Advocate in Overhauled FISA Court", *The*  
*Guardian*, August 1, 2013, available at  
<http://www.theguardian.com/law/2013/aug/01/fisa-court-bill-us-senate>; Ezra  
 Klein, "A Radical Plan for Shaking Up the FISA Court", *Washington Post*, July 9,

1 The law permits disclosure to defense counsel, yet not a single court has ever  
2 ordered such production. If this case does not present the situation in which such  
3 disclosure is not merely proper, but *necessary*, then §§1806(f) & (g) might as well not  
4 exist at all – and the same can be said for the adversary process, and defense counsel, as a  
5 whole. If cleared defense counsel cannot be afforded access to materials so essential to  
6 the case, and which shed light on the evidence, and the government’s theory, in a manner  
7 otherwise hidden from the defense, what is the point of a lawyer for the defendant, for  
8 cross-examination, for a trial at all?

9 Under the circumstances, it cannot be suggested that Mr. Moalin has been  
10 provided his Sixth Amendment right to counsel, much less effective assistance thereof.  
11 Indeed, with respect to some of the most important issues in the case – that could  
12 categorically halt the prosecution altogether, or dramatically alter its evidentiary context –  
13 Mr. Moalin had, in reality, no lawyer at all.

14 This Memo of Law will not belabor the necessity of the adversary process in  
15 protecting the rights of the defendant, and in ultimately achieving justice as well as  
16 promoting confidence in the criminal justice system – *see* Docket #92, at 26-29, for an  
17 abbreviated treatment of the issue – but, as the Supreme Court recognized in *Alderman v.*  
18 *United States*, 394 U.S. 65 (1969) “[i]n our adversary system, it is enough for judges to  
19 judge. The determination of what may be useful to the defense can properly and  
20 effectively be made only by an advocate.” *Id.*, at 184; *see also Franks v. Delaware*, 438  
21 U.S. 154, 169 (1978) (permitting adversarial proceeding on showing of intentional  
22 falsehood in warrant affidavit because the magistrate who approves a warrant *ex parte*  
23 “has no acquaintance with the information that may contradict the good faith and  
24  
25  
26

27 2013, available at  
28 <http://www.washingtonpost.com/blogs/wonkblog/wp/2013/07/09/a-radical-plan-for-shaking-up-the-fisa-court/>.

1 reasonable basis of the affiant's allegations").<sup>17</sup>

2 In addition, while defense counsel have always been aware that they were  
3 operating at an insurmountable disadvantage by being denied access to the FISA  
4 applications or the underlying supporting documents (unlike any other situation in which  
5 the government seizes evidence pursuant to warrant), only recently has it been revealed  
6 that there exists a growing body of *law*, in the form of opinions by the Foreign Intelligence  
7 Surveillance Court ("FISC"), and the Foreign Intelligence Court of Review ("FISCR"),  
8 that are available to government counsel, but *not* to even cleared defense counsel.

9 Thus, unbeknownst to defense counsel, District Judge John D. Bates, Chief  
10 Judge of the FISC at the time, had issued an extraordinary opinion October 3, 2011, just  
11 before pretrial motions were filed in this case. Judge Bates excoriated NSA for exceeding  
12 its acquisition authority and making repeated misrepresentations to the FISC regarding  
13 NSA's activities during the very same time period in which Mr. Moalin's phone number  
14 was turned over to the FBI, and perhaps even when it was collected in the first place.

15 Judge Bates's language and concern is instructive for our own purposes here.  
16 For example, Judge Bates stated "[t]he court is troubled that the government's revelations  
17 regarding NSA's acquisition of Internet transactions mark the third instance in less than  
18 three years in which the government has disclosed a substantial misrepresentation

---

19  
20 <sup>17</sup> As the District Court in *United States v. Marzook*, 412 F. Supp.2d 913  
21 (N.D. Ill. 2006), explained in the context of deciding whether to close a  
22 suppression hearing to the public because of the potential revelation of classified  
information thereat,

23 [i]t is a matter of conjecture whether the court performs  
24 any real judicial function when it reviews classified  
25 documents in camera. Without the illumination provided  
26 by adversarial challenge and with no expertness in the  
27 field of national security, the court has no basis on which  
to test the accuracy of the government's claims.

