UNITED STATES DISTRICT COURT  
EASTERN DISTRICT OF CALIFORNIA

RALPH COLEMAN, et al.,  
Plaintiffs,  
v.  
EDMUND G. BROWN, JR., et al.,  
Defendants.

No. CIV. S-90-520 LKK/DAD (PC)

**ORDER**

In ongoing sequelae to defendants' January 7, 2013 motion to terminate this action (hereafter "termination motion")(ECF No. 4275), two additional motions brought by plaintiffs for enforcement of court orders and affirmative relief are before the court.<sup>1</sup> On May 9, 2013, plaintiffs filed a motion related to housing and treatment of mentally ill inmates placed in segregation units in California's prison system (ECF No. 4580). On May 29, 2013, plaintiffs filed a motion related to use of force and disciplinary measures against members of the plaintiff

---

<sup>1</sup> A third motion related to inpatient mental health care (ECF No. 4543) was filed by plaintiffs on April 11, 2013 and resolved by orders filed July 11, 2013 (ECF No. 4688) and December 10, 2013 (ECF No. 4951).

1 class (ECF No. 4638).

2 The matters at bar were also tendered as grounds for denying  
3 defendants' termination motion. See Corr. Pls. Opp. To Defs.  
4 Motion to Terminate, filed Mar. 19, 2013 (ECF No. 4422) at 58-65;  
5 87-91.<sup>2</sup> The court denied the termination motion by order filed  
6 April 5, 2013, see Coleman v. Brown, 938 F.Supp.2d 955 (E.D.Cal.  
7 2013), and separately set an evidentiary hearing on plaintiffs'  
8 motions. In relevant part, evidentiary hearing on plaintiffs'  
9 motions commenced on October 1, 2013, continued over twenty-eight  
10 court days and concluded on December 9, 2013.<sup>3</sup> Following the  
11 filing of closing briefs and responses thereto by the parties,  
12 the matters were submitted for decision.<sup>4</sup>

13 Because the plaintiffs relied in part on the matters  
14 considered in this order, the court holds that this order is a  
15 further demonstration that the order denying the motion to  
16 terminate was properly denied.

17 Plaintiffs' motions present two questions: First, have  
18 defendants sufficiently remedied Eighth Amendment violations in  
19 use of force, disciplinary measures, and segregated housing  
20 relative to class members, which were identified in the court's

---

21 <sup>2</sup> Throughout this order, all citations to page numbers of documents in the  
22 court's electronic case file (ECF) are to the ECF page number at the top of  
23 each page.

24 <sup>3</sup> Approximately five of those days were spent on testimony related to  
25 plaintiffs' motion concerning access to inpatient hospital care for inmates on  
26 death row (ECF No. 4543). As noted in footnote 1, supra, that motion has been  
27 resolved by separate order.

28 <sup>4</sup> By order filed March 6, 2014 (ECF No. 5095), proceedings on plaintiffs' May  
6, 2013 motion were reopened pending defendants' response to documents  
submitted pursuant to a March 3, 2014 request for judicial notice by  
plaintiffs. With the filing of defendants' response (ECF No. 5120),  
plaintiffs' May 6, 2013 motion was resubmitted.

1 1995 decision on the merits of plaintiffs' Eighth Amendment  
2 claims? Second, if the answer to the first question is no, what  
3 additional remedial measures are required to end ongoing Eighth  
4 Amendment violations in these areas?

5 At the outset, the court wishes to recognize the overall  
6 significant progress the defendants have made relative to  
7 providing constitutionally required care to the plaintiffs'  
8 class. Indeed, though defendants' motion to terminate was  
9 clearly premature, recognition of the progress made is important.  
10 Nonetheless, for the reasons discussed below, the answer to the  
11 first question is no. The answer to the second question is  
12 determined by what the Eighth Amendment requires when seriously  
13 mentally ill individuals are incarcerated.

14 The very difficult questions presented by the motions at bar  
15 are a consequence of the fact that California incarcerates tens  
16 of thousands of seriously mentally ill individuals in its state  
17 prison system.<sup>5,6</sup> As of September 2013, there were 33,259 inmates

---

18  
19 <sup>5</sup> California is not alone in what the sheriff of Cook County, Illinois has  
20 described as "'criminalizing mental illness.'" Kristof, N., "Inside a Mental  
21 Hospital Called Jail", New York Times, February 10, 2014. According to Mr.  
22 Kristof's article, "[n]ationwide in America, more than three times as many  
23 mentally ill people are housed in prisons and jails as in hospitals" and  
24 "[s]ome 40 percent of people with serious mental illnesses have been arrested  
25 at some point in their lives." *Id.* What Sheriff Dart described about Cook  
County is equally true of California: "We've systematically shut down all the  
26 mental health facilities, so the mentally ill have nowhere else to go. [The  
27 prison system has] become the de facto mental health hospital." *Id.* Indeed,  
28 it is the court's view that many of the problems giving rise to this suit and  
ongoing efforts at remediation arise from the inevitable tensions created by  
the distinct needs of custody supervision and the distinct need for mental  
health care.

<sup>6</sup> The questions at bar also arise as a consequence of the severe overcrowding  
that has plagued California's prison system for more than a decade, leading  
to, *inter alia*, insufficient space for differentiated housing programs, and  
delays in transfer to appropriate housing. See Reply Expert Declaration of  
James Austin, filed August 23, 2013 (ECF No. 4762) at ¶¶ 39, 44.

1 identified in the California Department of Corrections and  
2 Rehabilitation's (CDCR) outpatient mental health population. Pls.  
3 Ex. 2303.<sup>7</sup> The number of mentally ill inmates represents  
4 approximately 28.25% of the inmate population housed in CDCR's  
5 prison institutions.<sup>8</sup> These inmates received mental health care  
6 through the CDCR's Mental Health Services Delivery System  
7 (MHSDS), which provides four levels of mental health care. An  
8 understanding of the treatment criteria for each level of mental  
9 health care is necessary to resolution of the motions at bar.<sup>9</sup>

---

10  
11 <sup>7</sup> This represents an increase from the 32,955 inmates in the mental health  
outpatient population in June 2013. See Pls. Ex. 2301.

12 <sup>8</sup> This is based on a total population of 120,162 inmates housed in  
13 California's prison institutions, not including camps, as of September 18,  
2013. See Weekly Report of Population as of Midnight, September 18, 2013,  
14 posted in the population reports at [www.cdcr.ca.gov](http://www.cdcr.ca.gov).

15 <sup>9</sup> In order to receive treatment in the MHSDS an inmate must meet at least one  
of three general criteria listed in the Program Guide:

16 1. Treatment and monitoring are provided to any inmate who has current  
17 symptoms and/or requires treatment for the current Diagnostic and Statistical  
Manual diagnosed (may be provisional) Axis I serious mental disorders listed  
below:

18 Schizophrenia (all subtypes)

19 Delusional Disorder

20 Schizophreniform Disorder

21 Schizoaffective Disorder

22 Brief Psychotic Disorder

23 Substance-Induced Psychotic Disorder (exclude intoxication and withdrawal)

24 Psychotic Disorder Due To A General Medical Condition

25 Psychotic Disorder Not Otherwise Specified

26 Major Depressive Disorders

27 Bipolar Disorders I and II

28 2. Medical Necessity Mental health treatment shall be provided as needed.

Treatment is continued as needed, after review by an IDTT, for all cases in  
which:

Mental health intervention is necessary to protect life and/or treat  
significant disability/dysfunction in an individual diagnosed with or  
suspected of having a mental disorder. Treatment is continued for these cases  
only upon reassessment and determination by the IDTT that the significant or  
life threatening disability/dysfunction continues or regularly recurs.

3. Exhibitionism Treatment is required when an inmate has had at least one  
episode of indecent exposure in the six-month period prior to the IDTT that  
considers the need for exhibitionism treatment and the inmate patient is  
either:

• Diagnosed with Exhibitionism, or

• Meets the alternate criteria. (*Alternate Criteria*: An inmate who meets all

1 All members of the plaintiff class suffer from serious  
2 mental disorders. The Correctional Clinical Case Management  
3 System (CCCMS) provides mental health services to seriously  
4 mentally ill inmates with "stable functioning in the general  
5 population, Administrative Segregation Unit (ASU) or Security  
6 Housing Unit (SHU)" whose mental health symptoms are under  
7 control or in "partial remission as a result of treatment." Pls.  
8 Ex. 1200, MHSDS Program Guide, 2009 Revision, at 12-1-7. In  
9 September 2013, 28,360 mentally ill inmates were at the  
10 Correctional Clinical Case Management (CCCMS) level of care.  
11 Pls. Ex. 2303.

12 The remaining three levels of mental health care are for  
13 seriously mentally ill inmates who, due to their mental illness,  
14 are unable to function in the general prison population. The  
15 Enhanced Outpatient Program (EOP) is for inmates with "acute  
16 onset or significant decompensation of a serious mental  
17 disorder." Pls. Ex. 1200 at 12-1-7, 12-1-8. EOP programs are  
18 located in designated living units at "hub institution[s]." Id.  
19 at 12-1-8. In September 2013, 4,538 mentally ill inmates were at  
20 the Enhanced Outpatient Program (EOP) level of care. Pls. Ex.  
21 2303.

22 Mental Health Crisis Beds (MHCBS) are for mentally ill  
23 inmates in psychiatric crisis or in need of stabilization pending  
24 transfer either to an inpatient hospital setting or a lower level

---

25 criteria for the diagnosis of Exhibitionism, except that the victim was not an  
26 "unsuspecting stranger" but was a staff member or inmate who did not consent  
to or encourage the behavior.)

27 (A diagnosis of Exhibitionism is not required for inmates who meet the  
alternate criteria.)

28 Pls. Ex. 1200 at 12-1-5, 12-1-6.

1 of care. Pls. Ex. 1200, Program Guide at 12-1-8. MHCBS are  
2 generally licensed inpatient units in correctional treatment  
3 centers or other licensed facilities. Id. at 12-1-9. Stays in  
4 MHCBS are limited to not more than ten days. Id. at 12-5-1.<sup>10</sup>  
5 Finally, several inpatient hospital programs are available for  
6 class members. With one exception<sup>11</sup> the inpatient programs are  
7 operated by the Department of State Hospitals (DSH). Id. at 12-  
8 1-9. Some of those programs are on the grounds of state prisons,  
9 while others are in existing state hospitals.

10 In addition to the foregoing, resolution of the motions at  
11 bar turns on understanding the nature of the inquiry before the  
12 court. In relevant part, in 1995 this court found that  
13 "seriously mentally ill inmates [are] being treated with punitive  
14 measures by the custody staff to control the inmates' behavior  
15 without regard to the cause of the behavior, the efficacy of such  
16 measures, or the impact of those measures on the inmates' mental  
17 illnesses." Coleman v. Wilson, 912 F.Supp. 1282, 1320 (E.D.Cal.  
18 1995). The court also found that "mentally ill inmates are  
19 placed in administrative segregation and segregated housing  
20 without any evaluation of their mental status, because such  
21 placement will cause further decompensation, and because inmates  
22 are denied access to necessary mental health care while they are  
23 housed in administrative segregation and/or segregated housing."  
24 Id. at 1320. Finally, the court found that "weapons are used on

25 \_\_\_\_\_  
26 <sup>10</sup> Exceptions to the maximum length of stay in an MHCB must be approved by  
"the Chief Psychiatrist or designee." Id. at 12-5-1.

27 <sup>11</sup> The exception is a relatively new program for female inmates operated by  
28 CDCR at California Institution for Women (CIW).

1 inmates with serious mental disorders without regard to the  
2 impact of those weapons on their psychiatric condition, and  
3 without penological justification." Id. at 1323.<sup>12</sup>

4 In analyzing the merits of plaintiffs' claims, the court  
5 applied the well-settled principle that "[a]n Eighth Amendment  
6 violation is comprised of both an objective component and a  
7 subjective component." Id. at 1298 (citing Wilson v. Seiter, 501  
8 U.S. 294, 298 (1991)). The objective component turns on whether  
9 the alleged deprivations are "sufficiently serious" to constitute  
10 the "'unnecessary and wanton infliction of pain'" proscribed by  
11 the Eighth Amendment. Wilson, 501 U.S. at 298 (quoting Rhodes v.  
12 Chapman, 452 U.S. 337, 346 (1981)). The findings in the  
13 preceding paragraph formed the objective component of the Eighth  
14 Amendment violations at issue.

15 The subjective component of an Eighth Amendment violation  
16 requires a finding that the defendants have a "sufficiently  
17 culpable state of mind". Wilson, 501 U.S. at 298 (citing  
18 Rhodes). This requires the court "to assess whether the conduct  
19 at issue is 'wanton.'" Coleman v. Wilson, 912 F.Supp. at 1321  
20 (quoting Jordan v. Gardner, 986 F.2d 1521, 1527 (9<sup>th</sup> Cir. 1993))

21 The "baseline" mental state for "wantonness"  
22 is "deliberate indifference." Id. As a  
23 general rule, the deliberate indifference  
standard applies where the claim is that

---

24 <sup>12</sup> At the underlying trial the use of force claims centered on the use of  
25 tasers and 37mm guns. See Coleman, 912 F.Supp. at 1321-1323. The focus of  
26 the motion at bar is on the use of OC pepper spray and expandable batons  
27 against class members. Plaintiffs' fundamental contention is the same: class  
28 members suffer from serious mental illnesses which are exacerbated by use of  
these weapons, use of the weapons causes serious harm, and defendants' current  
policies, both in design and implementation, continue to demonstrate  
deliberate indifference to their mental illnesses and the harms caused by use  
of the weapons.

1 conditions of confinement cause unnecessary  
2 suffering. *Id.* In contrast, the "malicious  
3 and sadistic" standard applies to claims  
4 arising out of the use of force to maintain  
5 order. See id.

6 Coleman v. Wilson, 912 F.Supp. at 1321-22 (quoting Jordan, 986  
7 F.2d at 1527-28). The Eighth Amendment violations at bar were  
8 all predicated on findings that defendants' policies and  
9 practices governing the use of force, punitive measures,  
10 administrative segregation and segregated housing constituted  
11 deliberate indifference to class members' serious mental  
12 illnesses and the serious and substantial harms to members of the  
13 plaintiff class caused by use of such measures. See Coleman v.  
Wilson, 912 F.Supp. at 1319-1323.<sup>13</sup>

14 Defendants now oppose plaintiffs' motion concerning use of  
15 force and disciplinary measures on the ground that there is no  
16 pattern and practice of malicious and sadistic use of force  
17 against mentally ill inmates. See Defs.' Opp'n to Motion Related  
18 to Use of Force and Disciplinary Measures, filed July 24, 2103  
19 (ECF No. 4704) at 8. To some extent, this aspect of defendants'  
20 opposition may have been invited by some of the arguments  
21 advanced by plaintiffs in their motion.<sup>14</sup> Regardless, the

---

22 <sup>13</sup> The United States Court of Appeals for the Ninth Circuit has also applied  
23 the deliberate indifference standard to constitutional claims that prison  
24 staff used force, "including pepper spray, on prisoners instead of employing  
25 appropriate mental health interventions" and that the prison's general  
26 policies governing use of pepper spray were unconstitutional. Hallett v.  
Morgan, 296 F.3d 732, 744-45, 747 (9<sup>th</sup> Cir. 2002). In Hallett, the court of  
27 appeals upheld the constitutionality of the challenged actions and policies  
28 based on findings that "use of pepper spray is carefully considered in advance  
of its authorization, restricted and confined for limited purposes, and used  
only very sparingly", staff was properly trained in its use and could not use  
it without being subjected to it. Id. at 747.

<sup>14</sup> Plaintiffs' motion for additional orders concerning use of force proceeds  
from the contention that members of the plaintiff class "are regularly and

1 question of whether defendants' policies and practices prevent or  
2 fail to prevent force applied maliciously and sadistically for  
3 the very purpose of causing harm, see Whitley v. Albers, 475 U.S.  
4 312, 320 (1986), is not before this court.<sup>15</sup>

5 First, application of that standard to the claims at bar was  
6 rejected by the court in 1995. While a different claim or  
7 changed circumstance might justify application of that standard,  
8 that appears not to be the case here. Accordingly, the law of  
9 the case doctrine applies to the instant motion. See, e.g.  
10 Arizona v. California, 460 U.S. 605, 618 (1983).

11 Second, as the court discussed in its order denying  
12 defendants' motion to terminate this action, once an Eighth  
13 Amendment violation is found and injunctive relief ordered, the  
14 focus shifts to remediation of the serious deprivations that  
15 formed the objective component of the identified Eighth Amendment  
16 violation. See Coleman v. Brown, 938 F.Supp.2d at 988.

