UNITED STATES DISTRICT COURT  
EASTERN DISTRICT OF CALIFORNIA

RALPH COLEMAN, et al.,  
  
                                Plaintiffs,  
  
                                v.  
  
EDMUND G. BROWN, JR., et al.,  
  
                                Defendants.

No. 2:90-cv-0520 KJM DB P

ORDER

As required by court order, *see* ECF No. 5188, on May 25, 2016, the Special Master filed a monitoring report on the inpatient mental health care programs for class members. ECF No. 5448. Neither party has filed objections to the findings in the report or the recommendations made by the Special Master.

Prior to and following the Special Master’s submission of this report, the court has held three status conferences with the parties to address the ongoing problem of waitlists for access to inpatient mental health care. *See* ECF Nos. 5340, 5343, 5498, 5512, 5519, 5552. As a consequence, events have now overtaken some of the findings<sup>1</sup> and this, in turn, affects the first and third recommendations in the report. *See* ECF No. 5544 at 121. As the court informed the

---

<sup>1</sup> For example, the proposal to shift the responsibility for prison-based inpatient mental health care programs from the Department of State Hospitals (DSH) to the California Department of Corrections and Rehabilitation (CDCR), *see, e.g.*, ECF No. 5448 at 14-16, 37-41, has been included in the Governor’s budget for 2017-18. *See* ECF No. 5544.

1 parties at the hearing on January 23, 2017, the problem with waitlists for access to inpatient care  
2 will be the subject of an order to show cause. Given the foregoing, the court will not adopt the  
3 first recommendation in the Special Master's report. The findings in the report will be adopted in  
4 full as will the second, third, and fourth recommendations.

5 In addition, the court will make an additional order to clarify the reporting  
6 obligations of the parties going forward. At the hearing on January 23, 2017, it became clear that  
7 defendants did not inform the Special Master when twenty inpatient beds were closed at the  
8 Salinas Valley Psychiatric Program (SVPP) in October 2016 due to flooding. ECF No. 5560 at  
9 37-38. Nor did defendants inform the Special Master of their decision to begin treating acute  
10 inpatients at Atascadero State Hospital (ASH) in 2016. ECF No. 5560 at 66-67. In addition, the  
11 Special Master has informed the court that defendants did not notify him of the closure of thirty-  
12 eight additional beds at SVPP in January 2017 or the decision to use isolation rooms at DSH-  
13 Stockton (Stockton) until ten days before the January 23, 2017 hearing. Given the history of the  
14 remedial phase of this action, the court expects that defendants would have provided timely notice  
15 to the Special Master and the plaintiffs of the bed closures at SVPP, the decision to once again  
16 treat acute care patients at ASH, and the use of isolation rooms at Stockton. The court previously  
17 has issued at least one court order requiring advance notice and approval. *See* ECF No. 1800 at 6  
18 (“Until further order of this court, defendants shall not close any intermediate inpatient bed or  
19 mental health crisis bed on the basis of state licensing requirements without approval of the  
20 special master.”). Given the significance of the recent changes, the court will, by this order,  
21 direct defendants to meet and confer with the Special Master prior to implementation of any  
22 further changes, additions, or reductions in the number and/or use of any inpatient beds or mental  
23 health crisis beds.

24 In accordance with the above, IT IS HEREBY ORDERED that:

- 25 1. The findings in the Special Master's Monitoring Report on the Mental Health  
26 Inpatient Care programs for Inmates of the California Department of  
27 Corrections and Rehabilitation, ECF No. 5448, are adopted in full, as are his  
28 second, third, and fourth recommendations, ECF No. 5448 at 121-22.

- 1                   2. The DSH defendants shall continue to work on their staffing plan for their  
2                   inpatient programs that treat *Coleman* class members. The plan should be  
3                   developed in coordination with CDCR's development of its own mental health  
4                   staffing plan, and within the context of the same meet-and-confer process with  
5                   the *Coleman* parties, under the guidance of the Special Master. Due to the  
6                   urgency of the long-standing mental health staffing issues, the DSH defendants  
7                   shall provide the Special Master with monthly updates on their implementation  
8                   of their staffing plan so it may be tracked and monitored by the Special Master.
- 9                   3. Under the guidance and supervision of the Special Master, and with input from  
10                  the plaintiffs as appropriate, the DSH defendants shall develop a plan within 90  
11                  days for the creation of a continuous quality improvement (CQI) process to be  
12                  utilized in the DSH inpatient programs that treat *Coleman* class members. The  
13                  DSH defendants shall utilize CDCR as its consultant in this endeavor, availing  
14                  themselves of the expertise and strategies developed by CDCR staff and the  
15                  progress achieved thus far by CDCR in its development its own CQI process.
- 16                  4. The DSH defendants shall develop within 90 days a plan for the creation of a  
17                  consistent and uniform patient level system to be utilized across all of its  
18                  inpatient programs that treat *Coleman* class members. There shall be a system  
19                  for use across all acute care inpatient programs, and a system for use across all  
20                  intermediate inpatient care programs.
- 21                  5. Until further order of court, defendants shall meet and confer with the Special  
22                  Master at least thirty days before making any changes, additions, or reductions  
23                  in the number and/or use of any inpatient beds or mental health crisis beds. If  
24                  an emergency situation precludes such meet and confer thirty days in advance,  
25                  defendants shall consult with the Special Master immediately upon learning of  
26                  the need to make any changes, additions or reductions in the number and/or