28 *Id.*, at 921, quoting *Stein v. Department of Justice & Federal Bureau of  
Investigation*, 662 F.2d 1245, 1259 (7th Cir. 1981).

1 regarding the scope of a major collection program.” October 3, 2011, Memorandum  
2 Opinion, FISC, at 16 n. 14. A copy of the opinion is attached hereto as Exhibit 9.

3 While one example cited by Judge Bates is redacted,<sup>18</sup> another related to an  
4 NSA program that logged all domestic U.S. telephone calls. *Id.* Judge Bates also pointed  
5 out, referring to an earlier March 2009, FISC opinion (as yet undisclosed) that

6 the Court concluded that its authorization of NSA’s bulk  
7 acquisition of telephone call detail records from [REDACTED]  
8 in the so-called “big business records” matter “ha[d] been  
9 premised on a flawed depiction of how the NSA uses [the  
10 acquired] metadata,” and that “[t]his misperception by the FISC  
11 existed from the inception of its authorized collection in May  
12 2006, buttressed by repeated inaccurate statements made in the  
13 government’s submissions, and despite a government-devised  
14 and Court-mandated oversight regime.” Docket [REDACTED].  
15 Contrary to the government’s repeated assurances, NSA had  
16 been routinely running queries of the metadata using querying  
17 terms that did not mee the required standard for querying. The  
18 Court concluded that this requirement had been “so frequently  
19 and systematically violated that it can fairly be said that this  
20 critical element of the overall . . . regime has never functioned  
21 effectively.” *Id.*

22 *Id.* (Exhibit 9).

23 Judge Bates further noted that the government’s submissions in that  
24 proceeding made it clear that NSA had been acquiring Internet transactions even before  
25 the FISC’s first approval thereof, *id.*, at 17, adding that:

- 26 ● “for the first time, the government has now advised the Court that the  
27 volume and nature of the information it has been collecting is  
28 fundamentally different than what the Court had been led to believe.” *Id.*,  
at 28;
- “the Court is also unable to find that NSA’s targeting and minimization  
procedures, as the government proposes to implement them in connection  
with MCT’s [multi-communication transactions], are consistent with the  
Fourth Amendment.” *Id.*, at 29;

---

27 <sup>18</sup> The publicly disclosed version – released in connection with a Freedom  
28 of Information Act lawsuit – is redacted, and is the only version defense counsel  
possess (or have seen).

- 1 ● “NSA’s minimization procedures, as the government proposes to apply  
2 them to MCT’s as to which the ‘active user’ is not known to be a tasked  
3 selector, do not meet the requirements of 50 U.S.C. §1881a(e) with  
4 respect to retention[.]” *Id.*, at 80
- 5 ● “[t]he sheer volume of transactions acquired by NSA through its upstream  
6 collection is such that any meaningful review of the entire body of  
7 transactions is not feasible.” *Id.*, at 31;
- 8 ● “the Court cannot know for certain the exact number of wholly domestic  
9 communications acquired through this collection, nor can it know the  
10 number of non-target communications acquired or the extent to which  
11 those communications are to or from United States persons or persons in  
12 the United States.” *Id.*, at 31-32;
- 13 ● “[e]ven if the Court accepts the validity of conclusions derived from  
14 statistical analyses, there are significant hurdles in assessing NSA’s  
15 upstream collection . . . it is impossible to define with any specificity the  
16 universe of transactions that will be acquired by NSA’s upstream  
17 collection at any point in the future.” *Id.*, at 32;
- 18 ● “the actual number of wholly domestic communications acquired may still  
19 be higher in view of NSA’s inability conclusively to determine whether a  
20 significant portion of the MCT’s within its sample contained wholly  
21 domestic communications.” *Id.*, at 34-35; and
- 22 ● “the record shows that the government knowingly acquires tens of  
23 thousands of wholly domestic communications each year.” *Id.*, at 43.<sup>19</sup>