17 Remediation can be accomplished by compliance with targeted  
18 orders for relief or by establishing that the "violation has been

---

19  
20 routinely subjected to unreasonable, unnecessary, and *excessive* uses of force  
21 by correctional officers in California prisons" and that "[t]he State's  
22 persistent use of unreasonable force against CDCR prisoners with mental  
23 illness causes grave harm to the *Coleman* class." Pls. Mot. for Enforcement of  
24 Court Orders and Affirmative Relief Related to Use of Force and Disciplinary  
Measures, filed May 29, 2013 (ECF No. 4638) at 10-11 (emphasis added).  
Plaintiffs also contend, inter alia, that defendants' policies and practices  
governing use of force are inadequate under every single criteria set forth by  
defendants' use of force expert's criteria for adequate systemic  
administration of force in a correctional setting. Id. at 11.

25 <sup>15</sup> Indeed, in the 1995 order on the merits of plaintiffs' claims the court  
26 specifically recognized that "[a]pplication of the deliberate indifference  
27 standard to this conditions of confinement case in no way precludes  
28 application of the malicious and sadistic standard in the context of suits  
brought by mentally ill inmates for physical or mental injuries sustained by  
virtue of the need to restore order in an emergency situation." Coleman v.  
Wilson, 912 F.Supp. at 1323 n.60.

1 remedied in another way." Id. To the extent the subjective  
2 component of an Eighth Amendment violation remains a relevant  
3 inquiry, it is coextensive with proof of ongoing objectively  
4 unconstitutional conditions. Id. at 989.

5 Defendants also argue that an assessment of whether  
6 defendants are subjectively deliberate indifferent should include  
7 examination of whether the conduct or regulations at issue are  
8 "without penological justification" and that the factors outlined  
9 in Turner v. Safley, 482 U.S. 78 (1987) "may be instructive in  
10 evaluating whether regulations challenged under the Eighth  
11 Amendment have a legitimate penological purpose." Defendants'  
12 Post-Evidentiary Hearing Brief, filed January 21, 2014 (ECF No.  
13 4988) at 7. This argument misses the mark.

14 Violations of the Eighth Amendment are not excused by an  
15 asserted "reasonable relationship" to a legitimate penological  
16 goal. See Johnson v. California, 543 U.S. 499, 511 (2005); see  
17 also Jordan v. Gardner, 986 F.2d 1521, 1530 (9<sup>th</sup> Cir. 1993) (en  
18 banc). Turner applies where the constitutional right at issue is  
19 "one which is enjoyed by all persons, but the exercise of which  
20 may necessarily be limited due to the unique circumstances of  
21 imprisonment. . . . Eight Amendment rights do not conflict with  
22 incarceration; rather, they limit the hardships which may be  
23 inflicted upon the incarcerated as 'punishment.'" Jordan, 986  
24 F.2d at 1530 (citing Spain v. Procunier, 600 F.2d 189, 193-94 (9<sup>th</sup>  
25 Cir. 1979)). "[T]he integrity of the criminal justice system  
26 depends on full compliance with the Eighth Amendment." Johnson,  
27 543 U.S. at 511.

28 ////

1           Whatever rights one may lose at the prison  
2           gates, cf. Jones v. North Carolina Prisoners  
3           Union, 433 U.S. 119, 97 S.Ct. 2532, 53  
4           L.Ed.2d 629 (1977) (prisoners have no right  
5           to unionize), the full protections of the  
6           eighth amendment most certainly remain in  
7           force. **The whole point of the amendment is to**  
8           **protect persons convicted of crimes. Eighth**  
9           **amendment protections are not forfeited by**  
10           **one's prior acts.** Mechanical deference to the  
11           findings of state prison officials in the  
12           context of the eighth amendment would reduce  
13           that provision to a nullity in precisely the  
14           context where it is most necessary. **The**  
15           **ultimate duty of the federal court to order**  
16           **that conditions of state confinement be**  
17           **altered where necessary to eliminate cruel**  
18           **and unusual punishments is well established.**

19           Spain v. Proconier, 600 F.2d at 193-94 (emphasis added).

20           "The existence of a legitimate penological justification  
21           has, however, been used in considering whether adverse treatment  
22           is sufficiently gratuitous to constitute punishment for Eighth  
23           Amendment purposes." Grenning v. Miller-Stout, 739 F.3d 1235,  
24           1240 (9<sup>th</sup> Cir. 2014) (citing Rhodes v. Chapman, 452 U.S. 337, 346  
25           (1981))(in turn quoting Gregg v. Georgia, 428 U.S. 158, 183  
26           (1976)). Thus, the presence of a legitimate penological  
27           justification for conditions of confinement challenged under the  
28           Eighth Amendment may be considered in determining whether the  
29           challenged condition constitutes punishment prohibited by the  
30           Eighth Amendment. See Grenning, 739 F.3d at 1240 (discussing  
31           Chappell v. Mandeville, 706 F.3d 1052, 1058 (9<sup>th</sup> Cir. 2013) and  
32           Keenan v. Hall, 83 F.3d 1083, 1090 (9<sup>th</sup> Cir. 1996)). Nonetheless,  
33           in this case such consideration is necessarily delimited by the  
34           necessity of consideration of class members' mental status. The  
35           interrelationship of these two legitimate considerations is the  
36           crux of the problem considered herein.

1 In sum, failure to properly consider the mental state of  
2 class members requires the court to act. If defendants fail to  
3 meet their Eighth Amendment obligations, this court must enforce  
4 compliance. See Brown v. Plata, 131 S.Ct. at 1928 (citing Hutto  
5 v. Finney, 437 U.S. 678, 687, n. 9, 98 S.Ct. 2565, 57 L.Ed.2d 522  
6 (1978)). "Courts may not allow constitutional violations to  
7 continue simply because a remedy would involve intrusion into the  
8 realm of prison administration." Brown v. Plata, 131 S.Ct. at  
9 1928-29.

10 Finally, defendants assert that plaintiffs have the burden  
11 of proof on this motion. Plaintiffs do not dispute this  
12 assertion.

13 Given all the above, the court now turns to the motions at  
14 bar.

15 I. Use of Force/Disciplinary Measures

16 A. Use of Force

17 The Eighth Amendment violation with respect to use of force  
18 (hereafter "use of force" or "UOF") arises from policies and  
19 practices that permit use of force against seriously mentally ill  
20 prisoners without regard to (1) whether their behavior was caused  
21 by mental illness and (2) the substantial and known psychiatric  
22 harm and risks thereof caused by such applications of force. See  
23 Coleman v. Wilson, 912 F.Supp. at 1322. The record showed then,  
24 and still shows, that force can be and is used against seriously  
25 mentally ill inmates in circumstances that permit reflection  
26 prior to its application. See id., 912 F.Supp. at 1321-23; see  
27 also Ex. A to Declaration of Michael D. Stainer, filed March 12,  
28

1 2014 (ECF No. 5111-1).<sup>16</sup> Remediation of the identified Eighth  
2 Amendment violation concerning use of force against California's  
3 seriously mentally ill inmates requires at least three things:  
4 (1) development of policies and procedures which provide  
5 sufficient guidance and clarity to avoid the identified harm; (2)  
6 adequate implementation of those policies and practices,  
7 including but not limited to appropriate training of all staff;  
8 and (3) adequate enforcement of those policies and procedures.  
9 Whether the constitutional violation remains is a different  
10 question from the nature of further relief, if any, that may be  
11 required if the constitutional violation is ongoing.<sup>17</sup>

12 In addition to the legal principles set forth supra, two  
13 other principles guide the court's consideration of the issues at  
14 bar. First, there appears to be general agreement among the  
15 appellate courts that have considered the question that "'it is a  
16 violation of the Eighth Amendment for prison officials to use  
17 mace, tear gas or other chemical agents in quantities greater  
18 than necessary. . . .'" Williams v. Benjamin, 77 F.3d 756, 763  
19 (4<sup>th</sup> Cir. 1996) (quoting Soto v. Dickey, 744 F.2d 1260, 1270 (7<sup>th</sup>  
20 Cir. 1984)). "This is because, even when properly used, such  
21 weapons 'possess inherently dangerous characteristics capable of  
22 causing serious and perhaps irreparable injury to the victim.'" "

23  
24 <sup>16</sup> Defendants have filed four declarations from Mr. Stainer, the Director of  
25 CDCR's Division of Adult Institutions in connection with these proceedings.  
Each will be referred to by its ECF number.

26 <sup>17</sup> Put another way, the absence of a specific policy or practice requested by  
27 plaintiffs does not necessarily demonstrate that the constitutional violation  
28 is ongoing. On the other hand, one or more of the remedial orders requested  
by plaintiffs may be required if the constitutional violation has not yet been  
adequately remedied.

1 Williams, 77 F.3d at 763 (quoting Slakan v. Porter, 737 F.2d 368,  
2 372 (4th Cir.1984), *cert. denied*, 470 U.S. 1035, 105 S.Ct. 1413,  
3 84 L.Ed.2d 796 (1985)). Second, at least one appellate court has  
4 found that the Eighth Amendment is violated by use of pepper  
5 spray on a mentally ill inmate who, because of mental illness, is  
6 unable to comply with directives from prison officials and  
7 nonetheless is subjected to pepper spray. See Thomas v. Bryant,  
8 614 F.3d 1288, 1310-11 (11<sup>th</sup> Cir. 2010) ("repeated non-spontaneous  
9 use of chemical agents" on mentally ill inmate "constituted an  
10 extreme deprivation sufficient to satisfy the objective prong" of  
11 Eighth Amendment deliberate indifference claim where inmate's  
12 "well-documented history of mental illness and psychotic episodes  
13 rendered him unable to comply at the times he was sprayed such  
14 that the policy was 'unnecessary' and 'without penological  
15 justification in his specific case.")<sup>18</sup>

16 Taken together, the foregoing two lines of authority suggest  
17 that the Eighth Amendment requires clear and adequate constraints  
18 on the amount, if any, of pepper spray that may be used on  
19 mentally ill inmates generally and more particularly when such  
20 inmates are confined in a space such as a cell or a holding cage,  
21 as well as significant constraints, if not a total ban, on the  
22 use of pepper spray on mentally ill inmates who because of their  
23 mental illness are unable to comply with official directives.

24  
25 \_\_\_\_\_  
26 <sup>18</sup> The Williams court applied the Whitley standard to the subjective component  
27 of the Eighth Amendment claim before that court, see Williams, 77 F.3d at 762,  
28 while the Thomas court applied the deliberate indifference standard. See  
Thomas, 614 F.3d at 1304-05. The relevance of both decisions to the analysis  
at bar are their holdings concerning the objective component of an Eighth  
Amendment violation arising from the use of pepper spray.

1 The court now turns to the merits of plaintiffs' motion with  
2 respect to use of force.

3 Defendants' written UOF policy is found in Title 15 of the  
4 California Code of Regulations at §§ 3268-3268.3 and CDCR's  
5 Department Operations Manual Chapter 5, Article 2-Use of Force  
6 (DOM). Defs. Ex. J, Stainer Decl., filed July 24, 2013 (ECF No.  
7 4708) at ¶ 5. The current provisions of Title 15 were revised in  
8 August 2010 and implemented thereafter. Amended Declaration of  
9 John R. Day, filed August 26, 2013 (ECF No. 4772-1) at ¶ 4.<sup>19</sup>

10 DOM provisions governing UOF have been revised twice since  
11 the conclusion of the evidentiary hearing.<sup>20</sup> See Stainer Decl.  
12 (ECF Nos. 4987, 5078, 5111-1). While defendants dispute  
13 plaintiffs' characterization of the uses of force depicted on six  
14 videotapes shown at the hearing, several of the DOM revisions  
15 appear directly aimed at preventing such uses of force. At the  
16 hearing, Michael Stainer, the Director of CDCR's Division of

---

17 <sup>19</sup> The current regulations were promulgated and implemented pursuant to a  
18 review process required by another federal class action lawsuit, Madrid v.  
19 Gomez, No. 90-3094 TEH (N.D.Cal.). Defendants contend, inter alia, that  
20 plaintiffs' motion is, in part, an improper effort to seek reconsideration of  
21 the Madrid court's order. See Defs.' Opp. To Motion Related to Use of Force  
and Disciplinary Measures, filed July 24, 2013 (ECF No. 4704) at 33 n.6. The  
motion at bar is focused on whether defendants' use of force policies and  
practices are sufficient to remedy the constitutional violation identified by  
this court in its 1995 order. That issue was not before the Madrid court.

22 <sup>20</sup> One of plaintiffs' objections to the revised DOM provisions is that the new  
23 procedures are only in the DOM and not in Title 15. Plaintiffs contend that  
24 state law requires "CDCR rules of general (statewide) application to prisoners  
25 be formally promulgated and added to Title 15" and they question whether DOM  
26 provisions only, without alterations to Title 15, are sufficient for a durable  
27 remedy. See Pls. Brf. on Defs. Proposed Revisions to Use of Force Policy,  
28 filed February 12, 2014 (ECF No. 5065) at 11 n.3. Although this question is  
not before the court, it appears that the state law requirement that agency  
rules of general application be promulgated in accordance with the  
requirements of California's Administrative Procedures Act does not mean that  
all CDCR rules of general application must be added by amendment to Title 15.  
See Morales v. California Department of Corrections and Rehabilitation, 168  
Cal.App.4th 729, 735-36 (2008).

1 Adult Institutions testified that none of the uses of force  
2 depicted in the six videotapes constituted excessive force "as  
3 defined by [CDCR] policy." Reporter's Transcript Re: Evidentiary  
4 Hearing (RT) at 911:23-912:1. He further testified that in his  
5 view while none of the videos depicted excessive force "there  
6 might have been better ways of doing things, but that is tactics.  
7 . . . [W]e plan on addressing that with our policy revisions  
8 which provide additional guidance." RT at 912:2-7.

9 The court accepts Mr. Stainer's testimony that none of the  
10 force depicted on the six videotapes was excessive under then-  
11 existing guidelines in CDCR policy. In combination with the  
12 events depicted on the videotapes, that testimony is perhaps the  
13 best evidence that the constitutional violation with respect to  
14 use of force on seriously mentally ill inmates has not yet been  
15 remedied.

16 The court cannot credit Mr. Stainer's testimony that what  
17 was depicted on the six videos shown at the hearing depicted  
18 acceptable "tactics." Most of the videos were horrific; each was  
19 illustrative of one or more of the objective components of the  
20 underlying constitutional violation found in the court's 1995  
21 order. Defendants' expert, Steve Martin, testified that the fact  
22 that the events depicted on the videotapes "occurred is bad  
23 enough, and, hopefully, they're as few in number, as I believe  
24 them to be, . . . But what is so bothersome and disturbing is  
25 that no - this sophisticated IERC (Institutional Executive Review  
26 Committee) with all these ranking administrators experienced as  
27 Director Stainer is, could read these reports and not at least  
28 question the amount of spray or the tactics used. . . ." RT at

1 1903:9-17. Mr. Martin testified that without such questioning,  
2 neither review nor corrective action occurs and the absence of  
3 corrective action is "the path to institutionalizing a culture  
4 that lends itself to harm, to institutionalized harm." RT at  
5 1903:22-1905:18.

6 Even if the incidents on the videotapes were, as Mr. Martin  
7 testified, "isolated aberrations, anomalies, outliers" that "do  
8 not . . . represent the vast majority of incidents" he reviewed,  
9 RT at 1795:3-8, Mr. Stainer's testimony establishes that all of  
10 the incidents fell within the purview of defendants' UOF policy.  
11 Furthermore, both Mr. Martin and Mr. Stainer testified that none  
12 resulted in further review beyond the IERC or, except for some  
13 "trainings", corrective action independent of these proceedings.  
14 RT at 954:6-17 (Stainer); RT at 1901:16-1903:12 (Martin). This,  
15 in itself, demonstrates the constitutional inadequacy of either  
16 the regulations or the review process.

17 In addition, plaintiffs' evidence suggests that force is  
18 used against mentally ill inmates at a rate greatly  
19 disproportionate to their presence in the overall inmate  
20 population. Plaintiffs' expert, Eldon Vail, reported that twelve  
21 of California's prisons reported use of force incidents against  
22 mentally ill inmates at a rate more than double their  
23 representation in the prison population, three prisons reported  
24 use of force incidents against mentally ill inmates at a rate  
25 triple their representation in the prison population, and in  
26 several, 87 to 94% of the use of force incidents were against  
27 mentally ill inmates. Expert Declaration of Eldon Vail, filed  
28 May 29, 2013 (ECF No. 4638-1) at ¶¶ 9-11. As Mr. Vail opined,

1 this is evidence, at least, of a systemic failure to understand  
2 "what a mentally ill person might be experiencing before or  
3 during a use of force incident, or of how mental illness may make  
4 it difficult for an inmate to immediately conform his or her  
5 behavior in response to an order." Id. at ¶ 12.