24 The repeated misrepresentations cited by Judge Bates in October 2011

25  
26 <sup>19</sup> See also Charlie Savage, “N.S.A. Said to Search Content of Messages to  
27 and From U.S.,” *The New York Times*, August 8, 2013, available at  
28 <<http://www.nytimes.com/2013/08/08/us/broader-sifting-of-data-abroad-is-seen-by-nsa.html?pagewanted=all>> (analyzing a document of internal NSA rules disclosed by Mr. Snowden).

1 are reminiscent of the FISC’s 2002 opinion in *In re All Matters Submitted to the Foreign*  
2 *Intelligence Surveillance Court*, 218 F. Supp. 2d 611, 620-21 (FISC), *rev’d on other*  
3 *grounds sub nom., In re Sealed Case*, 310 F.3d 717 (FISCR 2002),<sup>20</sup> in which the FISC, in  
4 its first opinion ever, reported that beginning in March 2000, the Department of Justice  
5 (hereinafter “DoJ”) had come “forward to confess error in some 75 FISA applications  
6 related to major terrorist attacks directed against the United States. The errors related to  
7 misstatements and omissions of material facts,” including:

- 8 ● “75 FISA applications related to major terrorist attacks directed against  
9 the United States” contained “misstatements and omissions of material  
10 facts.” 218 F. Supp. 2d at 620-21;
- 11 ● the government’s failure to apprise the FISC of the existence and/or status  
12 of criminal investigations of the target(s) of FISA surveillance. *Id.*; and
- 13 ● improper contacts between criminal and intelligence investigators with  
14 respect to certain FISA applications. *Id.*

15 According to the FISC, “[i]n March of 2001, the government reported similar  
16 misstatements in another series of FISA applications . . .” *Id.*, at 621. Nor were those  
17 problems isolated or resolved by those revelations. Instead, they proved persistent. A  
18 report issued March 8, 2006, by the DoJ Inspector General stated that the FBI found  
19 apparent violations of its own wiretapping and other intelligence-gathering procedures  
20 more than 100 times in the preceding two years, and problems appear to have grown more  
21 frequent in some crucial respects. *See Report to Congress on Implementation of Section*  
22 *1001 of the USA PATRIOT Act, March 8, 2006* (hereinafter “DoJ IG Report”), available  
23 at <http://www.usdoj.gov/oig/special/s0603/final.pdf>.

24 The report characterized some violations as “significant,” including wiretaps  
25 that were much broader in scope than authorized by a court (“over-collection”), and others

---

26  
27 <sup>20</sup> “FISCR” refers to the Foreign Intelligence Court of Review, which is the  
28 appellate court for the FISC, and is comprised of three federal Circuit judges. The  
FISCR’s 2002 decision in *In re Sealed Case* marked its first case since enactment  
of FISA in 1978.

1 that continued for weeks and months longer than authorized (“overruns”). *Id.*, at 24-25.<sup>21</sup>  
 2 FISA-related overcollection violations constituted 69% of the reported violations in 2005,  
 3 an increase from 48% in 2004. *See* DoJ IG Report, at 29. The total percentage of FISA-  
 4 related violations rose from 71% to 78% from 2004 to 2005, *id.*, at 29, although the  
 5 amount of time “over-collection” and “overruns” were permitted to continue before the  
 6 violations were recognized or corrected decreased from 2004 to 2005. *Id.*, at 25.

7 The lack of veracity catalogued in these two opinions is inevitable in a  
 8 system in which there is no opponent to dispute facts or hold opponents accountable for  
 9 misrepresenting facts, and in which the court lacks investigative authority or any practical,  
 10 meaningful means of oversight over the collection/storage/interception process. Indeed,  
 11 an internal May 2012 audit of NSA’s surveillance programs – among the documents  
 12 recently disclosed by Mr. Snowden – found that NSA violated privacy rules protecting  
 13 domestic U.S. communications 2,776 times in a one-year period. *See SID Oversight &*  
 14 *Compliance*, Quarterly Report, First Quarter Calendar Year 2012, May 3, 2012, available  
 15 at  
 16 <[http://www.documentcloud.org/documents/758651-1qcy12-violations.html#document/p1](http://www.documentcloud.org/documents/758651-1qcy12-violations.html#document/p12)  
 17 2>.

18 Unfortunately, in a system in which NSA and other intelligence organs are  
 19 free to misrepresent without challenge or accountability, little has changed except perhaps  
 20 NSA’s enhanced dexterity in abusing and manipulating the FISC and the FISA system as a  
 21 whole.

22 Defense counsel have always believed that contesting a motion without  
 23 access to the facts is untenable, but denial to both the facts *and* the law is unconscionable.

---

24  
 25 <sup>21</sup> The DoJ Inspector General’s report was not instigated by the government  
 26 itself. Rather, the publication of documents released to Electronic Privacy  
 27 Information Center (hereinafter “EPIC”) in Freedom of Information Act litigation  
 28 prompted the DoJ IG to use those and other documents as a basis for the report. In  
 preparing the report the IG reviewed only those 108 instances in which the FBI  
 itself reported violations to the Intelligence Oversight Board – a four-member  
 Executive Branch body that ordinarily does *not* submit its reports to Congress.

1 As a result of this vertical playing field, with the government at the apex and the defense  
2 at the bottom, a criminal defendant and his counsel are compelled to operate in a system in  
3 which the admissibility of evidence at the core of the government's case – in this case, in  
4 effect the *entirety* of the government's case – is decided on the basis of a secret body of  
5 facts *and* law to which even cleared defense counsel is denied access.<sup>22</sup>

6 The unfairness of such a system is manifested in the government's perfect  
7 record in FISA and CIPA §4 litigation. Being in complete and unilateral control of the  
8 contents of the facts and the law, is it any wonder that the government has prevailed each  
9 and every time? Such a system does not provide Due Process, or even approach it. If a  
10 U.S. citizen charged in another country were to be subjected to such a system, it would be  
11 the subject of bipartisan nationwide opprobrium. Yet it is not any more acceptable  
12 because it is happening here; instead, it is *less* tolerable.<sup>23</sup>

13 Thus, this case presents the manifest unfairness in which key evidence  
14 relating to the core of the government's case was withheld from the defense in the context  
15 of both the legal determination whether such evidence was obtained legitimately, as well  
16 as the factual context, in which the evidence fatally undercut the linchpin of the  
17 government's theory at trial.

---

18  
19 <sup>22</sup> That embargo on such important information and material renders  
20 defense counsel's security clearance entirely ineffectual, as it is not a factor with  
21 respect to gaining access to information essential to perhaps the critical legal and  
22 factual determination in the case.

23 <sup>23</sup> Regarding the FISC's *ex parte* proceedings, *The New York Times* reported  
24 that Geoffrey R. Stone, professor of constitutional law at the University of  
25 Chicago, "said he was troubled by the idea that the court is creating a significant  
26 body of law without hearing from anyone outside the government, forgoing the  
27 adversarial system that is a staple of the American justice system. 'That whole  
28 notion is missing in this process,' he said." Eric Lichtblau, "In Secret, Court  
Vastly Broadens Powers of N.S.A.," *The New York Times*, July 6, 2013, available  
at  
<[http://www.nytimes.com/2013/07/07/us/in-secret-court-vastly-broadens-powers-  
of-nsa.html?pagewanted=all](http://www.nytimes.com/2013/07/07/us/in-secret-court-vastly-broadens-powers-of-nsa.html?pagewanted=all)>.