6 Mr. Stainer also testified to the need for revisions to the  
7 policy to guide staff in making "appropriate" UOF decisions and  
8 that the UOF guidelines would be "tighten[ed] down . . . quite a  
9 bit." RT at 826:16-25. The policy revisions are a critical step  
10 forward and, if fully implemented and enforced, will bring the  
11 state closer to remediation of the identified Eighth Amendment  
12 violation. Without more, however, seriously mentally ill inmates  
13 in California's prisons will remain subject to uses of force by  
14 custody staff armed with OC pepper spray and expandable batons  
15 "without regard to the impact of those weapons on their  
16 psychiatric condition." Coleman v. Wilson, 912 F.Supp. at 1323.

17 Title 15 and the DOM divide use of force incidents into two  
18 categories: immediate and controlled. "Immediate use of force"  
19 is "[t]he force used to respond without delay to a situation or  
20 circumstance that constitutes an imminent threat to the security  
21 or the safety of persons." 15 C.C.R. § 3628(a)(4); see also DOM  
22 § 51020.4. "Controlled use of force" is defined as "[t]he force  
23 used in an institution/facility setting when an inmate's presence  
24 or conduct poses a threat to safety or security and the inmate is  
25 located in an area that can be controlled or isolated." 15  
26 C.C.R. § 3268(a)(5); see also DOM § 51020.4. The DOM provisions  
27 expand on the regulations by providing that immediate uses of  
28 force may be used by employees without prior authorization, while

1 controlled uses of force require authorization and presence of  
2 specific personnel. See DOM § 51020.4.

3 The differences between these two categories are significant  
4 to the remedy in this case. "Immediate" uses of force are  
5 applied without the reflection and intervention that can avoid or  
6 prevent the serious harm suffered by members of the plaintiff  
7 class when force is used. See RT at 1967:6-12. Thus, the  
8 definition of immediate use of force must be adequate to exclude  
9 uses of force in circumstances where "time, distance and delay"  
10 can be taken before force is used. See RT at 1966:17-1968:4  
11 (testimony of Steven Martin that if an officer could have "waited  
12 and taken time, distance and delay" instead of immediately using  
13 force "the force obviously was not necessary.")

14 Plaintiffs' expert, Eldon Vail, testified that the  
15 appropriate criteria for immediate use of force is already in  
16 California's use of force policy, which on its face requires an  
17 "imminent threat" to justify an immediate use of force. RT at  
18 436:7-8, 436:24-473:3; see also RT at 1935:11-14 (testimony of  
19 defense expert Steven Martin that "immediate use of force is  
20 supposed to be used only if there's some imminent harm that needs  
21 to be stopped.") Mr. Vail's principal critique of the written  
22 policy was a then-existing exception in § 51020.11.2 of the DOM  
23 which allowed immediate use of force against inmates who refused  
24 to relinquish their food ports. See Ex. A to Stainer Decl. (ECF  
25 No. 4708-1) at 5. Mr. Vail testified that was a "really huge  
26 flaw" in defendants' use of force policy. RT at 553:5-554:4.  
27 Newly amended § 51020.11.2 has removed that exception and no  
28 longer authorizes immediate use of force when an inmate refuses

1 to relinquish a food port. Instead, "[i]n the event the inmate  
2 does not relinquish control of the food port, the officer shall  
3 back away from the cell and contact and advise the custody  
4 supervisor of the situation. Controlled force will be initiated  
5 while custody staff continue to monitor the inmate." Ex. A to  
6 Stainer Decl. (ECF No. 5111-1) at 9.

7 Mr. Stainer averred that the revisions to the DOM concerning  
8 the food ports were made "to emphasize CDCR's policy that the  
9 immediate use of pepper spray is only authorized in response to  
10 an emergent or imminent threat." Stainer Decl. (ECF No. 5111-1)  
11 at ¶ 3. As revised, defendants' current written policy  
12 concerning immediate use of force appears to be adequate on its  
13 face. However, testimony at the hearing and the nature of the  
14 revisions to the DOM highlight both the importance of adequate  
15 training in the revisions to the policy and the necessity of  
16 monitoring immediate uses of force to ensure that they are  
17 limited to "imminent threats."

18 The record before the court suggests that for an extended  
19 period of time CDCR staff have been working with a broad  
20 definition of "imminent threat." In addition to the  
21 food/security port exception, there was evidence at the hearing  
22 that immediate use of force was authorized by policy when, even  
23 without an imminent threat, inmates kicked their cell doors. RT  
24 at 436:5-9. Defendants' expert Steve Martin testified that  
25 "[t]here are substantially more use of force incidents [in CDCR]  
26 that are immediate and not controlled." RT at 1966:9-13. He  
27 testified concerning a high percentage of immediate use of force  
28 incidents at Pelican Bay in the period from January to October

1 2012. RT at 1935:18-1937:3. He reviewed 180 incidents of use of  
2 force, 174 of which had been characterized as "'immediate  
3 applications of force.'" RT at 1935:15-1936:9. In reviewing  
4 those incidents, he "identified fairly quickly a number of  
5 incidents" categorized as "immediate" uses of force that evidence  
6 showed "could have been managed through 'controlled force.'" RT  
7 at 1936:17-19. Those incidents evidenced unnecessary uses of  
8 force. See RT at 1967:17-1968:4 ("immediate" use of force where  
9 "controlled use of force" was possible demonstrates unnecessary  
10 use of force "because if you could have waited and taken time,  
11 distance and delay, the force obviously was not necessary.")<sup>21</sup>

12 The foregoing suggests that heretofore immediate use of  
13 force has been used with far greater frequency than authorized by  
14 the written policy testified to by Mr. Stainer. It will be  
15 necessary going forward for defendants to provide adequate staff  
16 training and to closely monitor all UOF incidents, particularly  
17 those classified as "immediate" uses of force, to ensure that  
18 these policy revisions are actually effected.

19 The issues with respect to controlled use of force are  
20 different. They concern (1) whether defendants obtain the  
21 relevant information concerning an inmate's mental illness prior  
22

---

23 <sup>21</sup> Subsequently, in response to a question about whether there is a "pattern  
24 and practice of systemic use of force at Pelican Bay," Mr. Martin testified  
25 that "probably, if memory serves . . ., I found three to five cases out of the  
26 immediate category case that I believed could have been calculated  
27 applications of force." RT at 1968:10-15. Given Mr. Martin's other testimony  
28 about that the "very high percentage" of immediate use of force incidents at  
Pelican Bay, and the fact that he brought this information to the attention of  
the current Secretary of Corrections, who was with him at Pelican Bay, the  
court places substantial weight on Mr. Martin's testimony that the  
disproportionate number of immediate use of force incidents at Pelican Bay was  
not de minimis and was cause for concern.

1 to application of force; and (2) what is done with the  
2 information that is obtained.

3 Section 51020.4 of the DOM defines controlled use of force  
4 as

5 the force used in an institution/facility  
6 setting, when an inmate's presence or conduct  
7 poses a threat to safety or security and the  
8 inmate is located in an area that can be  
9 controlled or isolated. These situations do  
10 not normally involve the immediate threat to  
11 loss of life or immediate threat to  
12 institution security. All controlled use of  
13 force situations require the authorization  
14 and the presence of a First or Second Level  
15 Manager, or Administrative Officer of the Day  
16 (AOD) during non-business hours. Staff shall  
17 make every effort to identify disabilities,  
18 to include mental health concerns, and note  
19 any accommodations that may need to be  
20 considered.

21 Ex. A to Stainer Decl. (ECF No. 5111-1) at 6. In addition to the  
22 definitional provision, several other DOM provisions are relevant  
23 to the issues before the court.

24 The use of force options available to CDCR officers are set  
25 forth in DOM § 51020.5. That section provides:

26 Use of Force options do not have to be  
27 utilized in any particular sequence, but  
28 should be the force option staff reasonably  
believes is sufficient. Verbal persuasion or  
orders should be issued prior to resorting to  
force and are required to be provided before  
controlled force is used. . . . Use of force  
options include but are not limited to:

- Chemical agents
- Hand-held batons

- 1                   • Physical strength and holds. A choke  
2                   hold or any other physical restraint  
3                   which prevents the person from  
4                   swallowing or breathing shall not be  
                    used unless the use of deadly force  
                    would be authorized.
  
- 5                   • Less-lethal weapons. A less lethal  
6                   weapon is any weapon that is not likely  
7                   to cause death. A 37mm or 40mm launcher  
8                   and any other weapon used to fire less-  
                    lethal projectiles is a less lethal  
                    weapon.
  
- 9                   • Lethal weapons. A firearm is a lethal  
10                  weapon because it is used to fire lethal  
11                  projectiles. A lethal weapon is any  
                    weapon that is likely to result in  
                    death.

12  
13 Ex. A to Stainer Decl. (ECF No. 4708-1), at 3.

14                 DOM section 51020.12 sets forth the general requirements for  
15                 controlled use of force. Ex. A to Stainer Decl. (ECF No. 5111-1)  
16                 at 9-10. It requires that mental health concerns "be taken into  
17                 account prior to any controlled use of force." Id. at 10. It  
18                 also requires that all controlled uses of force

19                         be preceded by a cool down period of  
20                         reasonable length to allow the inmate an  
21                         opportunity to comply with staff orders.  
22                         During the cool down period, clinical  
23                         intervention by a licensed practitioner shall  
24                         be attempted, regardless of the mental health  
25                         status of the inmate. The length of the cool  
26                         down period can vary depending upon the  
27                         circumstances. In situations involving  
28                         participants in the mental health program,  
                            Incident Commanders, on-site Managers, and  
                            licensed health care practitioner shall  
                            discuss concerns that may affect the length  
                            of the cool down period.

The First or Second Level Manager, or the  
AOD, shall determine the length of the cool

1 down period and communicate this to the  
2 Incident Commander. . . .

3 A controlled use of force shall not be  
4 accomplished without the presence of a  
5 licensed health care practitioner.

6 Id. at 10.

7 Controlled uses of force must be video recorded. See id.,  
8 DOM § 51020.12.1. DOM § 51020.12.1 vests the Incident Commander  
9 with the responsibility for "determining what force options shall  
10 be used and the order in which they will be applied." Ex. A to  
11 Stainer Decl. (ECF No. 5111-1) at 11. The Incident Commander is  
12 required to "consider", inter alia, the inmate's "apparent mental  
13 state" when determining those force options. Id. The First or  
14 Second Level Manager/AOD must "identify themselves on camera and  
15 confirm they are authorizing the controlled use of force,  
16 including the force options as stated by the Incident Commander."  
17 Id. The attempted clinical intervention, which is described as  
18 "efforts made to verbally counsel the inmate and persuade the  
19 inmate to voluntarily come out of the area without force" is to  
20 be recounted on camera by the licensed health care practitioner  
21 who attempted the intervention; the actual intervention is not  
22 recorded. Id.

23 DOM § 51020.12.2 contains specific provisions for controlled  
24 uses of force involving seriously mentally inmates, as follows:

25 When inmates are housed in departmental  
26 hospitals, infirmaries, Correctional  
27 Treatment Centers (CTC), Enhanced Outpatient  
28 Program Units (EOP), or Psychiatric Services  
Units (PSU), or has an EOP level of care  
designation, or any inmate who is acting in a  
bizarre, unusual, uncharacteristic manner,

1 the controlled use of force shall occur as  
2 follows:

- 3 • A licensed health care practitioner  
4 designated by the Chief Executive  
5 Officer (CEO) shall be consulted prior  
6 to the use of chemical agents (see  
7 Chemical Agents Restrictions).
- 8 • Clinical intervention by a licensed  
9 practitioner shall be attempted.  
10 Clinical intervention shall also precede  
11 the extraction of any inmate who is  
12 being extracted upon the written order  
13 of a medical doctor, psychiatrist, or  
14 psychologist to facilitate a change in  
15 housing for treatment purposes.
- 16 • The clinician shall attempt to verbally  
17 counsel the inmate and persuade the  
18 inmate to voluntarily come out of the  
19 area without force. These efforts shall  
20 continue during the cool down period.
- 21 • Whenever circumstances permit, the  
22 clinician shall be a mental health  
23 provider; i.e., Psychiatric Technician,  
24 Licensed Clinical Social Worker,  
25 Psychologist, or Psychiatrist.

18 Id. at 12. Former DOM § 51020.12.2 was substantially similar;  
19 the amendment adds language extending its provisions to "any  
20 inmate who is acting in a bizarre, unusual, uncharacteristic  
21 manner." See Ex. A to Stainer Decl. (ECF No. 5078-1) at 8. The  
22 provisions of DOM § 51020.12.2 are "additional safeguards and  
23 requirements" to be followed for controlled UOF on mentally ill  
24 inmates; the other provisions of the UOF policy also continue to  
25 apply. RT at 806:17-807:24.

26 The amendments to the DOM change in significant ways the  
27 amount of pepper spray authorized in controlled UOF incidents.  
28 Amended DOM § 51020.15 lists the specific types of pepper spray

1 authorized for use, the number of applications, and the duration  
2 of each application. Ex. A to Stainer Decl. (ECF No. 5111-1) at  
3 14-15. Staff must wait a minimum of three minutes after an  
4 application of pepper spray before applying another application,  
5 and the Incident Commander and Response Supervisor must assess  
6 the effectiveness of each application. Id. at 15. No more than  
7 four applications of pepper spray are permitted, except that  
8 “[i]n exigent or unusual circumstances it may be necessary to  
9 exceed the 4 allowed applications.” Id. Additional applications  
10 must be specifically authorized by the First or Second Level  
11 Manager/AOD, and each must be explained on the video recording.  
12 Id. The Incident Commander and the Response Supervisor are  
13 required to consult with each other and “consider the totality of  
14 circumstances to determine the best course of action.” Id.  
15 Additional consultation is required for mentally ill inmates:

16 If the inmate is a participant in the mental  
17 health program and has not responded to staff  
18 for an extended period of time, including  
19 during the cool down period, laying  
20 motionless on bunk or floor, sitting on edge  
21 of bunk head down, no eye contact, and it  
22 appears that the inmate does not present an  
23 imminent physical threat, additional  
24 consideration and evaluation should occur  
25 before the use of chemical agents is  
26 authorized. This additional evaluation should  
27 include input from the assigned housing unit  
28 staff and licensed health care practitioners  
regarding the inmates recent behavior, file  
review for recent history of violence,  
previous cell extractions, etc. The rationale  
shall be explained on camera by the on-site  
Manager.

27 Id.

1 Amended DOM § 51020.15.1 limits the OC products that can be  
2 used in "one/two person celled housing, single person expanded  
3 metal holding cells, showers, or any other small space." Ex. A  
4 to Stainer Decl. (ECF No. 5111-1) at 16. In addition, this  
5 section contains specific language governing use of pepper spray  
6 in controlled use of force incidents involving mentally ill  
7 inmates at the EOP level of care or higher:

8 For controlled use of force incidents  
9 involving inmates housed in departmental  
10 hospitals, infirmaries, CTCs, EOPs, and PSUs,  
11 or who have an EOP level of care designation,  
12 a licensed health care employee designated by  
13 the Chief Executive Officer (CEO) shall be  
14 consulted prior to the use of chemical  
15 agents:

- 16 • The licensed health care practitioners  
17 shall document his/her recommendation  
18 regarding whether or not there is a  
19 contraindication for the use of chemical  
20 agents on a Medical Chrono (CDC 128C).  
21 This document shall be included in the  
22 incident package.
- 23 • If, during the consultation, the  
24 licensed health care practitioners  
25 express concerns regarding the use of  
26 chemical agents, the First/Second Level  
27 Manager authorizing the use of force and  
28 licensed health care practitioners shall  
discuss the matter to determine the best  
course of action. The licensed health  
care practitioner shall consider in  
providing their consultation, the  
potential for injury during the use of  
physical force, as well as the medical  
implication of exposure to chemical  
agents. After the consultation, the  
decision to use chemical agents or  
physical force shall rest with the First  
or Second Level Manager authorizing the  
use of force.

- 1                   • If a decision is made to use chemical  
2 agents in spite of any  
3 contraindications, the decision shall be  
4 articulated and written justification  
5 provided. The written justification must  
6 include specific determinations and  
7 considerations to justify the need to  
8 over-ride the contraindications, beyond  
the statement of safety to staff or  
security of the institution.  
Consideration shall be given to the  
inmate's mental health status and  
current mental state.

9 Id. at 16. Unlike amended DOM § 51020.12.2, the provisions of  
10 this section do not extend to "any inmate who is acting in a  
11 bizarre, unusual, uncharacteristic manner." See id.

12           In addition, the amended provisions stand in  
13 contradistinction to DOM § 51020.14.1, which prohibits the use of  
14 less lethal weapons on seriously mentally ill inmates "housed in  
15 departmental hospitals, infirmaries, or other CDCR medical  
16 facilities, or who have an EOP level of care designation" in  
17 controlled use of force incidents unless authorized by the  
18 Institution Head, Chief Deputy Warden, or AOD and  
19 "[c]ircumstances [are] serious in nature calling for extreme  
20 measures to protect staff or inmates, i.e., the inmate may be  
21 armed with a deadly weapon." Ex. A to Stainer Decl. (ECF No.  
22 4708-1) at 6.

23           Once again, the DOM revisions concerning controlled use of  
24 force evidence an effort to heighten consideration of the impact  
25 of UOF measures on mentally ill inmates. Nonetheless, it appears  
26 to the court that the measures do not meet Eighth Amendment  
27 standards.

28 ////

1 First, defendants' policy concerning controlled use of force  
2 on the seriously mentally ill inmate fails to require  
3 consideration of the inmate's ability to conform his or her  
4 conduct to the order or directive giving rise to the use of  
5 force. Defendants' expert, Steve Martin, testified that "without  
6 qualification" the inmate's ability to comply with orders must be  
7 considered if policy permits use of force for disobedience with  
8 an order, and that it is not appropriate to use of pepper spray  
9 to obtain compliance with orders a seriously mentally ill inmate  
10 cannot and does not understand. RT at 1871:14-25, 1872:6-24.  
11 This factor must be considered. Cf. Thomas v. Bryant, 614 F.3d  
12 at 1311.

13 Second, the policy revisions do not vest mental health  
14 clinicians with sufficient authority in decisions concerning use  
15 of force. In every instance, final decisionmaking responsibility  
16 and authority for all uses of force rest with custodial staff.  
17 While consultation with mental health staff is required, custody  
18 staff is authorized to override clinical judgments without  
19 sufficient guidance about which clinical judgments, if any, may  
20 be overridden and under what circumstances. Cf. Gates v. Gomez,  
21 60 F.3d 525, 533 (9<sup>th</sup> Cir. 1995) (interpreting consent decree;  
22 "since CMF is a prison health care facility, no custody decision  
23 should be made that is medically contraindicated.")

24 Mr. Stainer is to be commended for the steps he has taken to  
25 "tighten down" the use of force guidelines for use of force  
26 against members of the plaintiff class. The fact that additional  
27 work remains does not take away from the court's recognition that  
28 Mr. Stainer appears to have taken his responsibility in this area

1 seriously. The court anticipates that with continued diligence,  
2 full remediation can be achieved.

3 Defendants must complete the work begun by Mr. Stainer so  
4 that their policies and practices relative to use of force on  
5 seriously mentally ill inmates include (1) consideration of the  
6 role of mental illness in an inmate's ability to comply with  
7 staff directives; (2) adequate guidance concerning the role of  
8 mental health clinical judgments in use of force on class members  
9 and when, if ever, those judgments may be overridden by custody  
10 staff; and (3) alternatives to use of force on seriously mentally  
11 ill inmates where there is no imminent threat to life and force  
12 is contraindicated by the inmate-patient's mental health.<sup>22</sup>

13 Plaintiffs also challenge the use of the expandable baton on  
14 class members. Both plaintiffs' expert, Mr. Vail, and  
15 defendants' expert, Mr. Martin, agreed that the expandable baton  
16 is an impact weapon whose primary function is self-defense. See  
17 Vail Decl. (ECF No. 4638-1) at ¶¶ 31-32; Ex. 1 to Declaration of  
18 Lori E. Rifkin (ECF No. 4638-8) at 8. At the time of the  
19 hearing, the court heard testimony that the expandable baton is  
20 worn by California correctional officers as "standard issue" on  
21 their duty belts. RT at 88:18-23 (Vail); RT at 1811:5-9.  
22 Defendants' expert testified that there is not "sufficient  
23 guidance in either the regs or training materials" concerning the  
24 use of these batons. RT at 1812:17-19.

25 ////

26 \_\_\_\_\_  
27 <sup>22</sup> It appears to the court that the seeds of the solution to at least some of  
28 the foregoing are in the Program Guide and those DOM provisions that provide  
specific restrictions for use of force on inmate-patients at EOP and higher  
levels of care. See, e.g., DOM § 51020.14.1.

1           Although it is not clear, it appears that defendants'  
2 revised use of force policy may have changed the practice of  
3 standard issuance of expandable batons. See Ex. A to Stainer  
4 Decl. (ECF No. 5111-1) at 12 (DOM § 51020.12.3 including  
5 expandable baton in list of extraction equipment to "be issued"  
6 if extraction is necessary). Defendants will be directed to  
7 clarify this.

8           Defendants shall work under the guidance of the Special  
9 Master to make the additional revisions to the use of force  
10 policy and the clarifications and guidance concerning the use of  
11 the expandable baton required by this order. The Special Master,  
12 shall provide expertise where necessary, and shall ensure that  
13 plaintiffs are provided notice and an opportunity for input as  
14 appropriate. The revisions shall be completed within sixty days.

15           B. Disciplinary Measures

16           Plaintiffs also contend that further remedial orders are  
17 required to remedy the identified constitutional violation in  
18 defendants' use of disciplinary measures against mentally ill  
19 inmates. The constitutional violation was based in a finding  
20 that seriously mentally ill inmates "'who act out are typically  
21 treated with punitive measure without regard to their mental  
22 status.'" Coleman v. Wilson, 912 F.Supp. at 1320. The court  
23 found "substantial evidence in the record of seriously mentally  
24 ill inmates being treated with punitive measure by the custody  
25 staff to control the inmates' behavior without regard to the  
26 cause of the behavior, the efficacy of such measures, or the  
27 impact of those measures on the inmates' mental illnesses." Id.

28           In 1995, the violation was attributed in substantial part to

1 inadequate training of custody staff in the signs and symptoms of  
2 mental illness. Id. During the remedial phase of this action,  
3 defendants have developed a mental health assessment process for  
4 prison disciplinary proceedings involving most seriously mentally  
5 ill inmates. By September 2001, defendants had completed a final  
6 draft of a policy that required a mental health assessment of all  
7 EOP and MHCB inmates charged with rules violations "to determine  
8 if the behavior of the inmate resulting in the rule violation was  
9 influenced by a mental disorder." Ex. 3 to Declaration of Jane  
10 E. Kahn, filed May 29, 2013 (ECF No. 4640) at 34.

11 Formulation of policy for mental health assessment of CCCMS  
12 inmates charged with rules violations has proceeded more slowly.  
13 See Seventeenth Monitoring Report of the Special Master, Part B,  
14 filed April 2, 2007 (ECF No. 2180-1) at 44-47; Twenty-Third Round  
15 Monitoring Report of the Special Master, filed December 1, 2011  
16 (ECF No. 4124) at 31-39. The relevant history is set forth in  
17 the Special Master's Twenty-Third Round Monitoring Report. See  
18 Twenty-Third Round Monitoring Report (ECF No. 4124) at 31-39; see  
19 also Kahn Decl. (ECF No. 4640) at ¶¶ 19-20 (citing Twenty-Third  
20 Round Monitoring Report).

21 In August 2007, defendants were ordered to develop and plan  
22 "for identifying and developing changes necessary to broaden the  
23 impact of the then-existing mental health assessment process in  
24 CDCR prison disciplinary matters for 3CMS inmates." Twenty-Third  
25 Round Monitoring Report (ECF No. 4124) at 31-32. Initially  
26 defendants submitted a revised plan to the Special Master on May  
27 1, 2008, with several representations, including completion of a  
28 pilot by August 5, 2008, and a representation that by November 1,

1 2008 they would "develop an implementation plan that includes a  
2 procedure for effective monitoring of the RVR process." Id. at  
3 34. However, defendants submitted nothing further to the Special  
4 Master for over three years after the May 2008 report. Id.

5 In June 2011, after repeated requests from the Special  
6 Master, defendants produced a report on the pilot which showed  
7 that key elements had never been implemented or piloted. Id. at  
8 35-36. Moreover, the June 2011 report "concluded with a list of  
9 five actions for statewide application that bore very little  
10 resemblance to" the May 2008 plan and "signalled too much of a  
11 retreat for the original assessment process of 1998, when a  
12 mental health evaluation was required for every *Coleman* caseload  
13 inmate who received an RVR." Id. The Special Master reported  
14 that

15 [i]t appeared that defendants had lost sight  
16 of the original identified problem and the  
17 goal of the pilot to resolve that problem.  
18 Given the limited character of what  
19 defendants proposed as their plan,  
20 appropriate use of the mental health  
assessments in the disciplinary process for  
3CMS inmates may well have ended up being  
even more limited than it was before the plan  
was ordered.

21 Id. at 38.

22 On May 10, 2011, defendants circulated a new field  
23 memorandum directing completion of mental health assessments for  
24 3CMS inmates charged with the most serious disciplinary  
25 infractions. Id. Thereafter, the Special Master and the parties  
26 had a "handful of meetings in September and October 2011" which  
27 resulted in an agreement between the parties and approved by the  
28 Special Master for a newly revised policy for mental health

1 assessments for CCCMS inmates charged with rules violations. Id.  
2 at 38-39. In October 2011, defendants distributed a training  
3 plan. Id. At the time of the writing of the Twenty-Third Round  
4 Monitoring Report, the parties and the Special Master had agreed  
5 "that the training portion of the plan will be updated with  
6 regard to the definition and extent of the penalty-mitigation  
7 envisioned by the plan," that "CDCR staff will verify that the  
8 training is consistent with existing applicable Program Guide  
9 provisions," and that implementation and operation of the plan  
10 would "then be reviewed in the course of regular *Coleman*  
11 monitoring activities." Id.

12 At the hearing, plaintiff's expert Eldon Vail testified that  
13 CDCR's prison disciplinary process does not "systematically  
14 take[] into account the mental illness of inmates in their  
15 system, and the result is that inmates are often punished for  
16 their mental illness." RT at 464:21-465:2. Mr. Vail's opinion  
17 in this regard is based on, inter alia, review of "more than 268  
18 RVR reports," all of defendants' expert's file for the  
19 termination proceedings, and CDCR's RVR policies and procedures.  
20 Expert Declaration of Eldon Vail in Support of Reply Brief, filed  
21 August 23, 2013 (ECF No. 4766-2) at ¶ 2. Mr. Vail also testified  
22 that although defendants have policies and procedures designed to  
23 account for the role of mental illness in rules violations,  
24 defendants do not capture sufficient "aggregate data" to assess  
25 whether these policies and procedures are in fact working. RT at  
26 465:3-12. He testified that during his review he "looked at lots  
27 of examples, individual examples, granular examples" where they  
28 were not working. RT at 465:13-15.

1           The testimony of defendant's expert Steve Martin in this  
2 regard was similar. Mr. Martin testified that he reviewed over  
3 400 rules violation reports issued to inmates who refused orders  
4 to cuff up and were subsequently charged with obstructing or  
5 disobeying a peace officer and, where they were completed, the  
6 mental health assessment forms completed as part of the RVR  
7 process. RT at 1943:1-1944:19. He found that sometimes  
8 clinicians did a good job of explaining whether the inmate's  
9 mental illness caused or contributed to the incident and  
10 sometimes they did not. RT at 1944:20-1945:4. He also found  
11 "varying levels of communication between the clinical staff and  
12 custody as to how that mental health assessment process was  
13 working," with R.J. Donovan standing alone in the quality of  
14 communication between clinical and custodial staff in the rules  
15 violation process. RT at 1947:6-20. He testified that it was  
16 difficult to monitor what, if any, role the mental health  
17 assessment plays in the rules violation process. RT at 1948:2-  
18 16. He also testified that he rarely, if ever, found diversion  
19 of mentally ill inmates from sanctions even though in his opinion  
20 that "should happen" at least sometimes if the information on the  
21 form is properly gathered and used. RT at 1951:14-1952:8.<sup>23</sup>

22           Based on the foregoing, the issue relative to the  
23 disciplinary process turns on the adequacy of defendants'

24  
25 \_\_\_\_\_  
26 <sup>23</sup> The testimony at the evidentiary hearing was consistent with the uneven  
27 implementation of the RVR mental health assessment policy reported by the  
28 Special Master in his Twenty-Fourth and Twenty-Fifth Round Monitoring Reports.  
See Twenty-Fourth Round Monitoring Report (ECF No. 4205) at 87, 98, 108, 120,  
142, 155, 164, 180-81, 197-98, 208, 220-221, 232; Twenty-Fifth Round  
Monitoring Report (ECF No. 4298) at 98-99, 104, 114, 125, 128, 139-40, 145,  
159, 169, 193, 202, 219, 231, 242, 252, 267, 275, 288, 300, 310, 323-24, 336,  
346, 357, 365, 376, 382, 386, 389, 393, 399, 414, 424.

1 implementation of the plan agreed to by the parties and approved  
2 by the Special Master in 2011. Accordingly, the court will  
3 direct the Special Master to report to the court within six  
4 months whether defendants have adequately implemented the RVR  
5 policies and procedures agreed to in 2011.

6 At the hearing, the court also received evidence of a  
7 practice referred to as "Management Status." Director Stainer  
8 testified that "management status" was then part of local  
9 operating procedures at a majority of, but not all, prison  
10 institutions. RT at 887:7-12. He testified that it differed from  
11 the rule violation process because it was not imposed as part of  
12 the disciplinary process but is an alternative sanction imposed  
13 as an "indirect response to a set of threatening behaviors to  
14 stop those behaviors from continuing." RT at 889:15-21. He also  
15 testified that his office had received local operational  
16 procedures for management status from every prison that "has this  
17 process in their local operating procedure" and was "in the  
18 process of reviewing it for consistencies." RT at 888:6-14.  
19 His office was "going to come out with a formatted operational  
20 procedure for each institution to, again, fill in only site  
21 specific issues so we have a consistent application of those  
22 processes, making sure that appropriate due processes are in  
23 place for the inmates, and checks and balances for the  
24 application for these precautions in the management cell status"  
25 and to avoid "arbitrary placement of an individual on these type  
26 of sanctions." RT at 888:13-20, 891:2-3.<sup>24</sup>

---

27 <sup>24</sup> During the proceedings on plaintiffs' motion concerning segregated housing,  
28 the court also heard testimony about the use of management cells in  
administrative segregation units. Plaintiffs' expert, Dr. Haney, described

1 Defendants will be directed to work with the Special Master  
2 on a timeline for completion of the review process testified to  
3 by Mr. Stainer so that defendants' use of management status can  
4 be reviewed by the Special Master as part of his review of the  
5 implementation of defendants' RVR policies and procedures.

6 IV. Segregated Housing

7 By their May 6, 2013 motion, plaintiffs seek additional  
8 remedial orders related to housing of seriously mentally ill  
9 inmates in administrative segregation and segregated housing  
10 units. Serious issues concerning placement of class members in  
11 administrative segregation and segregated housing units have  
12 plagued this litigation since its inception.

13 In 1995, the court found that defendants were violating the  
14 Eighth Amendment in housing mentally ill inmates in  
15 "administrative segregation and segregated housing at Pelican  
16 Bay SHU and statewide . . . because mentally ill inmates are  
17 placed in administrative segregation and segregated housing  
18 without any evaluation of their mental status, because such  
19 placement will cause further decompensation, and because inmates  
20 are denied access to necessary mental health care while they are  
21 housed in administrative segregation and/or segregated housing.'" Coleman v. Wilson, 912 F.Supp. at 1380 (internal citation  
22 omitted).

23  
24 As recently as last year, it was evident that the  
25 constitutional violation had not been remedied. In the April  
26 2013 order denying defendants' termination motion, the court  
27 them as "punishment cells" and he testified that he interviewed class members  
28 inside these cells but could not find any standards for their use in Title 15.  
RT at 2186:18-2187:25.

1 specifically identified the need to address "ongoing issues  
2 related to placement of EOP (Enhanced Outpatient) inmates in  
3 administrative segregation, particularly those housed in such  
4 units for over 90 days" as a "'critically important' goal[] . . .  
5 necessary to remedy the Eighth Amendment violation in this  
6 action." Coleman v. Brown, 938 F.Supp. at 969 (internal citation  
7 omitted). Specifically, the court found this "critical goal"

8 centers on treatment of mentally ill inmates  
9 in administrative segregation, particularly  
10 those whose stays in these units exceed  
11 ninety days and those who are placed in  
12 administrative segregation for non-  
13 disciplinary reasons. These inmates face  
14 substantial risk of serious harm, including  
15 exacerbation of mental illness and potential  
16 increase in suicide risk. See Twenty-Fifth  
17 Round (ECF No. 4298) at 36. The evidence  
18 before the court shows that a  
19 disproportionate number of inmate suicides  
20 occur in administrative segregation units.  
21 Remedial efforts over the past six years have  
22 focused on reducing the length of time EOP  
23 inmates remain in administrative segregation  
24 and providing appropriate clinical care for  
25 EOP inmates housed in such units. See id. at  
26 34-35.