1 Accordingly, it is respectfully submitted that the Court should order  
2 disclosure to cleared defense counsel the FISA applications and supporting materials, as  
3 well as the government's CIPA §4 submissions and underlying related documents, and  
4 revisit its CIPA §4 decisions with full participation by defense counsel consistent with the  
5 principles of the adversary system.<sup>24</sup>

6 **IV. The Government Failed to Provide Necessary Rule 16 Discovery**

7 The recent revelations regarding NSA collection and/or interception  
8 establishes that the government – and again that term is designed to include the  
9 government as a whole, including NSA – provided a complete or accurate response to Mr.  
10 Moalin's motion to suppress the electronic surveillance conducted against him.

11 In addition, the reference in the January 24, 2008, e-mail to Liban  
12 Abdirahman (the government's Somali linguist), from a redacted source (probably SA  
13 Michael C. Kaiser, the FBI case agent) that states, "We just heard from another agency  
14 that Ayrow tried to call Basaaly today, but the call didn't go through[.]" (Exhibit 6 hereto),  
15 further demonstrates that the government's surveillance extended beyond ordinary FISA  
16 interception.

17 Yet neither of those interceptions and/or collection of Mr. Moalin's  
18 communications, or data related thereto, was provided to Mr. Moalin as part of Rule 16  
19 discovery, even though they clearly are covered by Rule 16's disclosure obligations. For  
20 example, it is axiomatic that any items seized from the defendant, by any means, are  
21 discoverable. *See* Rule 16(a)(1)(E)(iii) (government must permit inspection of items if  
22 they were "obtained from or belong[] to the defendant"). In addition, Rule 16 also  
23 requires discovery of items "material to preparation of the defense." Rule 16(a)(1)(E)(i).

24 Also, here, the interception/seizure of his electronic communications, and  
25 data related thereto, constituted a seizure just as it would in the Title III context. *See* 18

---

26  
27 <sup>24</sup> *See* Hon. James G. Carr, Op-Ed, "A Better Secret Court," *The New York*  
28 *Times*, July 23, 2013, available at  
<[http://www.nytimes.com/2013/07/23/opinion/a-better-secret-court.html?ref=opinion&\\_r=1&](http://www.nytimes.com/2013/07/23/opinion/a-better-secret-court.html?ref=opinion&_r=1&)>.

1 U.S.C. §2518 (8)(d) & (9). The notion that such records obtained via either Section 215  
2 (§1861) or Section 702 (§1881) would or could be immune from discovery is simply  
3 without precedent or foundation.

4 Even if the government were to rely on CIPA §4 or Rule 16(d)(1) as a means  
5 of avoiding production, the exculpatory character of the interceptions or data (as explained  
6 **ante** in POINT III) would make them discoverable under both sections. Moreover, to the  
7 extent such vital information and materials were addressed in the government's CIPA §4  
8 application(s), that merely highlights the complete unfairness – and denial of Due Process  
9 – in denying cleared defense counsel access to such applications and the underlying  
10 information the government sought to exempt from discovery.

11 Also, the government cannot argue that the interception/collection was not  
12 related to this case (which might enable it to be non-discoverable under Rule 16 or CIPA  
13 §4). Here, the information and material go to the basis for the government's investigation,  
14 and the heart of its theory at trial, namely, whether Mr. Moalin was communicating  
15 directly with Aden Ayrow. For the same reason, and also because of their dubious  
16 legality, any “programmatically analytics” are also discoverable and should have been (and  
17 should now be) produced.

18 At the very least, production of that material and information would have  
19 enabled the defense to examine the telephone numbers Mr. Moalin called (or which called  
20 him), identify them, conduct an investigation, and use those results in cross-examination  
21 or the defense case (through either or both documents and witnesses).

22 As a result, it is respectfully submitted that the government's failure to  
23 discharge its Rule 16 obligations require a new trial, or, at the very least, disclosure of the  
24 information and material in question, and an evidentiary hearing.

25  
26  
27  
28

V. ***Congressional Testimony and Other Statements By FBI and NSA Officials Have Fatally Undermined Not Only the Essential Element of the Government's Theory at Trial, But Also Public Confidence In the Investigation and Prosecution of This Case***

As set forth *ante*, at 3, 4-5, the government based its case on trial on the assertion that Mr. Moalin was in direct communication with Aden Ayrow: that the "Sheikalow" on the intercepted telephone conversations was, in fact, Mr. Ayrow. Yet Deputy Director Joyce's admission that the contact Mr. Moalin had with a terrorist organization that instigated the second investigation of Mr. Moalin was *indirect* casts serious doubt on that position.

That raises at least the following critical questions:

1. was that *indirect* contact to the same telephone number(s) used by "Sheikalow," which would establish that even the government did not believe "Sheikalow" was Mr. Ayrow himself? and
2. was that *indirect* contact the same person as "Sheikalow," and therefore not Mr. Ayrow?
3. whose telephone number was it, and how was that person identified (and how was he deemed "connected" to a terrorist organization?)

Either way, the concession of *indirect* contact during the relevant time period – rather than *direct* contact with Mr. Ayrow – fatally undermines the government's theory.

In addition, the impact of the linguist's 3500 material is equally profound:

1. how did the other U.S. government agency know it was *Mr. Ayrow* who was attempting to contact Mr. Moalin in January 2008?
2. did that agency have Mr. Ayrow's telephone number?
3. was it different than the number(s) used by "Sheikalow"?
4. what was the number used by Mr. Ayrow during that intercepted attempted call?

Again, the information underlying that 3500 material could very well have torpedoed the government's theory entirely, and regardless of the answers, the government's failure to provide the defense with the information is indefensible and

1 inexcusable.

2 In addition, the manner in which Mr. Moalin remained – perhaps forever – on  
3 the government’s radar, leading to this investigation, has dramatically eroded public  
4 confidence in the fundamental fairness of the investigation and prosecution of this case,  
5 and its use as a justification for the most massive electronic surveillance, collection,  
6 storage, and interception programs in human history. *See, e.g.*, Max Fisher, “Is This  
7 \$8,500 Wire Transfer Really the NSA’s Best Case for Tracking Americans’ Phone  
8 Records?” *The Washington Post*, August 9, 2013, available at  
9 <[latimes.com/news/politics/la-pn-secret-nsa-surveillance-court-order-](http://latimes.com/news/politics/la-pn-secret-nsa-surveillance-court-order-20130731,0,1310703.story)  
10 [20130731,0,1310703.story](http://latimes.com/news/politics/la-pn-secret-nsa-surveillance-court-order-20130731,0,1310703.story)>; Ken Dilanian, “Public Gets First Look At Once-Secret  
11 Court Order on NSA Surveillance,” *Los Angeles Times*, July 31, 2013, available at  
12 [http://articles.latimes.com/2013/jul/31/news/la-pn-secret-nsa-surveillance-court-order-201](http://articles.latimes.com/2013/jul/31/news/la-pn-secret-nsa-surveillance-court-order-20130731)  
13 [30731](http://articles.latimes.com/2013/jul/31/news/la-pn-secret-nsa-surveillance-court-order-20130731) (“officials remained unable to come up with more than one relatively minor  
14 terrorism-financing case in which the phone records had proved instrumental”).<sup>25</sup>

15 Accordingly, it is respectfully submitted that the Court should grant  
16 defendants a new trial, order the government to disclose the underlying materials, and  
17 conduct the appropriate evidentiary hearings regarding the role of NSA, its use of the FAA  
18 and other surveillance programs, including Section 215 (50 U.S.C. §1861) in the  
19 investigation and prosecution of this case.