19 In their motion, defendants contend that they  
20 have "developed and implemented procedures  
21 for placing and retaining inmates with mental  
22 health needs in any administrative  
23 segregation or security housing unit."  
24 Termination Motion (ECF No. 4275-1) at 29.  
25 Defendants contend that while mentally ill  
26 inmates are in these units their mental  
27 health needs are "being appropriately met"  
28 and that there is no evidence to the  
contrary. Id. This contention is not  
supported by defendants' own experts.

Defendants' experts describe the "environment  
of administrative segregation" as "generally  
non-therapeutic." Clinical Exp. Rpt. (ECF No.

1 4275-5) at 20. They recommend that housing  
2 inmates with serious mental disorders be "as  
3 brief as possible and as rare as possible."  
4 Id. at 25.FN41 Defendants' experts noted the  
5 "statistical overrepresentation of completed  
6 suicides" in administrative segregation units  
7 when compared to other housing units,  
8 accordingly, recommend that "placement of  
9 inmates who require an EOP level of care be  
10 housed in Administrative Segregation Units  
11 only when absolutely necessary for the safety  
12 of staff or other inmates, and only for as  
13 long as it absolutely necessary." Id. at 23.  
14 They also reported finding, at two prisons,  
15 "some inmates waiting for EOP Special Needs  
16 Yard beds and reportedly housed in an  
17 Administrative Segregation Unit for their own  
18 protection; not because they posed a danger  
19 to others." Id. at 21.FN42 They recommended  
20 that such inmates be "placed in the front of  
21 any waiting list." Id.

22 FN41. They also "applaud CDCR's efforts to  
23 expedite the transfer of EOP inmates out of  
24 administrative segregation" but they don't  
25 describe what those efforts are. Id. at 20.

26 FN42. Defendants' experts describe a single  
27 case at California Medical Facility (CMF) as  
28 having "no systemic implications" but they  
reiterate their recommendation that such  
inmates be "moved to the top of the transfer  
list." Id. at 24.

In the Twenty-Fifth Round Report, the Special  
Master reported an ongoing need for  
improvement in treatment provided to inmates  
needing an Enhanced Outpatient (EOP) level of  
care who are placed into administrative  
segregation units. See Twenty-Fifth Round  
Report (ECF No. 4298) at 34-38. The Special  
Master reports an "elevated proportion of  
inmates in administrative segregation who are  
mentally ill" and describes a series of  
issues to be addressed, including

reduction of risks of decompensation  
and/or suicide, alternatives to use of  
administrative segregation placements

1 for non-disciplinary reasons, access to  
2 treatment/mitigation of harshness of  
3 conditions in the administrative  
4 segregation units, suicide prevention,  
and reduction of lengths of stay in  
administrative segregation.

5 Id. at 38. The Special Master's findings  
6 identify remaining issues that are also  
7 identified by defendants' experts. These  
8 issues, until remedied, mean that seriously  
9 mentally ill inmates placed in administrative  
segregation units continued to face a  
substantial risk of harm.

10 Id. at 979-980.<sup>25</sup> The principal question before the court is  
11 whether there have been sufficient changes in defendants' present  
12 policies and practices over the past year to cure the identified  
13 systemic constitutional violations and, if not, whether  
14 additional remedies are necessary.<sup>26</sup>

15 Defendants oppose plaintiffs' motion in part by contesting

---

16 <sup>25</sup> Most of the issues at bar were the subject of a series of meetings convened  
17 by the Special Master in October 2012. See Twenty-Fifth Round Monitoring  
18 Report (ECF No. 4298) at 34-38. Two meetings were held in 2012, and the  
19 Special Master intended to continue with the meetings and report on progress  
20 in subsequent monitoring reports. Id. at 38. "Among the issues to be  
21 addressed in upcoming meetings [we]re the elevated proportion of inmates in  
22 administrative segregation who are mentally ill, reduction of risks of  
decompensation and/or suicide, alternatives to use of administrative  
segregation placements for non-disciplinary reasons, access to  
treatment/mitigation of harshness of conditions in the administrative  
segregation units, suicide prevention, and reduction of lengths of stay in  
administrative segregation." Id. It is apparent that defendants' termination  
motion and the ensuing litigation interrupted that process.

23 <sup>26</sup> Plaintiffs make a series of contentions and seek a variety of orders. The  
24 specific issues presented in the motion can be divided into six categories:  
25 (1) whether certain class members should be excluded from segregated housing  
26 altogether; (2) whether class members are improperly housed in disciplinary  
27 segregation units for non-disciplinary reasons; (3) whether class members are  
28 held in both administrative segregation and segregated housing units for  
excessive periods of time; (4) whether the mental health treatment program for  
administrative segregation units is adequate; (5) whether defendants perform  
adequate welfare checks on class members housed in segregation; and (6)  
whether security measures used in segregation units, including strip searches  
and holding cages, violate the Eighth Amendment rights of class members.

1 the evidence and opinions of plaintiffs' expert, Dr. Craig Haney,  
2 concerning the harmful effects of segregated housing on certain  
3 mentally ill inmates. Defendants contend that "Dr. Haney's  
4 opinions are derived from studies that do not stand up to modern  
5 scientific scrutiny." Defs. Opp. to Pls.' Mot. Related to  
6 Housing and Treatment of Mentally Ill Inmates in Segregation,  
7 filed July 24, 2013 (ECF No. 4712), at 12. Defendants tendered  
8 their own expert, Dr. Charles Scott, who summarized "various  
9 longitudinal studies" and avers that those studies "indicate that  
10 segregation does not cause the type and severity of psychological  
11 harm previously described in descriptive studies." Declaration  
12 of Charles Scott, M.D., filed July 24, 2013 (ECF No. 4715) at ¶  
13 28. At the hearing, Dr. Scott testified concerning two of those  
14 studies, the only two studies he relied on, the so-called Zinger  
15 study published in the Canadian Journal of Criminology in January  
16 2001 and the so-called O'Keefe study published in 2013 in the  
17 Journal of the American Academy of Psychiatry Law. See Exs. 1  
18 and 2 to Defs. Ex. WWW.

19 The court is not persuaded by the conclusions Dr. Scott  
20 draws from those studies. First, both studies expressly reject  
21 extrapolation of their findings to other jurisdictions. See Ex.  
22 2 to Defs. Ex. WWW at 32-33 (Zinger study cautions that "it would  
23 be ill advised to attempt to extrapolate the findings of this  
24 study (a) beyond 60 days of administrative segregation, and (2)  
25 to other jurisdictions. For example, the findings of this study  
26 are somewhat irrelevant to current segregation practices in the  
27 United States where prisoners can sometimes be segregated for  
28 years for disciplinary infractions with virtually no

1 distractions, human contacts, services, or programs."); see also  
2 Ex. 1 to Defs. Ex. WWW at 11-12 ("Although this study  
3 incorporated several design features that improved on the  
4 capacity of previous research to draw conclusions about the  
5 effects of AS [Administrative Segregation], there are several  
6 limitations that affect its generalizability to other settings .  
7 . . segregation conditions vary from state to state on a host of  
8 variables, including average duration of AS, double-bunking,  
9 televisions, exercise, selection criteria for AS, and quality and  
10 quantity of mental health and medical services. Thus, the  
11 results of the study can be generalized only to other prisons  
12 systems to the extent that their conditions of AS confinement are  
13 similar to Colorado's<sup>27</sup>." )<sup>28</sup> Second, in response to a question  
14 from the court, Dr. Scott agreed that there were studies he had  
15 confidence in "which demonstrate that . . . going to ad seg has  
16 no consequences for the mentally ill," "primarily the O'Keefe and  
17 Metzner study . . . [b]ut the Zinger was sort of a precursor to  
18 that." RT at 3359:13-23. The O'Keefe study specifically eschews  
19 such confidence:

20           This study was not designed to address the  
21           question of whether segregation is an  
22           appropriate confinement option for offenders,  
             including those with serious and persistent

23 \_\_\_\_\_  
24 <sup>27</sup> Dr. Scott testified to what he understands to be some of the "similarities  
25 and differences between the California ad seg and the Colorado ad seg." RT at  
26 3344:14-16. Because he has never visited a California segregation unit, he  
27 compared descriptions in the O'Keefe article with provisions of the CDCR  
28 Mental Health Program Guide. RT at 3344:14-3345:6. He testified that he did  
not know whether the prisons are conforming to the requirements of the Program  
Guide. RT at 3344:2-3345:3.

<sup>28</sup> The O'Keefe study also cautioned that the conclusions of the Zinger study  
"must be interpreted cautiously" due to "high refusal and attrition rates."  
Ex. 1 to Defs. Ex. WWW at 3.

1 mental illness. We are unaware of any  
2 treatment guidelines that suggests that long-  
3 term confinement in an AS environment would  
4 be clinically helpful. . . . We do not  
5 claim, nor believe, that these data  
6 definitively answer the question of whether  
7 long-term segregation causes psychological  
8 harm. . . . Frankly, having seen individuals  
9 in psychological crisis in segregation, we  
10 were surprised that such effects did not  
11 appear in these data. We believe that this  
12 study moves us forward, but that future  
13 research will shed additional light on this  
14 crucial question.

15 Ex. 1 to Defs. Ex. WWW at 12.

16 Despite Dr. Scott's testimony, the court concludes that  
17 confinement in California's administrative segregation units  
18 presents significant risks for seriously mentally ill  
19 individuals. As recently as last year, defendants' own experts  
20 reported on the harsh, "generally non-therapeutic" environment of  
21 California's administrative segregation units and recommended  
22 that the lengths of stay in such units be minimized for seriously  
23 mentally ill inmates. Coleman v. Brown, 938 F.Supp.2d at 979  
24 (citing Clinical Exp. Rpt. (ECF No. 4275-5) at 20, 25). In  
25 addition, a disproportionately high rate of inmate suicides occur  
26 in these units. See Coleman v. Brown, 938 F.Supp.2d at 955. At  
27 the hearing, both parties introduced evidence of the number of  
28 inmate suicides in 2012 and 2013. Pls. Ex. 2781; Defs. Ex.  
29 LLLL.<sup>29</sup> Defendants argue that the number of class member suicides

---

<sup>29</sup> The source of the data depicted in defendants' Ex. LLLL is not clear from the exhibit itself. Dr. Belavich testified that his attorney worked with Dr. Belavich's staff to prepare the chart. RT at 3704:24-3705:1. Dr. Belavich testified, inter alia, that he "trusted" that his staff's numbers "agreed with those" reported by the Special Master. RT at 3707:5-9. As it turns out, the numbers are not in complete agreement. Defendants' Ex. LLLL shows 33 inmate suicides in 2011. The Special Master reported 34 inmate suicides in 2011, a

1 in administrative segregation declined in 2013, and that "the  
2 number of class members who have committed suicide within  
3 segregation units, even considering those in Security Housing  
4 Units and Psychiatric Units, is not disproportionate to those  
5 outside the class." Defs. Post-Evidentiary Hearing Brief (ECF  
6 No. 4988) at 12. This argument misses the mark.

7 The findings concerning disproportion in inmate suicides in  
8 California's administrative segregation units are based on the  
9 suicide rate in ASUs, PSUs, and SHUs,<sup>30</sup> as compared to the suicide  
10 rate in non-segregated housing units. See Report on Suicides  
11 Completed in the California Department of Corrections and  
12 Rehabilitation January 1, 2012-June 30, 2012 (First Half 2012  
13 Suicide Report) (ECF No. 4376) at 16 (the most meaningful  
14 measurement for assessing trends over time is "the number of  
15 suicides per inmate and the rate of suicides (i.e. the number of  
16 suicides per 100,000 inmates) *within* segregated housing units, as  
17 compared to the incidence and rate of suicides in non-segregated  
18 housing.") The suicide rate is derived from the total number of  
19 inmate suicides in these units, not just those committed by  
20 inmates who were at the time of their deaths identified at a  
21 level of care in the mental health services delivery system. See,  
22 e.g., First Half 2012 Suicide Report (ECF No. 4376) at 4, 43;

---

23 fact vigorously disputed by defendants. See Orders filed March 15, 2013 (ECF  
24 No. 4394) and March 22, 2013 (ECF No. 4435). Ultimately this court overruled  
25 defendants' objections and denied their motion to modify the number of inmate  
suicides reported by the Special Master for 2011. See Order filed March 22,  
2013 (ECF No. 4435).

26 <sup>30</sup> Inmate suicides in California's condemned unit, while reported by the  
27 Special Master, have not been included in the raw number of segregation unit  
suicides. See, e.g., Report on Suicides Completed in the California Department  
28 of Corrections and Rehabilitation in Calendar Year 2011 (2011 Suicide Report)  
(ECF No. 4308) at 6, 26.

1 2011 Suicide Report (ECF No. 4308) at 6, 26. Thirteen of the  
2 thirty-two inmate suicides in CDCR prisons in 2012 were committed  
3 in ASUs, PSUs, and SHUs. Pls. Ex. 2781. Through December 17,  
4 2013, the same number - thirteen - of twenty-eight inmate  
5 suicides were committed in ASUs, PSUs, and SHUs. Id. Thus, the  
6 raw number of inmate suicides is unchanged and defendants'  
7 exhibit does not reflect the suicide rate.

8 Defendants acknowledge disproportion in the number of inmate  
9 suicides in administrative segregation. See Annual Report of  
10 Suicides in the CDCR During 2012, Ex. 2 to Declaration of Margot  
11 Mendelsohn filed February 5, 2014 (ECF No. 5051-1) at 18-19. The  
12 disproportion is evidence of the high risk environment in  
13 California's administrative segregation units, a risk faced by  
14 all inmates housed in those units and particularly those with a  
15 serious mental illness, a risk defendants have acknowledged.<sup>31</sup>  
16 See id. at 18. ("CDCR continues to treat segregation units as  
17 high-risk environments for vulnerable inmates, particularly  
18 during the period soon after placement.")

19 Together with the court's original findings and its findings  
20 on defendants' termination motion, the foregoing findings and the  
21 overwhelming weight of evidence in the record is that placement  
22 of seriously mentally ill inmates in California's segregated  
23 housing units can and does cause serious psychological harm,

---

24  
25 <sup>31</sup> The fact that in 2012, eleven of the thirteen were part of the mental health  
26 services delivery system at the time of their deaths, while only six of the  
27 thirteen were so identified in 2013 may be as suggestive of additional  
28 problems in California's administrative segregation units, including  
inadequate mental health assessments and suicide risk, or it might be of  
improvements that have reduced for one year the number of class member  
suicides in administrative segregation. That question is not before the court  
at this time.

1 including decompensation, exacerbation of mental illness,  
2 inducement of psychosis, and increased risk of suicide. The  
3 question before the court is whether defendants have made  
4 progress since last year sufficient to remediate these serious  
5 risks of harm, or whether additional orders are required.

6 A. Administrative Segregation

7 State regulations require administrative segregation of  
8 inmates whose safety is jeopardized in the general population as  
9 well as inmates who pose threats to the safety of others or  
10 "jeopardize[]the integrity of an investigation of an alleged  
11 serious misconduct or criminal activity." 15 C.C.R. § 3335(a).<sup>32</sup>  
12 Placement in administrative segregation may be for disciplinary  
13 or non-disciplinary reasons. See 15 C.C.R. §§ 3335, 3338; see  
14 also RT at 2898:2-2899:15; 2907:17-2908:19; Reply Austin Decl.  
15 (ECF No. 4762) at ¶ 18. "Administrative segregation may be  
16 accomplished by confinement in a designated segregation unit or,  
17 in an emergency, to any single cell unit capable of providing  
18 secure segregation." 15 C.C.R. §3335(a). Administrative  
19 Segregation Units (ASUs) are distinguished from Segregated  
20 Program Housing Units (Security Housing Units (SHUs) and  
21 Psychiatric Services Units (PSUs) in that ASUs "are generally  
22 temporary segregation housing units which, as the name implies,  
23 are to administratively review the need for segregation, whereas  
24 Segregated Program Housing [Units] . . . are designed for

25 <sup>32</sup> The regulation provides: "When an inmate's presence in an institution's  
26 general population presents an immediate threat to the safety of the inmate or  
27 others, endangers institution security or jeopardizes the integrity of an  
28 investigation of an alleged serious misconduct or criminal activity, the  
inmate shall be immediately removed from general population and be placed in  
administrative segregation." 15 C.C.R. §3335(a).

1 extended term programming." Declaration of Kathleen Allison,  
2 filed July 24, 2013 (ECF No. 4713) at ¶ 9.

3 Certain reasons for removal of an inmate from the general  
4 population are not considered administrative segregation. See 15  
5 C.C.R. § 3340. Two of those exclusions are relevant to the  
6 motion at bar:

7 (a) Medical. When an inmate is involuntarily  
8 removed from general inmate status for  
9 medical or psychiatric reasons by order of  
10 medical staff and the inmate's placement is  
11 in a hospital setting or in other housing as  
12 a medical quarantine, the inmate will not be  
13 deemed as segregated for the purpose of this  
14 article. When personnel other than medical  
15 staff order an inmate placed in  
16 administrative segregation for reasons  
17 related to apparent medical or psychiatric  
18 problems, that information will be  
19 immediately brought to the attention of  
20 medical staff. The appropriateness of  
21 administrative segregation or the need for  
22 movement to a hospital setting will be  
23 determined by medical staff. When medical and  
24 psychiatric reasons are involved, but are not  
25 the primary reasons for an inmate's placement  
26 in administrative segregation, administrative  
27 segregation status will be continued if the  
28 inmate is moved to a hospital setting and the  
requirements of this article will apply.

(b) Orientation and Lay-Over. Newly received  
inmates and inmates in transit or lay-over  
status may be restricted to assigned quarters  
for that purpose. Such restrictions should  
not be more confining than is required for  
institution security and the safety of  
persons, nor for a period longer than the  
minimum time required to evaluate the safety  
and security factors and reassignment to more  
appropriate housing.

15 C.C.R. § 3340(a), (b).

1 Prior to amendments discussed infra, all inmates assigned to  
2 administrative segregation were placed in Privilege Group D. See  
3 Defs. Ex. 000, Initial Statement of Reasons at 1. Placement in  
4 this highly restrictive group removes all family visits and  
5 access to "recreational or entertainment activities" and limits  
6 canteen draw, telephone calls, and personal property as follows:

7 (A) No family visits.

8 (B) One-fourth the maximum monthly canteen  
9 draw as authorized by the secretary.

10 (C) Telephone calls on an emergency basis  
11 only as determined by institution/facility  
staff.

12 (D) Yard access limited by local  
13 institution/facility security needs. No  
14 access to any other recreational or  
entertainment activities.

15 (E) The receipt of one personal property  
16 package, 30 pounds maximum weight, per year,  
17 exclusive of special purchases as provided in  
18 Section 3190. Inmates shall be eligible to  
acquire a personal property package after  
completion of one year of Privilege Group D  
assignment.

19 15 C.C.R. § 3044(g)(3).

20 1. Non-Disciplinary Segregation

21 In late 2013, defendants created and began to implement a  
22 new classification identified as nondisciplinary segregation  
23 (NDS). RT at 2904:12-2905:17; see also Defs. Ex. 000. Non-  
24 Disciplinary Segregation is "Segregated housing placement for  
25 administrative reasons to include, but not limited to: ASU  
26 placement for safety concerns, investigations not related to  
27 misconduct or criminal activity, and/or being a relative or an  
28

1 associate of a prison staff member." RT at 2908:6-16. The Non-  
2 Disciplinary Segregation (NDS) classification is designed to  
3 "afford inmates segregated in ASU for non-disciplinary reasons  
4 privileges more consistent, but not identical, with their pre-  
5 segregation privilege group." Defs. Ex. 000, Initial Statement  
6 of Reasons at 1. Inmates placed in the NDS category are still  
7 "limited to non-contact visits due to safety and security  
8 concerns as well as assisting in the prevention of contraband  
9 into the ASU." Id. at 2. In addition, yard access for NDS  
10 inmates is "limited by local institution/security needs and NDS  
11 inmates may be permitted to participate and have access to  
12 programs, services, and activities as can reasonably be provided  
13 in the unit without endangering the security and safety of  
14 persons, . . . ." Id.

15 At present, a "significant number" of Coleman class members  
16 are placed in administrative segregation units for non-  
17 disciplinary reasons, including safety concerns and lack of  
18 appropriate bed space. See RT at 2222:25-2227:6; RT at 2255:5-  
19 2256:20.<sup>33</sup> Defendants do not have separate housing units for  
20 disciplinary administrative segregation and non-disciplinary

---

21 <sup>33</sup> The evidence concerning the number of class members in administrative  
22 segregation for non-disciplinary reasons was imprecise for a variety of  
23 reasons. See, e.g., RT at 2428:1-25 (testimony of Craig Haney); RT at  
24 3182:11-3186:18 (testimony of Kathleen Allison concerning differences between  
25 placement in administrative segregation for safety concerns versus non-  
26 disciplinary segregation classification and percentages of inmates in  
27 administrative segregation). While defendants offered evidence that only a  
28 "small number" of class members had been classified in the non-disciplinary  
segregation category, see Defs. Ex. QQQ, it is evident that the process of  
classifying inmates into the NDS category is ongoing and the number of inmates  
on Ex. QQQ does not represent the total number of class members housed in  
administrative segregation units for non-disciplinary reasons. See  
RT:2987:23-2988:6. Moreover, Ms. Allison testified at her deposition that  
twenty to thirty percent of inmates in administrative segregation were there  
for nondisciplinary reasons. RT at 3185:11-3186:18.

1 segregation placements or for inmates housed in administrative  
2 segregation pending transfer to an appropriate bed. See Reply  
3 Austin Decl. (ECF No. 4762) at ¶ 38. Defendants' new regulations  
4 say that "when practical and feasible" individual prison  
5 institutions should try to "cluster" inmates with a non-  
6 disciplinary segregation classification "into a specific section"  
7 within an administrative segregation unit. RT at 2964:23-  
8 2965:12. Dr. Haney testified that it is a "very unusual  
9 phenomenon," a "bad mix," and a "questionable" correctional  
10 practice to place inmates with safety concerns in the same  
11 segregation unit as inmates placed there for disciplinary  
12 reasons. RT at 2254:7-21.

13       Between 2007 and 2012, roughly half of the suicides in  
14 California's administrative segregation units were by inmates in  
15 administrative segregation for non-disciplinary reasons. RT at  
16 2242:15-23; Pls. Ex. 2048. In January 2013, Dr. Robert Canning,  
17 defendants' Suicide Prevention Coordinator, issued a report  
18 analyzing CDCR suicides during this period. Pls. Ex. 2049. In  
19 his report, he noted that

20               data collected by suicide evaluators found  
21               that many inmates who housed in ASU at the  
22               time of their deaths are placed there not for  
23               disciplinary reasons, but for safety reasons.  
24               Although there are many complexities  
25               surrounding these situations, it is worth  
26               noting that placement in ASU of already  
27               fearful inmates may only serve to make them  
28               even more fearful and anxious, which may  
29               precipitate a state of panicked desperation,  
30               and the urge to die.

31       Id. at 2. Plaintiffs' expert, Dr. Haney, agreed with this  
32 opinion. RT at 2244:11-25.

1           Because of the absence of separate housing units, even with  
2 the new NDS classification class members in administrative  
3 segregation for non-disciplinary reasons are still subject to  
4 several significant restrictions placed on inmates housed in  
5 administrative segregation for disciplinary reasons, including no  
6 contact visits, significant limits on access to both exercise  
7 yards and dayroom, eating all meals in their cells, and being  
8 placed in handcuffs and restraints when being moved outside their  
9 cells. RT at 3200:1-19. Class members in administrative  
10 segregation for non-disciplinary reasons often receive mental  
11 health treatment in confined spaces described by plaintiffs'  
12 expert as "treatment cages." RT at 2167:20-23 (Haney). They are  
13 subjected to strip searches each time they leave their housing  
14 unit for mental health treatment and each time they return. RT  
15 at 2173:20-2175:14. Dr. Haney testified that in his opinion this  
16 practice "serves as a disincentive" for mentally ill inmates to  
17 go to treatment because the searches are "humiliating and  
18 degrading." RT at 2175:15-2176:6.

19           During the hearing, defendants presented the court with a  
20 memorandum dated December 3, 2013 limiting to thirty and sixty  
21 days respectively administrative segregation placements of EOP  
22 and CCCMS inmates with an NDS classification. Defs. Ex. RRR.<sup>34</sup>  
23 The memorandum includes deadlines for presentation of these cases  
24 to a classification staff representative (CSR) to "facilitate the  
25

---

26 <sup>34</sup> The NDS classification designation must be made by an Institution  
27 Classification Committee (ICC) and it takes ten calendar days from the time an  
28 inmate arrives in administrative segregation to be seen by an ICC for  
classification. RT at 2989:1-11. Thus, the total length of stay for NDS  
inmate-patients under the new policy would actually be forty days for EOP  
inmates and seventy days for CCCMS inmates.

1 CSR referral, endorsement, and transfer process." Id. Finally,  
2 it requires reporting of all such cases that exceed the deadline  
3 to the relevant institution's Associate Director, who "shall  
4 provide assistance and support when appropriate to the  
5 institutions to remedying identified impediments to release or  
6 transfer." Id. Given the significant mental health risks posted  
7 by placement in these units, these times frames are too long.

8        Seriously mentally ill inmates in administrative segregation  
9 for non-disciplinary reasons have done nothing to transgress the  
10 rules of the institution. They are generally in need of  
11 protection or placement where they have access to necessary  
12 mental health services. The only explanation offered in the  
13 record for California's failure to have separate units for  
14 disciplinary and non-disciplinary segregation is the overcrowded  
15 conditions that have plagued the prison system for at least a  
16 decade. See Reply Austin Decl. (ECF No. 4762) at ¶ 39. The only  
17 explanations tendered for defendants' failure to expedite  
18 transfer of class members in administrative segregation for non-  
19 disciplinary reasons, including safety concerns and lack of  
20 appropriate bed space, are overcrowded prison conditions, an  
21 insufficient number of buses to accomplish timely transfers, and  
22 the length of time it takes to complete the administrative  
23 processes required for transfer. See id. at ¶¶ 39, 44; see also  
24 RT at 2129:13-24; RT:3190:1-3191:24.<sup>35</sup> None of these explanations

25 \_\_\_\_\_  
26 <sup>35</sup> Defendants have a separate transportation system for inmates who require  
27 transfer to Mental Health Crisis Beds. See RT at 3462:17-3463:12. Ms.  
28 Allison testified that defendants have considered using this system "as an  
option" to expedite transfers of NDS EOP inmates from administrative  
segregation units. RT at 3221:24-3222:3.

1 justify subjecting these class members to these conditions for  
2 these periods of time.

3 Plaintiffs' expert, Dr. James Austin, testified that there  
4 is "no reason" to hold class members in non-disciplinary  
5 segregation for these period of time, and that in states he works  
6 in, inmates who need to be transferred to an appropriate mental  
7 health bed placement are transferred within twenty-four hours.  
8 RT at 3021:8-3022:11. CDCR's then Acting Statewide Director of  
9 Mental Health, Dr. Timothy Belavich,<sup>36</sup> agrees that mentally ill  
10 inmates in administrative segregation for non-disciplinary  
11 reasons should be moved to an appropriate program "as quickly" as  
12 possible. RT at 3563:7-12, 3564:17-21.

13 Mentally ill inmates in administrative segregation for non-  
14 disciplinary reasons "are treated, for obvious intents and  
15 purposes, as if they are in an administrative segregation prison  
16 there for disciplinary reasons even though they're not." RT at  
17 2167:20-2168:4; see also Reply Austin Decl. (ECF No. 4762) at ¶  
18 45 (even with new NDS classification "'non-disciplinary'  
19 prisoners will still be mixed with disciplinary or disruptive  
20 prisoners in the same segregation units and be subject to the  
21 same custodial restrictions, including very limited out-of-cell  
22 time and no access to work, education, and other meaningful  
23 programs.") Dr. Haney testified that it is "utterly  
24 inappropriate" to house these inmates in these units "on more  
25 than a very short-term basis." RT at 2224:11-12.

26 We're talking about mental patients who are  
27 now not only vulnerable because they're

28 <sup>36</sup> Dr. Belavich is now the Director of CDCR's Division of Health Care Services.

1 mental patients but vulnerable because they  
2 have safety concerns, being placed in an  
3 environment that we know is harmful to the  
4 mental health of the mentally ill prisoners  
5 who are placed there.

6 So they are doubly at risk. They go in as  
7 vulnerable mental health prisoner, . . . who  
8 are now at risk and all the psychological  
9 burden that carries with it, and they're  
10 placed in an environment in which they're in  
11 isolation and locked in their cells basically  
12 23 hours a day.

13 RT at 2224:21-2225:7. Dr. Haney also testified that although  
14 such mixed placements "could be done on an expedient basis" if  
15 there is nowhere else to put an inmate with safety concerns, that  
16 should be accompanied by a sense of urgency to move the inmate  
17 with safety concerns to a non-administrative or lockdown setting.

18 RT at 2254:22-2255:4.

19 In December 2012, defendants issued an operational plan for  
20 disabled inmates covered by the Armstrong class action.<sup>37</sup> The  
21 operational plan covers Armstrong class members housed in  
22 administrative segregation "due solely to a lack of appropriate  
23 accessible General Population (GP) housing (including Sensitive  
24 Needs GP)." Ex. 9 to Declaration of Jane Kahn filed May 6, 2013  
25 (ECF No. 4582) at 97. The procedure set forth in the model plan  
26 sets forth specific procedures for these inmates, requires that  
27 they be moved out of administrative segregation within 48 hours,  
28 and provides specific notice procedures for three business days  
following initial placement of these inmates in administrative  
segregation. Id. There is no apparent reason for the  
distinction between Armstrong & Coleman class members.

---

<sup>37</sup> Armstrong v. Brown, No. C94-2307 CW (N.D.Cal.)

1 For all of the foregoing reasons, the court finds that  
2 placement of seriously mentally ill inmates in the harsh,  
3 restrictive and non-therapeutic conditions of California's  
4 administrative segregation units for non-disciplinary reasons for  
5 more than a minimal period necessary to effect transfer to  
6 protective housing or a housing assignment violates the Eighth  
7 Amendment.<sup>38</sup> The record suggests several options to remedy this  
8 constitutional violation, including but not limited to creation  
9 of separate units for disciplinary and non-disciplinary  
10 segregation, or adoption of a policy modeled on the Armstrong  
11 operational plan for Coleman class members. Defendants will be  
12 required, within thirty days, to present the court with a plan to  
13 remedy this ongoing violation and they shall be prepared to  
14 implement the plan within thirty days thereafter. Defendants  
15 shall commence forthwith to reduce the number of Coleman class  
16 members housed for non-disciplinary reasons in any administrative  
17 segregation unit that houses disciplinary segregation inmates.  
18 Commencing sixty days from the date of this order, defendants  
19 will be prohibited from placing any Coleman class member in any  
20 administrative segregation unit that houses disciplinary  
21 segregation inmates for a period of more than seventy-two hours  
22 if the placement is for non-disciplinary reasons including but  
23 not limited to safety concerns or lack of appropriate bed space.

24 ////

25 \_\_\_\_\_  
26 <sup>38</sup> It is settled that prison inmates have no liberty interest in remaining in  
27 the general prison population and that the due process clause is not violated  
28 by the transfer of prison inmates to more restrictive settings for non-  
punitive reasons. See, e.g., Anderson v. County of Kern, 45 F.3d 1310, 1315  
(9<sup>th</sup> Cir. 1995). They do, however, retain the protections of the Eighth  
Amendment in such settings. See Sandin v. Conner, 515 U.S. 472, 487 n.11.

1           2.   Placement/Retention/Return to Administrative Segregation

2           Plaintiffs raise a number of issues related to placement of  
3 at risk class members in administrative segregation, lengths of  
4 stay in administrative segregation units, and adequacy of care  
5 provided particularly to EOP inmate-patients. At the core,  
6 resolution of these issues turns on a common question: what is  
7 the proper role of mental health clinicians in the housing  
8 decisions presented when seriously mentally ill inmates must be  
9 removed from a prison's general population for disciplinary  
10 reasons.<sup>39</sup> As with the issues related to use of force and rules  
11 violation reports already discussed, defendants have not yet  
12 adequately incorporated necessary clinical judgments into these  
13 decisions.

14           The evidence tendered at the hearing demonstrates that the  
15 role of the mental health clinician is integral to placement  
16 decisions in two separate but related ways. In relevant part,  
17 the Eighth Amendment prohibits placements of seriously mentally  
18 ill inmates in conditions that pose a substantial risk of  
19 exacerbation of mental illness, decompensation, or suicide.  
20 These risks may arise from an individual inmate-patient's  
21 particular mental state and/or history of mental illness, from  
22 the adequacy of care available in the proposed housing placement,  
23 or both. Accurate and adequate assessment of these risks  
24 requires the exercise of clinical judgment, and where that

25 \_\_\_\_\_  
26 <sup>39</sup> A separate issue arose at the hearing concerning the accuracy of defendants'  
27 data concerning, in particular, lengths of stay in administrative segregation  
28 and segregated housing units. Going forward, defendants will be required to  
provide to the Special Master accurate information that clearly demonstrates  
the total length of time that any Coleman class member spends in any  
administrative segregation unit or segregated housing unit.