---

22 <sup>25</sup> The sanitizing of the origins of criminal investigations has already  
23 leached from the national security sphere and is poised to contaminate a much  
24 wider type of ordinary criminal prosecution, and involves concealment from not  
25 just the defense. *See, e.g.*, Shiffman and Cooke, “U.S. Directs Agents to Cover Up  
26 Program Used to Investigate Americans,” *Reuters*, August 5, 2013, available at  
27 <[http://www.reuters.com/article/2013/08/05/us-dea-sod-idUSBRE97409R201308](http://www.reuters.com/article/2013/08/05/us-dea-sod-idUSBRE97409R20130805)  
28 [05](http://www.reuters.com/article/2013/08/05/us-dea-sod-idUSBRE97409R20130805)> (“[a]lthough these case rarely involve national security issues, documents  
reviewed by Reuters show that law enforcement agents have been directed to  
conceal how such investigations truly begin – not only from defense lawyers but  
also sometimes from prosecutors and judges”).

1 **VI. *The Government Failed to Provide Mr. Moalin***  
2 ***Exculpatory Material and Information***

3 Requests for *Brady* material often occur in a partial vacuum: because the  
4 government possesses the information and materials, more often than not defendants can  
5 only propose subject matters of exculpatory material and information that might exist  
6 without firm knowledge of whether it, or in what form, it exists at all.

7 As a result, courts, too, are not usually in a position to identify exculpatory  
8 material and information with precision, and instead are limited to reminding the  
9 government of its obligation to provide *Brady* material, and deferring to the government's  
10 recognition of that duty.

11 However, here, defendants and the Court are now aware of specific  
12 *Brady* material that exists, but which the government did not produce, namely, the Section  
13 215 interception/collection and the underlying information related to the previously  
14 terminated investigation of Mr. Moalin (that likely contributed to the conclusions noted in  
15 the FIG Assessment).

16 While still unable to identify the exact form in which such exculpatory  
17 material and information exists, defendants can now to some extent articulate its nature:

18 (a) the reasons underlying the conclusion, at the end of the initial post-9/11  
19 investigation of Mr. Moalin, that he was not engaged in illegal conduct  
20 or linked to terrorism. Also, that earlier investigation likely yielded  
21 abundant if not conclusive evidence that Mr. Moalin was sending money  
22 to Somalia for humanitarian and other (family) purposes even before *al*  
23 *Shabaab* existed, and that he did not harbor anti-U.S. or pro-terrorist  
24 sympathies;<sup>26</sup>

25 (b) evidence that Mr. Moalin's contacts with *al Shabaab* that precipitated  
26 renewal of the investigation were *indirect*, and not directly with Mr.

---

27 <sup>26</sup> The FIG Assessment (Exhibit 1) was prepared in April 2009, while the  
28 initial investigation occurred years earlier (2003). As a result, the information  
from either might be in many ways distinct.

1 Ayrow;

2 (c) anything exculpatory generated by and during the earlier Anaheim  
3 investigation referred to in Ahmed Nasir’s PSR in which no charges were  
4 ever filed against Nasir; <sup>27</sup> and

5 (d) exculpatory information and material related to the FIG Assessment itself,  
6 which Mr. Moalin requested in his pretrial motions.

7 Of course, the government’s production – and its search for such materials  
8 and information – should not be limited to the items enumerated above, but should also  
9 include any other exculpatory material and information reviewed in the process (as the  
10 defense is still for the most part in a position of *not* knowing the specific nature and type  
11 of exculpatory information and material in the government’s possession).

12 **Conclusion**

13 For all the reasons set forth above, and in all papers previously submitted in  
14 this case, it is respectfully submitted that the Court should grant defendants’ Rule 33  
15 motion, and order anew trial, and/or compel the discovery demanded in this motion, and/or  
16 conduct the evidentiary hearings requested herein.

17 Dated: 5 September 2013  
New York, New York

18 Respectfully submitted,