1 clinical judgment demonstrates existence of the risk that must be  
2 avoided that judgment cannot be overridden by custodial  
3 requirements. Instead, in situations where clinical judgment  
4 demonstrates an unacceptable level of risk alternative placements  
5 must be made.<sup>40</sup>

6 The Program Guide contains a structure for delivery of  
7 mental health services in administrative segregation, identified  
8 as the Administrative Segregation Unit (ASU) Mental Health  
9 Services (MHS) program. Pls. Ex. 1200 at 12-7-1. Responsibility  
10 for the ASU MHS program at each institution rests jointly with  
11 the Health Care manager and the Warden. Id. Operational  
12 oversight for the ASU MHS lies with the Chief of Mental Health  
13 for each institution. Id.

14 Custodial responsibilities, including initial  
15 placement, disciplinary actions, correctional  
16 counseling services, classification, inmate-  
17 patient movement, and daily management shall  
18 rest with the Warden or designee. The  
19 assigned psychiatrist or Primary Clinician  
(PC) shall attend all Institutional  
20 Classification Committee (ICC) meetings to  
21 provide mental health input.

22 Individual clinical case management,  
23 including treatment planning, level of care  
24 determination and placement recommendations,  
25 are performed by the assigned PC and approved  
26 by the institution Interdisciplinary  
27 Treatment Team (IDTT).

---

24 <sup>40</sup> The record shows that there are programs in place in other jurisdictions  
25 which separate seriously mentally ill inmates from general population for  
26 disciplinary reasons and impose conditions on release from these programs  
27 without subjecting high-risk mentally ill inmates to the harsh conditions in  
28 California's segregation units. See Reply Austin Decl. (ECF No. 4762) at  
¶¶35-37. The court wishes to be clear, if rules violations occur which are  
not the result of an inmate's mental illness, the state may, of course, impose  
appropriate sanctions. What the state cannot do is impose sanctions, which by  
virtue of the inmate's mental status, risks further deterioration.

1 Id. The Interdisciplinary Treatment Team must include, at a  
2 minimum, the assigned primary clinician (PC), the assigned  
3 psychiatrist, the licensed psychiatric technician (LPT) and the  
4 assigned correctional counselor. Id. at 12-7-13.

5 Most of the ASU MHS program objectives appear designed to  
6 prevent the identified risks of harm. See id. at 12-7-2.  
7 Id. at 12-7-2.

8 The Program Guide requires a pre-placement mental health  
9 screening of "all inmates" prior to placement in administrative  
10 segregation. Id. at 12-7-2. This screening is "for possible  
11 suicide risk, safety concerns, and mental health problems." Id.  
12 An inmate who "screens positive" is "referred for a mental health  
13 evaluation on an Emergent, Urgent, or Routine basis." Id. The  
14 Program Guide also requires review of "all inmates" placed in ASU  
15 for "identification of current MHSDS treatment status," said  
16 review to occur within one work day of placement in ASU. Id. at  
17 12-7-3. Mental health staff are required to "ensure the  
18 continuity of mental health care, including the delivery of  
19 prescribed medications." Id.

20 From the foregoing, it appears that, if adequately  
21 implemented, the ASU MHS screening system is designed to capture  
22 most, if not all, of the clinical information necessary to a  
23 determination of whether a particular Coleman class member faces  
24 a substantial risk of exacerbation of mental illness,  
25 decompensation, or suicide from placement in administrative  
26 segregation.<sup>41</sup> The relevant information should be contained in

---

27 <sup>41</sup> The record shows that questions about the accuracy of the present screening  
28 instrument arose over three years ago. See Ex. 45 to Confidential Declaration  
of Jane Kahn, filed March 18, 2013 (ECF 4411-7 \*SEALED\*)(Minutes of November

1 the class member's unit health record and known to his or her  
2 treating clinician at the time that ASU placement is considered.  
3 See also RT at 3570:15-3571:21. The final housing decision,  
4 however, rests with the Institution Classification Committee, and  
5 there are no guidelines for weight to be given clinical criteria  
6 in the placement decisions.

7 Dr. Belavich testified that at present mental health staff  
8 are not consulted about whether the mental health of class  
9 members facing segregation is sufficiently stable to withstand  
10 the mental health consequences of such placement. RT at 3688:21-  
11 3689:3. He was of the view that clinicians should be so  
12 consulted. RT at 3689:4-9. Dr. Belavich also testified that he  
13 and his staff could work with custody staff to develop a plan for  
14 additional mental health input into the segregation placement  
15 process.<sup>42</sup> RT at 3693:3-13.

16 The court concludes that defendants must develop a protocol  
17 for placement decisions, including, as appropriate, a plan for  
18 alternative housing, that will preclude placement of any Coleman  
19 class member in existing administrative segregation units when  
20 clinical information demonstrates substantial risk of  
21 exacerbation of mental illness, decompensation, or suicide from  
22 such placement.

23  
24  
25 8, 2010 Suicide Prevention and Response-Focused Improvement Team (SPR FIT), at  
26 74. If they have not been, those must be resolved going forward.

27 <sup>42</sup> During Dr. Belavich's testimony, counsel for defendants offered to "suspend  
28 the proceedings to discuss these issues." RT at 3692:22-24. While the court  
decided to complete the hearing, the court infers from testimony from Dr.  
Belavich as well as counsel's representation that defendants will bring due  
diligence to the task required by this order.

1 Class members who can be placed in administrative  
2 segregation without the foregoing substantial risks of harm must  
3 have access to adequate mental health care during the placement.  
4 The Program Guide includes mental health services in  
5 administrative segregation units. The ASU MHS program is  
6 designed to provide mental health services for CCCMS inmate-  
7 patients in every administrative segregation unit at a level that  
8 equals or exceeds the mental health services provided to CCCMS  
9 patients in the general population. See Pls. Ex. 1200, Program  
10 Guide at 12-3-8 to 12-3-10; 12-7-7; see also RT at 3467:17-  
11 3468:3.

12 EOP services are only provided in EOP ASU "hubs."<sup>43</sup> The  
13 Program Guide has three options for inmate-patients placed in ASU  
14 who require an EOP level of care: (1) "Referral to an EOP  
15 program for inmate-patients who are involved in non-violent  
16 incidents and determined not to be a risk to others;" (2)  
17 "Inmate-patients who are involved in serious rules violations and  
18 whose propensity for threat to others and/or the security of the  
19 institution is so high that no other alternative placement is  
20 considered appropriate" are to be transferred to one the EOP ASU  
21 hubs within thirty days; and (3) inmates who are serving  
22 "established and endorsed SHU terms" are transferred to a  
23

---

24 <sup>43</sup> There are eleven EOP ASU hubs located at Central California Women's Facility  
25 (CCWF), California Institution for Women (CIW), California Medical Facility  
26 (CMF), California State Prison-Corcoran (COR), California State Prison-Los  
27 Angeles County (CSP-LAC), Mule Creek State Prison (MCSP), R.J. Donovan (RJD),  
28 California State Prison-Sacramento (SAC), San Quentin State Prison (SQ), and  
Salinas Valley State Prison (SVSP). Defs. Ex. ZZZ. On October 25, 2013,  
there were a total of 579 EOP inmate-patients in ASUs, 48 of whom were in non-  
hub ASUs. Id. Systemwide, there were a total of 600 EOP ASU hub beds;  
twenty-one were vacant. Id.

1 Psychiatric Services Units (PSU).<sup>44</sup> Pls. Ex. 1200, Program Guide  
2 at 12-7-8.

3 The specific treatment criteria for the EOP level of care  
4 requires the presence of either acute onset of symptoms or  
5 significant decompensation due to mental illness, an inability to  
6 function in the general population, or both. Id. at 12-4-3, 12-  
7 4-4.<sup>45</sup> The evidence shows that the risks of harm for these  
8 inmate-patients can be significantly higher in administrative  
9 segregation units. Defendants' termination experts and  
10 plaintiffs' experts both opined that placement of EOP inmates in  
11 administrative segregation should be strictly limited, even where  
12 an EOP level of care is provided. See Defs. Ex. HHH (ECF No.  
13 4275-5) at 23, 25; Expert Declaration of Craig Haney, filed May  
14 6, 2013 (ECF No. 4581) at ¶ 29. Dr. Belavich also testified that  
15 his "goal as a clinician" is to get EOP inmate-patients into a  
16 PSU "as soon as I can." RT at 3564:22-3565:8.

17  
18 <sup>44</sup> PSUs are at Pelican Bay, CIW, and SAC.

19 <sup>45</sup> Acute Onset or Significant Decompensation of a serious mental disorder  
20 characterized by symptoms such as increased delusional thinking, hallucinatory  
21 experiences, marked changes in affect, and vegetative signs with definitive  
22 impairment of reality testing and/or judgment; and/or  
23 Inability to Function in General Population Based Upon:  
24 a. A demonstrated inability to program in work or educational assignments, or  
25 other correctional activities such as religious services, self-help  
26 programming, canteen, recreational activities, visiting, etc. as a consequence  
27 of a serious mental disorder; or  
28 b. The presence of dysfunctional or disruptive social interaction including  
withdrawal, bizarre or disruptive behavior, extreme argumentativeness,  
inability to respond to staff directions, provocative behavior toward others,  
inappropriate sexual behavior, etc., as a consequence of a serious mental  
disorder; or  
c. An impairment in the activities of daily living including eating, grooming  
and personal hygiene, maintenance of housing area, and ambulation, as a  
consequence of a serious mental disorder.  
These conditions usually result in Global Assessment Functioning (GAF) Scores  
of less than 50.

1 "Remedial efforts over the past six years have focused on  
2 reducing the length of time EOP inmates remain in administrative  
3 segregation and providing appropriate clinical care for EOP  
4 inmates housed in such units." Coleman v. Brown, 938 F.Supp.2d  
5 at 979. As already discussed, defendants' termination experts  
6 reported that the environment in CDCR's administrative  
7 segregation units "is not therapeutic" and that even where EOP  
8 levels of care are provided "segregation is not a particularly  
9 therapeutic environment to house inmates with serious mental  
10 disorders." Defs. Ex. HHH (ECF No. 4275-5) at 23, 25.<sup>46</sup> In his  
11 Twenty-Fifth Round Monitoring Report, the Special Master reported  
12 that "ten of the 11 [EOP-ASU] hubs failed to offer at least ten  
13 hours per week of structured therapeutic activity per week. Only  
14 CIW was able to meet that benchmark. Structured therapeutic  
15 activity is a critical part of EOP care in general. This is  
16 particularly true in segregation units, where the group dynamic  
17 and interaction with others can help ameliorate the anti-  
18 therapeutic effects of isolation on the mentally ill patient."  
19 Twenty-Fifth Round Monitoring Report (ECF No. 4298) at 37.

20 Some evidence presented at the hearing suggested recent  
21 improvements in the provision of care in certain EOP Ad Seg hubs.  
22 See, e.g., Defs. Ex. DDDD (compiling compliance rate with certain  
23 Program Guide requirements for the month of October 2013); Defs,  
24 Ex. GGGG. (compiling data on group therapy in EOP ASUs, EOP PSUs,  
25 and for CCCMS patients in ASU and two SHUs). Overall review of

---

26 <sup>46</sup> Taken together with the treatment criteria for the EOP level of care, which  
27 requires significant impairment preventing functioning in a general population  
28 setting, the fact that defendants' own experts found the EOP-ASU hub  
environment "not particularly therapeutic" continues to be of grave concern to  
this court.

1 the record suggests that the adequacy of care in individual EOP  
2 ASU hubs varies based on several factors, including the physical  
3 plant, available treatment space, and staffing levels. See,  
4 e.g., RT at 3495:2-13; Twenty-Fifth Round Monitoring Report (ECF  
5 No. 4298) at 37.

6 As discussed above, the Program Guide contains specific  
7 requirements for necessary care in general administrative  
8 segregation units and EOP ASU hubs. Dr. Belavich testified that  
9 he receives substantial data from his staff that he uses to  
10 review quality of care issues in these units, and the court was  
11 impressed by his apparent diligence. Plainly, defendants cannot  
12 house seriously mentally ill inmates in settings where defendants  
13 know those inmates cannot receive the minimally adequate mental  
14 health care required by the Program Guide. Whether or not the  
15 care provided in each EOP ASU hub meets Program Guide  
16 requirements is, again, a clinical judgment and one that must be  
17 exercised by Dr. Belavich and his staff. Accordingly, defendants  
18 will be required to provide monthly reports on whether each EOP  
19 ASU hub meets Program Guide requirements for an EOP ASU level of  
20 care and they will be prevented from admitting any Coleman class  
21 member at the EOP level of care to any EOP ASU hub that does not  
22 meet or exceed Program Guide requirements for a period of more  
23 than two consecutive months. Moreover, defendants will also be  
24 prevented from placing any Coleman class member at the EOP level  
25 of care in any administrative segregation unit during any period  
26 in which there are an insufficient number of EOP Ad Seg Hub beds  
27 available.

28 c. Strip Searches

1 Plaintiffs seeks an order prohibiting defendants from  
2 continuing their strip search policy in administrative  
3 segregation units. Dr. Belavich testified that he was concerned  
4 that this policy inhibited treatment and was aware that it needed  
5 to be revisited. RT at 3503:18-3505:3. Defendants will be  
6 directed to provide a revised policy to the court within sixty  
7 days.

8 d. Suicide Prevention Measures

9 Plaintiffs seek a series of orders relative to suicide  
10 prevention. See Pls. Post-Trial Brief Re: Enforcement of Court  
11 Orders, filed January 21, 2014 (ECF No. 4985) at 30-33. By  
12 minute order issued July 26, 2013, the court dropped  
13 consideration of issues related to inmate suicide without  
14 prejudice to their renewal, if appropriate, following a report  
15 from the Suicide Prevention/Management Work Group. That order  
16 stands.

17 B. Segregated Housing Units

18 In addition to numerous administrative segregation units,  
19 California's prison system has three types of  
20 "Segregated Program Housing Units." 15 C.C.R. §3341.5.  
21 Protective Housing Units (PHUs) are for the protection of inmates  
22 "whose safety would be endangered by general population  
23 placement" and who meet specified criteria. 15 C.C.R. §  
24 3341.5(a). Security Housing Units (SHUs) are for inmates "whose  
25 conduct endangers the safety of others or the security of the  
26 institution." 15 C.C.R. §3341.5(c). Psychiatric Services Units  
27 (PSUs) are for seriously mentally ill inmates in the Enhanced  
28

1 Outpatient Program (EOP) who require the equivalent of SHU  
2 placement. 15 C.C.R. §3341.5(b).

3 In general, inmates may be placed in a SHU following  
4 conviction of certain disciplinary offenses or after validation  
5 as a member of a prison gang. See 15 C.C.R. § 3341.5(c)(1),  
6 (2)(A)(2). SHU terms may be determinate or indeterminate. 15  
7 C.C.R. § 3341.5(c)(2)(A), (B). An inmate subject to an  
8 indeterminate SHU term whose SHU term is suspended "based solely  
9 on the need for inpatient medical or mental health treatment" may  
10 have the term "reimposed without subsequent misbehavior if the  
11 inmate continues to pose a threat to the safety of others or the  
12 security of the institution." 15 C.C.R. § 3341.5(c)(A)(3).

13 With very limited exceptions, almost all seriously mentally  
14 ill inmates are excluded from the Pelican Bay SHU. See Pls. Ex.  
15 1200 at 12-8-1 to 12-8-3.<sup>47</sup> In addition, male inmates requiring

---

16 <sup>47</sup> Exclusion of seriously mentally ill inmates from the Pelican Bay SHU is the  
17 result of a 1995 order in a separate class action lawsuit, Madrid v. Gomez,  
18 No. C90-3094 TEH (N.D.Cal.). The Madrid court found, inter alia, Eighth  
19 Amendment violations in SHU placement of "the already mentally ill, as well as  
20 persons with borderline personality disorders, brain damage or mental  
21 retardation, impulse-ridden personalities, or a history of prior psychiatric  
22 problems or chronic depression" because these inmates were found to be "at a  
particularly high risk for suffering very serious or severe injury to their  
mental health, including overt paranoia, psychotic breaks with reality, or  
massive exacerbations of existing mental illness as a result of conditions in  
the SHU." Madrid v. Gomez, 889 F.Supp. 1146, 1265-66 (N.D.Cal. 1995).The  
Madrid court determined that

23           subjecting individuals to conditions that are "very  
24           likely" to render them psychotic or otherwise inflict  
25           a serious mental illness or seriously exacerbate an  
26           existing mental illness cannot be squared with  
27           evolving standards of humanity or decency, especially  
28           when certain aspects of those conditions appear to  
bear little relation to security concerns. A risk this  
grave—this shocking and indecent—simply has no place  
in civilized society. It is surely not one "today's  
society [would] choose[ ] to tolerate." . . . Indeed,  
it is inconceivable that any representative portion of  
our society would put its imprimatur on a plan to

1 an EOP level of care are not housed in any of the other three SHU  
2 units for male inmates and are instead placed in PSUs.<sup>48</sup> Pls. Ex.  
3 1200 at 12-8-1. There is no similar exclusion for female  
4 inmates. See id. The Program Guide calls for provision of CCCMS  
5 services in the three male SHUs other than Pelican Bay SHU. Id.

6 Plaintiffs seek an order extending the Pelican Bay SHU  
7 exclusion in the Program Guide to the other four segregated  
8 housing units in California's prison system.<sup>49</sup> Defendants oppose  
9 the request, contending that (1) only inmates at the CCCMS level  
10 of care are housed in SHU units; (2) appropriate mental health  
11 services, consistent with Program Guide requirements, are  
12 provided to inmates housed in SHUs; (3) the SHU units other than  
13 Pelican Bay have natural light, less restrictive exercise yards,  
14 and allow for electrical appliances, including televisions and  
15 radios, in cells; and (4) "increasing data" suggests "that  
16 segregation does not cause the type and severity of psychological  
17 harm" described by plaintiffs' expert, Dr. Haney. Defs. Opp'n  
18 (ECF No. 4712) at 29.

---

19  
20 subject the mentally ill and other inmates described  
21 above to the SHU, knowing that severe psychological  
22 consequences will most probably befall those inmates.  
23 Thus, with respect to this limited population of the  
24 inmate class, plaintiffs have established that  
continued confinement in the SHU, as it is currently  
constituted, deprives inmates of a minimal civilized  
level of one of life's necessities.  
Id. at 1266 (quoting Helling v. McKinney, 509 U.S. 25, 113 S.Ct. 2475, 2482  
(1993)).

25  
26 <sup>48</sup> In September 2013, 361 seriously mentally ill inmates were housed in a  
psychiatric services unit (PSU). Pls. Ex. 2303.

27 <sup>49</sup> California Institution for Women (CIW); California Correctional Institution  
28 (CCI); California State Prison-Corcoran (COR); and California State Prison-  
Sacramento (SAC).

1 First, both parties have tendered expert opinions and other  
2 evidence concerning whether or not prolonged placement of  
3 seriously mentally ill inmates in segregated housing units causes  
4 psychological harm to those individuals. The court has already  
5 found that, for seriously mentally ill inmates, placement in  
6 California's segregated housing units, including both  
7 administrative segregation units and SHUs, can and does cause  
8 serious psychological harm, including decompensation,  
9 exacerbation of mental illness, inducement of psychosis, and  
10 increased risk of suicide. See Coleman v. Wilson, 912 F.Supp. at  
11 1320-1321; see also Findings and Recommendations, filed June 6,  
12 1994 (Dkt. 547) at 51-54. Nothing in the evidence tendered on  
13 the current motions requires revisiting those findings.<sup>50</sup>

14 \_\_\_\_\_  
15 <sup>50</sup> The evidence tendered by the parties would certainly bear on an inquiry into  
16 whether housing seriously mentally ill inmates in segregation comports with  
17 contemporary values, a question not before this court at this stage of these  
18 proceedings. "[T]he Eighth Amendment's prohibition of cruel and unusual  
19 punishments "'draw[s] its meaning from the evolving standards of decency that  
20 mark the progress of a maturing society,'" . . . ." Hudson v. McMillian, 503  
21 U.S. 1, 8 (1992) (internal citations omitted). To the extent possible, courts  
22 look to "'objective indicia' derived from, inter alia, history, common law,  
23 and legislative action to determine whether particular punishments violate  
24 contemporary values. Rhodes v. Chapman, 452 U.S. at 347 (internal citations  
25 omitted). Available evidence suggests that contemporary values are moving  
26 away from placement of seriously mentally ill prisoners in segregated housing,  
27 particularly for periods as long as placements currently used in California.  
28 See Pls. Ex. 2054 (American Psychiatric Association (APA) December 2012  
official policy on segregation of adult inmates with serious mental illness);  
Statement of Interest of the United States of America, filed August 9, 2013  
(ECF No. 4736) (finding Eighth Amendment violations in the "manner in which  
the Pennsylvania Department of Corrections used solitary confinement on  
prisoners with serious mental illness. . . ."); Reply Austin Decl. (ECF No.  
4762) at ¶¶ 36, 50 (Mississippi, Georgia, New Mexico, Colorado and Oklahoma  
all exclude "most or all prisoners with diagnosed mental illnesses" from their  
"punitive segregations units" and instead assign those inmates "to a  
specialized mental health unit"; Ohio also requires prompt transfer of  
seriously mentally ill inmates out of segregated housing.) In addition, news  
reports suggest that other jurisdictions, including the New York City  
Department of Correction, see  
[http://online.wsj.com/news/articles/SB1000142405270230461740457930284042591008](http://online.wsj.com/news/articles/SB10001424052702304617404579302840425910088)  
[8](http://www.npr.org/2014/02/23/281373188/n-y-becomes-largest-prison-system-to-curb-solitary-confinement); and New York State, see [http://www.npr.org/2014/02/23/281373188/n-y-](http://www.npr.org/2014/02/23/281373188/n-y-becomes-largest-prison-system-to-curb-solitary-confinement)  
[becomes-largest-prison-system-to-curb-solitary-confinement](http://www.npr.org/2014/02/23/281373188/n-y-becomes-largest-prison-system-to-curb-solitary-confinement), are ending the  
placement of mentally ill inmates in solitary confinement.

1 Defendants also contend that measuring compliance with their  
2 Revised Program Guide "is an appropriate way to assess whether  
3 defendants are meeting their constitutional obligations."  
4 Coleman v. Brown, 938 F.Supp.2d at 972 n.30. Defendants' Revised  
5 Program Guide is the "currently operative remedial plan" in this  
6 action, and represents "'defendants' considered assessment, made  
7 in consultation with the Special Master and his experts, and  
8 approved by this court, of what is required to remedy the Eighth  
9 Amendment violations identified in this action and to meet their  
10 constitutional obligation to deliver adequate mental health care  
11 to seriously mentally ill inmates.'" Id. at 972 (internal  
12 citation omitted.) While the court has approved "[n]inety-five  
13 percent of the provisions of the Revised Program Guide", id. at  
14 972 & n.31, certain disputed issues were reserved for resolution  
15 when the court gave that approval. See Order filed March 3, 2006  
16 (ECF No. 1773). Whether the Pelican Bay SHU exclusions should be  
17 extended to all SHUs was one of the disputed issues that remained  
18 for resolution, as was the adequacy of mental health care  
19 provided to class members housed in SHUs. See Special Master's  
20 Report and Recommendations on Defendants' Revised Program Guide,  
21 filed February 3, 2006 (ECF No. 1749) at 8-9. Thus, the  
22 provisions of the Program Guide are not dispositive of the  
23 question at bar.

24 Third, the fact that only CCCMS inmates are housed in SHU  
25 units narrows the question but does not end the inquiry. The  
26 Pelican Bay SHU exclusion includes almost all of the treatment  
27 categories for the CCCMS level of care.<sup>51</sup> It is also broader than

---

28 <sup>51</sup> Treatment criteria for CCCMS also include inmates diagnosed with

1 the CCCMS criteria. In relevant part, treatment criteria for the  
2 CCCMS level of care include *current* symptoms of specified Axis I  
3 serious mental disorders, Pls. Ex. 1200 at 12-3-4, while the  
4 Pelican Bay SHU exclusion extends to inmates who currently have  
5 symptoms of those disorders or who have had such symptoms "within  
6 the preceding three months." Id. at 12-8-2.

7 Resolution of the question at bar turns, then, on two  
8 disputed issues: whether the conditions of confinement in other  
9 SHU units are materially different from the conditions of  
10 confinement in the Pelican Bay SHU, and whether the mental health  
11 care provided in other SHU units is constitutionally sufficient.

12 As discussed above, the conditions of SHU confinement  
13 include both the physical conditions of the housing units and the  
14 exercise yards, and the restrictions that attach to  
15 classification for SHU housing. The restrictions are the same  
16 for all SHU inmates; that is part of the classification process.  
17 Thus, it is undisputed that the highly restrictive programming in  
18 the Pelican Bay SHU is the same in all of California's SHU units.  
19 All SHU inmates are confined to their cells for approximately  
20 twenty-three hours per day. Haney Decl. (ECF No. 4581) at ¶ 23.

21 The primary difference between the Pelican Bay SHU and the  
22 other SHU units is that the cells in the Pelican Bay SHU "are  
23 windowless and do not face other cells across the pod, and the  
24 'yards' consist of concrete enclosed spaces rather than cages."

25  
26 exhibitionism, which is not included in the Pelican Bay exclusions. See Pls.  
27 Ex. 1200 at 12-3-5, 12-8-1, 12-8-2. However, SHU inmates who receive a rules  
28 violation report for "Indecent Exposure or Intentionally Sustained  
Masturbation with Exposure" are referred for a mental health assessment which  
must "be completed within 24 hours to rule-out decompensation and/or  
intoxication." Id. at 12-8-6.

1 Haney Decl. (ECF No. 4581) at ¶ 18; see also Allison Decl. (ECF  
2 No. 4713) at ¶ 26.<sup>52</sup>

3 Only CCCMS care is provided in SHU units. Pls. Ex. 1200 at  
4 12-8-1. Male inmates requiring EOP level of care are referred to  
5 a psychiatric services unit (PSU). Id. at 12-8-1, 12-8-10. The  
6 Program Guide provides that “[f]emale inmate-patients [who  
7 require an EOP level of care] will continue to be treated in SHU  
8 . . . until a PSU for female inmate-patients is established.”  
9 Id. at 12-8-11, 12-8-12. There is currently a 20 bed PSU for  
10 female inmates at California Institution for Women (CIW). See  
11 Ex. A to Pls. March 3, 2014 Request for Judicial Notice (ECF No.  
12 5093), at 14.

13 As discussed above, this question goes to the heart of the  
14 tension between legitimate penological goals of prison  
15 institutions, including the need for order and discipline, and  
16 the requirements of the Eighth Amendment. The record before the  
17 court amply demonstrates that there are many seriously mentally  
18 ill inmates at the CCCMS level of care who cannot be housed in  
19 any SHU in California without running afoul of the Eighth  
20 Amendment. It is not clear that this is true for all inmates at  
21 the CCCMS level of care. For that reason, the court will not at  
22 this time require the blanket exclusion requested by plaintiffs.  
23 Instead, defendants will be prohibited from housing any seriously  
24 mentally ill inmate at any SHU in California unless that inmate’s

---

25  
26 <sup>52</sup> There is minimal natural light in the Pelican Bay SHU: “A skylight in each  
27 pod does allow some natural light to enter the tier area adjacent to the  
28 cells. . . . Inmates can spend years without ever seeing any aspect of the  
outside world except for a small patch of sky.” Madrid v. Gomez, 889 F.Supp.  
1146, 1228, 1229 (N.D.Cal. 1995).

1 treating clinician certifies that (1) the inmate's behavior  
2 leading to the SHU assignment was not the product of mental  
3 illness and the inmate's mental illness did not preclude the  
4 inmate from conforming his or her conduct to the relevant  
5 institutional requirements; (2) the inmate's mental illness can  
6 be safely and adequately managed in the SHU to which the inmate  
7 will be assigned for the entire length of the SHU term; and (3)  
8 the inmate does not face a substantial risk of exacerbation of  
9 his or her mental illness or decompensation as a result of  
10 confinement in a SHU. In addition, defendants will be prohibited  
11 from returning any seriously mentally ill inmate to any SHU unit  
12 if said inmate has, following placement in a SHU, required a  
13 higher level of mental health care.<sup>53</sup>

14 For all of the foregoing reasons, plaintiffs' motions will  
15 be granted in part.

16 V. Standards for Injunctive Relief

17 The court does, by this order, direct specific action by  
18 defendants. In this court's view, the orders contained herein  
19 are in aid of the remedy required by the court's 1995 order. To  
20 the extent that the requirements of 18 U.S.C. §3626(a)(1) may  
21 apply, this court finds that the orders contained herein are  
22 narrowly drawn, extend no further than necessary to correct the  
23 Eighth Amendment violations found at the trial of this matter and  
24

---

25  
26 <sup>53</sup> Plaintiffs have requested that defendants be ordered to develop treatment-  
27 based disciplinary programs for Coleman class members. Given the necessity of  
28 the restrictions imposed by this order, defendants may want to seriously  
consider voluntarily adopting such programs as this may provide a more  
straightforward means of planning for appropriate housing and treatment of  
mentally ill offenders.

1 still ongoing, and are the least intrusive means to that end.

2 See 18 U.S.C. § 3626(a)(1)(A).

3 In accordance with the above, IT IS HEREBY ORDERED that:

4 1. Plaintiffs' May 29, 2013 motion for enforcement of court  
5 orders and affirmative relief related to use of force and  
6 disciplinary measures (ECF No. 4638) is granted in part as  
7 follows:

8 a. Defendants shall work under the guidance of the  
9 Special Master to revise their use of force policies and  
10 procedures as required by this order. Said revisions shall be  
11 completed within sixty days from the date of this order.

12 b. The Special Master shall report to the court within  
13 six months whether defendants have adequately implemented the RVR  
14 policies and procedures agreed to in 2011.

15 c. Defendants shall work with the Special Master on a  
16 timeline for completion of their review of the use of management  
17 status so that this practice can be reviewed by the Special  
18 Master as part of his review of the implementation of defendants'  
19 RVR policies and procedures.

20 2. Plaintiffs' May 6, 2013 motion for enforcement of  
21 judgment and affirmative orders related to segregated housing  
22 (ECF No. 4580) is granted in part as follows:

23 a. Within thirty days from the date of this order  
24 defendants shall file a plan to limit or eliminate altogether  
25 placement of class members removed from the general population  
26 for non-disciplinary reasons in administrative segregations units  
27 that house inmates removed from the general population for  
28 disciplinary reasons. Defendants shall be prepared to fully

1 implement the plan within thirty days thereafter. Defendants  
2 shall commence forthwith to reduce the number of Coleman class  
3 members housed for non-disciplinary reasons in any administrative  
4 segregation unit that houses disciplinary segregation inmates.  
5 Commencing sixty days from the date of this order, defendants  
6 will be prohibited from placing any class members removed from  
7 the general population for non-disciplinary reasons for more than  
8 seventy-two hours in administrative segregations units that house  
9 inmates removed from the general population for disciplinary  
10 reasons.

11           b. Defendants shall work under the guidance of the  
12 Special Master to develop a protocol for administrative  
13 segregation decisions, including, as appropriate, a plan for  
14 alternative housing, that will preclude placement of any Coleman  
15 class member in existing administrative segregation units when  
16 clinical information demonstrates substantial risk of  
17 exacerbation of mental illness, decompensation, or suicide from  
18 such placement.

19           c. Defendants shall forthwith provide to the court and  
20 the Special Master monthly reports on whether each EOP ASU hub  
21 meets Program Guide requirements for an EOP ASU level of care.  
22 Commencing sixty days from the date of this order, defendants  
23 shall not admit any Coleman class member at the EOP level of care  
24 to any EOP ASU hub that has failed to meet or exceed Program  
25 Guide requirements for a period of more than two consecutive  
26 months. Commencing sixty days from the date of this order,  
27 defendants shall not place any class member at the EOP level of  
28 care in any administrative segregation unit during any period in

1 which there are an insufficient number of EOP Ad Seg Hub beds  
2 available unless failure to remove the inmate from the general  
3 population presents an imminent threat to life or safety.

4 d. Within sixty days from the date of this order  
5 defendants shall file a revised policy concerning strip searches  
6 in EOP ASU hubs.

7 e. Defendants are prohibited from housing any class  
8 member at any SHU in California unless that class member's  
9 treating clinician certifies that (1) the behavior leading to the  
10 SHU assignment was not the product of mental illness and the  
11 inmate's mental illness did not preclude the inmate from  
12 conforming his or her conduct to the relevant institutional  
13 requirements; (2) the inmate's mental illness can be safely and  
14 adequately managed in the SHU to which the inmate will be  
15 assigned for the entire length of the SHU term; and (3) the  
16 inmate does not face a substantial risk of exacerbation of his or  
17 her mental illness or decompensation as a result of confinement  
18 in a SHU. In addition, defendants are prohibited from returning  
19 any seriously mentally ill inmate to any SHU unit if said inmate  
20 has at any time following placement in a SHU required a higher  
21 level of mental health care.

22 DATED: April 10, 2014.

23  
24  
25   
26 LAWRENCE K. KARLTON

27 SENIOR JUDGE  
28 UNITED STATES DISTRICT COURT
